

## Table of Contents

Introduction . . . . .	ii
Conference Schedule . . . . .	1
Abstracts of Presentations . . . . .	4
Brian D. Beasley, <i>Where, Oh Waring? The Classic Problem and its Extensions</i> . . . . .	15
Ryan Botts, Lori Carter, <i>Lesson's Learned: A Journey in Computational Science</i> . . . . .	22
Robert L. Brabenec, <i>Thinking Philosophically about Mathematics</i> . . . . .	29
Jeremy Case, <i>PK Mathematicians</i> . . . . .	35
Loredana Ciurdariu, <i>Pascal's Thoughts Seen in the Light of Scripture</i> . . . . .	53
Eric Gossett, <i>The Search for Hamilton</i> . . . . .	66
Nathan Gossett, <i>The Need for a Graphics Programming Course in CS</i> . . . . .	74
Wayne Iba, <i>Real Simulations and Simulated Reality</i> . . . . .	81
Stephen Lovett, <i>Bringing Undergraduate Research into the Classroom</i> . . . . .	90
Nathan Moyer, <i>Connecting Mathematics Students to Philosophy and Faith</i> . . . . .	95
Judith Palagallo, <i>Calculus Communication Circle</i> . . . . .	103
Doug Phillippy, <i>The Study of Mathematics: A Text from a Christian Perspective</i> . . . . .	107
Donna Pierce, <i>Math History Study Abroad Program</i> . . . . .	120
Michael Rempe, <i>Google and the Mathematics of Web Search</i> . . . . .	131
Gordon A. Swain, <i>The History of the Area between a Line and a Parabola</i> . . . . .	138
Mary Walkins, <i>History of Mathematics: An Exercise in Strengths</i> . . . . .	154
Samuel P. Wilcox, <i>A Bayesian Secondary Analysis in an Asthma Study</i> . . . . .	158
Josh Wilkerson, <i>What we can Learn from Process Theology</i> . . . . .	166
Nicholas J. Willis, <i>Two Faith Integration Projects for Freshman Majors</i> . . . . .	184
Maria Zack, <i>Using Original Historical Mathematics Texts in the Classroom</i> . . . . .	189
Nicholas C. Zoller, <i>The Mathematics of Cubic Sudoku</i> . . . . .	199
Participant List . . . . .	207
Conference Photos . . . . .	210
