Envisage Planner Archive

About

Envisage Planner is a tool designed by Tim Swanson to consolidate all areas of academic planning into one simple tool. This includes choosing your major/minor, courses, and when and how to take them. It is currently just for Taylor Students, but we are aiming to expand this service to all students.

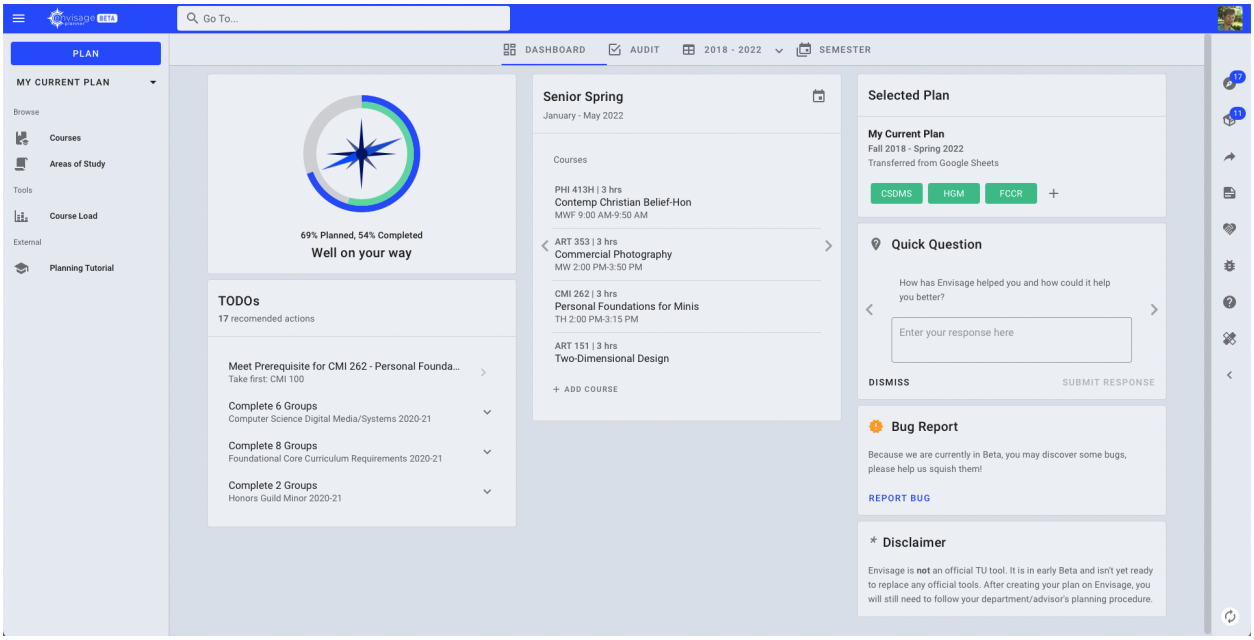
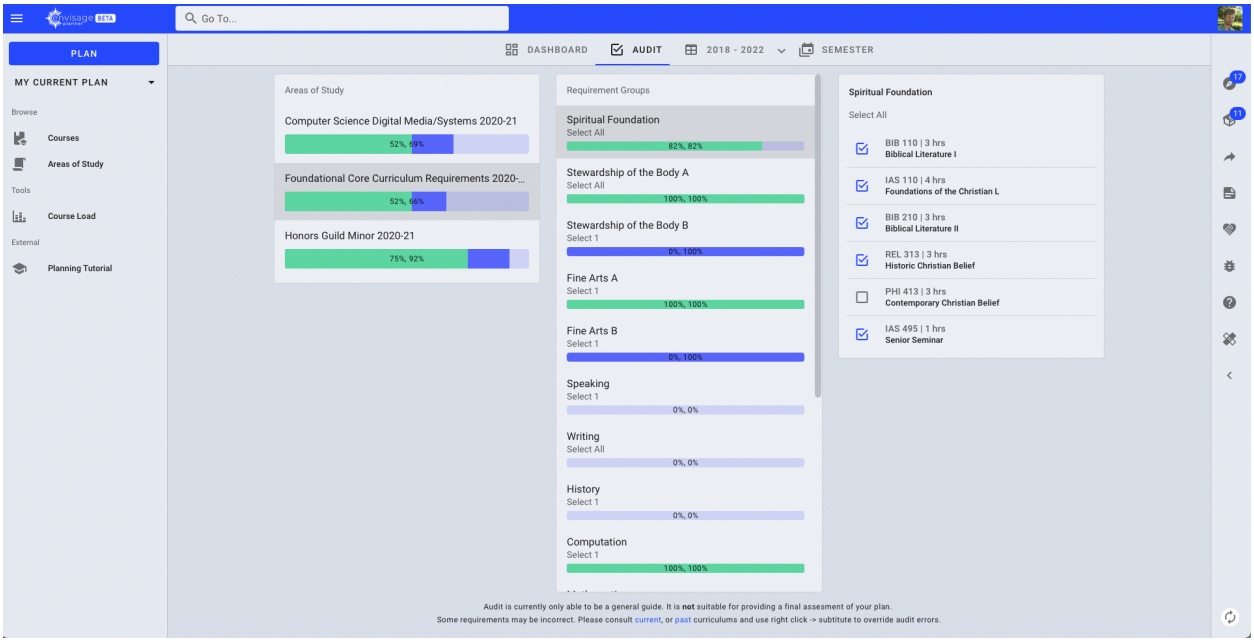
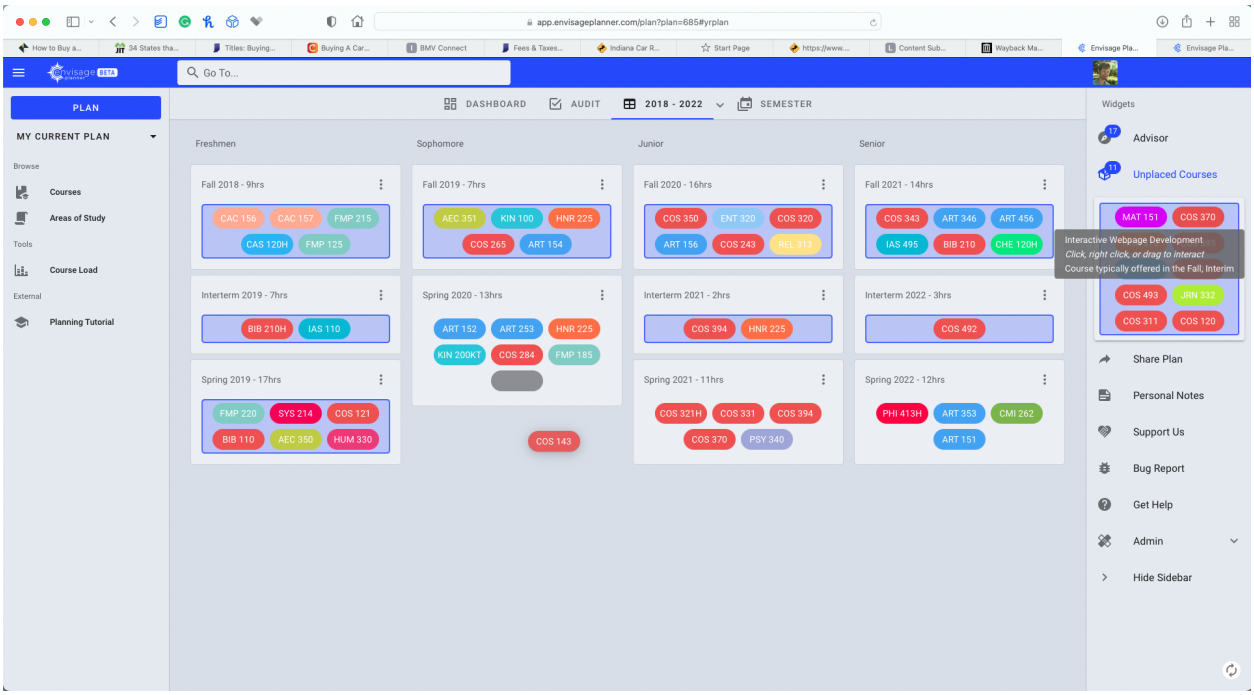
Screenshots



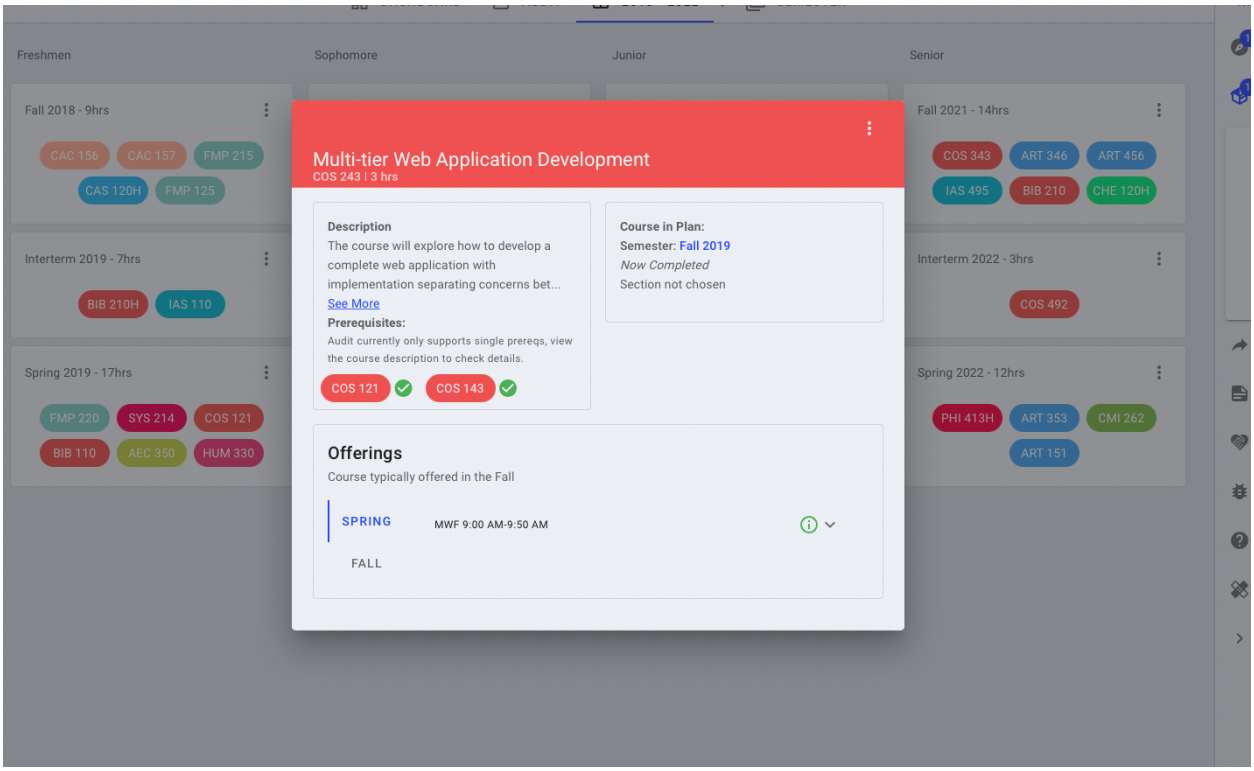
The dashboard, which students are first shown on page load



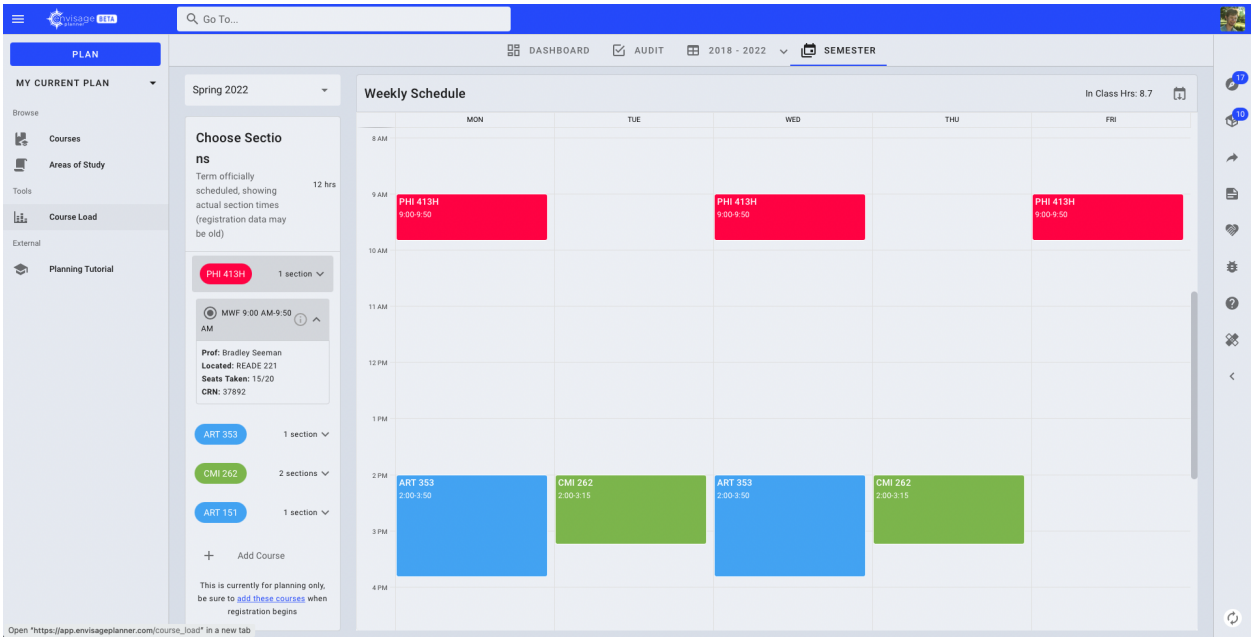
The audit view, which shows students their progress on degree requirements and allows them to easily make changes and see their impact.



The 4 year plan view, which allows students to plot out which semester they will take their classes. Students can drag courses to terms where the course is offered.

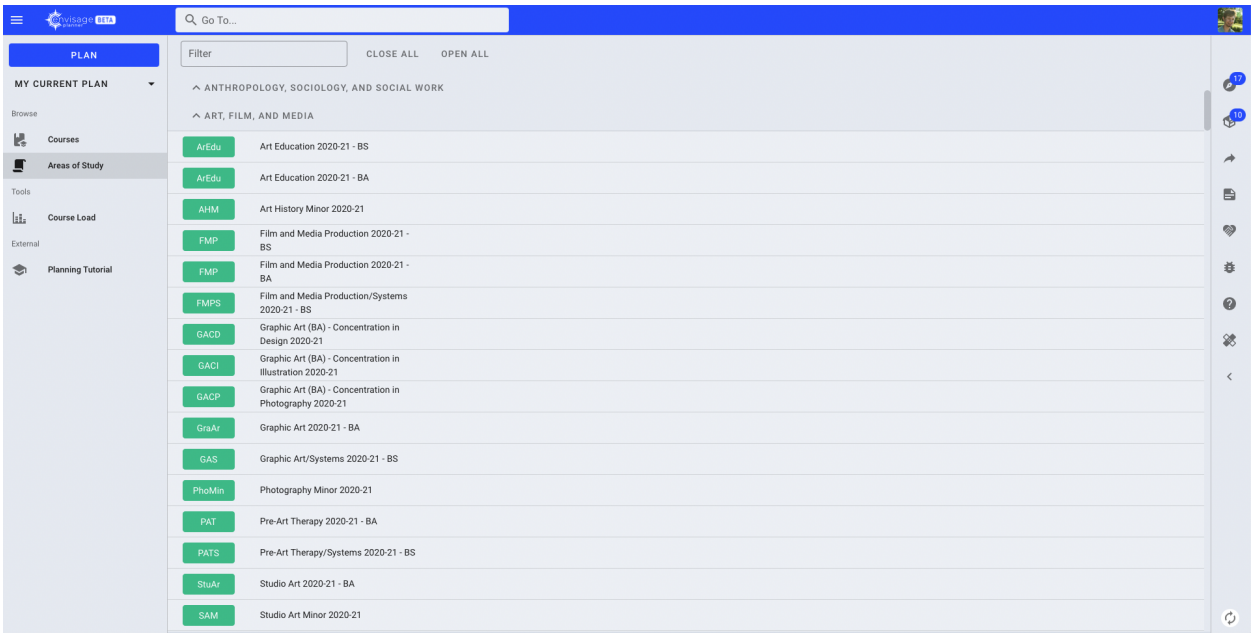


Any course can be clicked on to view catalog info, plan status, and see its offering pattern.

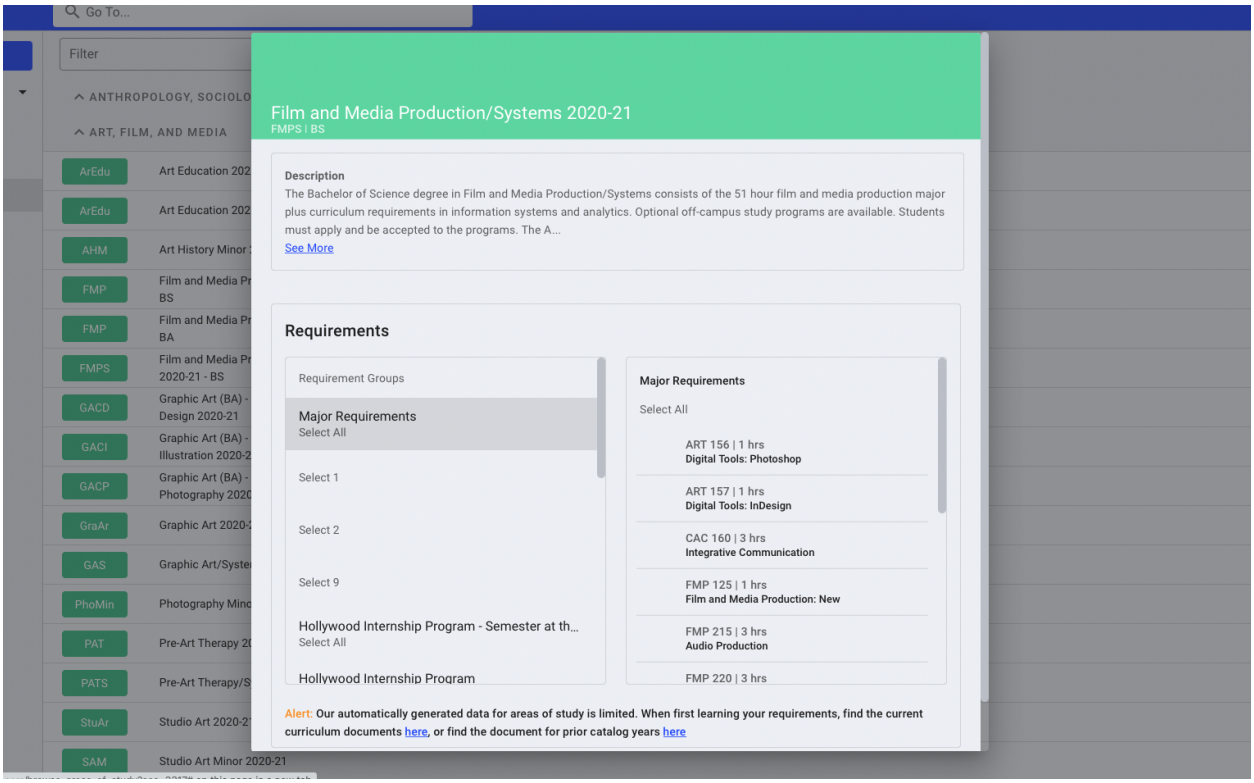


The semester tab allows students to plan the specific sections for each semester (even years in advance). They can download this schedule into their calendar as well.

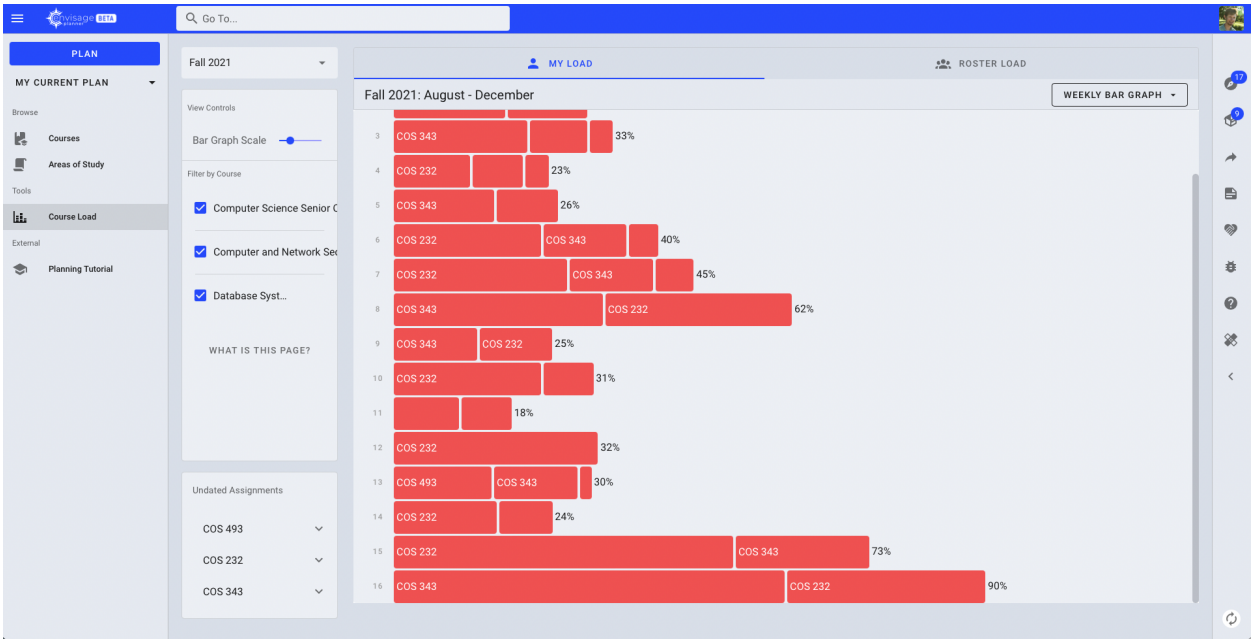
Students can browse courses by department and filter down to see only courses offered in a specific term



Students can browse areas of study by department and click on them to learn more or add to their plan



When they click on an area of study, a student gets a preview



Students can visualize their course load (imported from Canvas) either by day or week to anticipate hot spots

Roster Load Visualizes the aggregate load of a given roster to help professors identify which days/weeks have a lot going on for their class to have better due date placement.
