The readers of this paper will be
pleased to learn that there is at least
one dreaded disease that science has
been able to cure in all its stages and
that is catarrh. Catarrh being greatly
influenced by constitutional conditions
requires constitutional treatment. Hall's
Catarrh Medicine is taken internally and
acts thru the Blood on the Mucous Sur-
faces of the System thereby destroying
the foundation of the disease, giving the
patient strength by building up the con-
stitution and assisting nature in doing its
work. The proprietors have so much
faith in the curative powers of Hall's
Catarrh Medicine that they offer One
Hundred Dollars for any case that it fails
to cure. Send for list of testimonials.

The farmer who does not invest his
money in Liberty Bonds fails to realize
that unless the United States wins this
war, his wheat and corn are worth not
\$2.00 to \$2.20 a bushel, but just what a
tyrannical conqueror chooses to pay—and
the case of Belgium which may suggest a
parallel, he didn't pay anything. The
farmer faces a prospect of being forced to
toil his own soil, too, without financial
return, whether he likes it or not.

For Economy
A GLOBE RANGE

Users of this wonderful range are pleased first, by its appear-
ance—for it is known as the most beautiful range in America.

Next, they appreciate its cooking and baking results. They enjoy
the savory food that is so quickly and easily prepared.

Finally, they experience the sense of economy which follows its
use—for a GLOBE RANGE does save fuel.

These sterling qualities are due to years of study, combined with
expert range building skill of the Master Stove Builders of America.

With all—a GLOBE RANGE is made to sell at a price you can
afford to pay. Everything considered it is the best range investment
you can possibly make. Let us prove it to your satisfaction.

PETERSON'S OINTMENT BEST FOR ECZEMA

First Application Stops Itching of
Eczema, Salt Rheum and Piles.

"Live and let live is my motto," says Peterson. "Druggists all over America sell PETERSON'S OINTMENT for 25 cents a large box and I say to these druggists, if anyone buys my ointment for any of the diseases or ailments for which I recommend it and are not benefited give them their money back."

"I've got a safe full of thankful letters testifying to the mighty healing power of Peterson's Ointment for old and running sores, eczema, salt rheum, ulcers, sore nipples, broken breasts, itching scalp and skin, blind, bleeding and itching piles."

John Scott, 283 Virginia St., Buffalo, writes, "Peterson's Ointment is simply wonderful. It cured me of eczema and also piles, and did it so quickly that I was astonished." Adv.

HERMIT SCULPTOR IS FOUND

Spends Time Modeling Little Masterpieces Which He Promptly Destroys Upon Completion.

There has been discovered at Cape Scott, one of the most solitary points in Vancouver Island, by the chief engineer of the public works department of British Columbia, a sculptor who spends his time in modeling little masterpieces from lumps of clay and then destroying them, relates an exchange. He is A. F. Whittier, and he calls himself a "prospector." Living entirely alone, he has for the past two years been carrying out lonely investigations of mineral claims in his neighborhood. His sculptor's tools are of the simplest kind, and it is his habit to work with the same piece of clay, which weighs scarcely five pounds, but with that he has modeled scores of objects.

The government engineer found him just as he had completed a bust of the martyred British nurse, Edith Cavell. Mr. Whittier was about to destroy the work in order that he might use the clay for a miniature statue of his son, who was recently killed. He was, however, persuaded to part with the bust, which is to be auctioned in aid of the Red Cross funds.

Help to Save Nation's Food Supply

In this time of high cost of living, everybody should use all possible means to prevent waste and to help save food. No one means can be more effective than a vigorous campaign to exterminate rats which destroy over two hundred million dollars worth of foodstuffs annually. Keep garbage in rat-proof cans, stop up their holes, and above all exterminate them with Stearns' Paste, which can be bought for a few cents at any store. A two ounce box will usually rid a house or barn of every rat. It destroys mice, cockroaches and waterbugs as well. Adv.

Some Satisfaction.
At a ball given by Lord Derby in Canada, writes Douglas Sladen, I watched his A. D. C. taking an important politician, whom he should have known perfectly well, to introduce him to his (the politician's) own wife, a young and pretty woman, who considered herself one of the lions of Canadian society.

The situation struck me as a promising one, so I listened to hear what he would say.

"Mrs. Pm," he said, "may I introduce Mr. Um-um to you?"

She looked up at him with an amused smile, and he continued quite blissfully:

"He's a stupid old duffer, but I'll get him away from you as soon as I can."

A Big Plumber's Bill.
The party of tourists were watching Professor X as he examined the wrapped body of an ancient Egyptian. "Judging from the utensils about him," remarked the professor, "this mummy must have been an Egyptian plumber."

"Wouldn't it be interesting," said a romantic young lady "if we could bring him to life?"

"Interesting but a bit risky," returned Professor X. "Somebody might have to pay him for his time."—Boston Transcript.

It is the sheep killing dogs that put the "mutt" in mutton.

Perhaps before the war is over the popular slogan will be "Swat the spy."

Autocracy is as wise as serpents and as harmless as 42 centimeter guns.

If passing events do not make geography interesting the case is hopeless.

Horror! Here's another thing to worry about. There are no clothespins in China.

There are a few people in this country who cannot figure out that it takes money to run a war.

It is getting so now that a man can do almost as much with machinery as a woman can with hairpins.

One trouble with so much of our free speech is that the donors insist on giving it to all comers.

The song writers of the country are producing a great output of war songs. Why not fit these tunes to an army of street pianos and scare the enemy to death?

Nature's laws remain unchanged. A grade crossing won't give passage to a railroad train and an automobile at the same time.

Father needn't feel worried, even if trousers become the fashion for women. Mother won't be satisfied with the kind he wears.

Having made a good thing out of flag-price boosting, we presume that the cheerful speculators will soon take up khaki as a side line.

Last year America exported nearly \$100,000,000 worth of automobiles. "Made in America" will be the new favorite brand after the war.

Washington reports a shortage of one and two-dollar bills in some parts of the country—and it might add of fives, tens, twenties, etc., also.

Why wouldn't the women make excellent material for auto drivers at the front? A mother who has handled a baby buggy hasn't very much to learn.

A patriotic American has offered \$1,000 to the first American airman who drops a bomb on Berlin. The kaiser would also give \$1,000 for him dead or alive.

When a pretty girl announces her intention of desiring to become a Red Cross nurse it is even money whether she is truly patriotic or she wants a hero husband.

British naval officers say that the American destroyers are doing efficient work and teaching Britishers ways of accomplishing results of which they had not thought.

Having triumphed in the vegetable kingdom, the war gardener leans on his trusty hoe with the air of a conqueror and casts a speculative glance at the brooding hen.

American ambulance drivers have been awarded the French war cross for gallant conduct in danger. Yet some people seem to think an ambulance driver runs no risk.

A lot of small men with gruff voices are going to be placed at a disadvantage if that invention whereby telephone users can see the persons they are talking with is ever perfected.

Now that "conscientious objectors" may have work other than firing guns, that brings them right up in the line of danger, of course, they will be willing to go to war.

And maybe the young chaps said to be cultivating drug habits in the hope of evading conscription are the same who cultivated matrimony for that purpose.

We are now assured that the war will produce colonels enough to run the politics of the country for a full generation after the war. The country was beginning to run short of colonels.

The kaiser proposes to make an independent federal state of Alsace-Lorraine, and maybe he could be induced to grant autonomy to Texas, Arizona and the other "lost provinces of Mexico."

Everybody who owns an automobile—and the rest of mankind, perhaps in a lesser degree—will be glad to learn that the 1916 rubber crop of the Dutch East Indies showed an increase of 40 per cent.

This World Cannot Exist Half Despotism and Half Democracy

By Nicholas Murray Butler, President of Columbia University

One of the oldest and subtlest philosophies in the world teaches that the whole of history consists in the struggle between the principle of good and the principle of evil. It teaches that now one, now the other, is uppermost, but that as the good principle overcomes the evil, or as the evil principle overcomes the good, so mankind marches forward to freedom or it falls back into serfdom and slavery.

The great struggle between the good and the evil principle has taken, in this twentieth century, the form of a contest between two political and social principles which cannot live together in this world. And that is why this contest must be settled by force of arms.

If those two principles had anything in common, an adjustment between them might possibly be reached; but each principle absolutely excludes the other. As Abraham Lincoln said a generation ago, "This nation cannot exist half slave and half free," so it may be said today, "This world cannot exist half despotism and half democracy."

Democracy must in its way dispose of despotism or despotism will in its way overcome democracy. Therefore it is to no ordinary task that this nation goes forward. It is not a struggle to which one may be for a moment indifferent. It is the deepest and most tremendous conflict that all history records.

Would Life Be Tolerable if the Power of Prussianism Held World by Throat?

By Otto H. Kahn, Banker and Philanthropist

It is the purpose of a common determination to fight and to bear and to dare everything and never to cease nor rest until the accursed thing which has brought upon the world the unutterable calamity, the devil's visitation of this appalling war, is destroyed beyond all possibility of resurrection.

That accursed thing is not a nation, but an evil spirit, a spirit which has made the government possessed by it and executing its abhorrent and bloody bidding, an abomination in the sight of God and men.

Speaking as one born of German parents, I do not hesitate to state it as my deep conviction that the greatest service which men of German birth or antecedents can render to the country of their origin is to proclaim and to stand up for the great and fine ideals and national qualities and traditions which they inherited from their ancestors, and to set their faces like flint against the monstrous doctrines and acts of a rulership which have robbed them of the Germany which they loved and in which they took just pride, the Germany which had the good will, respect and admiration of the entire world.

I measure my words. They are borne out all too emphatically by the hideous eloquence of deeds which have appalled the conscience of the civilized world. They are borne out by numberless expressions, written and spoken, of German professors employed by the state to teach its youth.

The burden of that teaching is that might makes right, and that the German nation has been chosen to exercise morally, mentally and actually, the overlordship of the world and must and will accomplish that task and that destiny whatever the cost in bloodshed, misery and ruin.

Would life be tolerable if the power of Prussianism, run mad and murderous, held the world by the throat, if the primacy of the earth belonged to a government steeped in the doctrines of a barbarous past and supported by a ruling caste which preaches the deification of sheer might, which despises liberty, hates democracy and would destroy both if it could?

It is not for glory or for riches or for honor that we fight, but for liberty alone, which no good man loses but with his life.

Railroads' Handling of War Work Shows What Can Be Done by "Team Work"

By R. H. Ashton, President of Chicago & North Western Railroad

Every railroad man in the United States, from section man up to president, owes it to himself and his country to do everything in his power to help win the war.

At a meeting in Washington immediately after the declaration of war with Germany, the heads of the railways agreed voluntarily and unanimously to subordinate every other interest to helping to win the war. The railroads made this pledge to the government and the public and they have kept it, regardless of the individual interest of any road.

The English railroads are being operated on a similar plan, but under a guaranty by the government of the same net earnings that they made before the war. Our government was not asked for and has not given to the railways any guaranty of net earnings. The railroads did not get the advance in rates which they felt was absolutely necessary in order to render the service required by the government and the public.

Did the railroads sulk and grumble as a consequence? On the contrary, they redoubled their efforts to discharge the enormous responsibilities forced upon them by war conditions. Sacrificing individual interests, I believe the railroads have given the greatest exhibition of "team work" the world ever saw.

It is almost impossible to realize what an enormous task the railroads are wrestling with. The combined freight traffic of fourteen of the largest countries in the world in the year 1915 is just about equal to the increase alone in the freight traffic of our railroads in this calendar year—if the present rate is maintained—over that of the year 1915.

Even more remarkable is the fact that this gigantic volume of traffic is being transported with practically no more equipment than our railroads had at the beginning of the war, because the builders cannot furnish the equipment which was ordered, owing to the demands of the government for the materials which would go into cars and locomotives.

From the great majority of shippers and receivers of freight the railroads have received hearty co-operation, in the more prompt loading and unloading of cars, and more intensive loading, and I believe that when the war is won the railroads and their officers and employees will be given the credit they deserve by the nation.

Canada's Liberal Offer of Wheat Land to Settlers

is open to you—to every farmer or farmer's son who is anxious to establish for himself a happy home and prosperity. Canada's hearty invitation this year is more attractive than ever. Wheat is much higher but her fertile farm land just as cheap, and in the provinces of Manitoba, Saskatchewan and Alberta

180 Acre Homesteads Are Actually Free to Settlers and Other Land Sold at from \$15 to \$20 per Acre

The great demand for Canadian Wheat will keep up the price. Where a farmer can get near \$2 for wheat and 20 to 45 bushels to the acre he is bound to make money—that's what you can expect in Western Canada. Wonderful yields also of Oats, Barley and Flax. Mixed Farming in Western Canada is fully as profitable an industry as grain raising.

The excellent grasses, full of nutrition, are the only food required either for beef or dairy purposes. Good schools, churches, markets convenient, climate excellent. There is an unusual demand for farm labor to replace the many young men who have volunteered for the war. Prospects Excellent.
A friend dropped in to say hello the other day—he had been in the Blue Ridge region for a few weeks. He brought this story:
A young native, a widower of a year, called at the shack of the father of a numerous family, and after beating about the bush for a while, asked the parent for his daughter's hand.
"So ye want to get hitched with Sal?" said the old man. "I dunno about it. Yer fust wife didn't last ye long. What are yer prospects?"
"Fine!" asserted the suitor. "All the wimmen what sent their washin' to my first wife has promised to do the same by her successor, whoever she mout be. Oh, we'll git erlong all right!"

"The prime virtue of a good angler is patience. No man or boy ever developed into a successful fisherman who hadn't at least twice the patience of Job."
"There's a boy in Shawnee who is going to make a champion one of these days. I haw him fishing the other afternoon on the bank of a creek, and I said to him:
"What are you fishing for, son?"
"Snigs," said he.
"What are snigs?" said I.
"I dunno," said the boy. "I ain't never caught none yet."

LONG AND SHORT

MAN 7 FEET 4 MARRIES GIRL 4 FEET 7

Denver, Colo., Oct. 19.—The "long and short of it" aptly describe the marriage here of Carl Sandell, 7 feet 4 inches tall, to Miss Johanna Naehr, 4 feet 7 inches in height. The groom is a giant, weighing 290 pounds, while the dwarf bride moves the scale lever at about 95 pounds.

On Wednesday, Nov. 7th, the grand inspector of the Masonic lodge, will be here to inspect Gas City, Jonesboro and Upland lodges at one session. The meeting will occupy both afternoon and evening. Upland will exemplify the first degree, Jonesboro the second and Gas City the third degree. A supper will be served at 6 o'clock, by the ladies of the Eastern Star.—Gas City Journal.

Walter Penrod and family are visiting in Ohio this week.

G. C. Holloway, age 77, of Neoga, Ill., was visiting with Asbury Fleming last week. Mr. Holloway moved away from Upland just 50 years ago. And he stated that at that time Jacob Bugher had a cabin built and twenty acres of cleared land over which Upland is now built.

W. B. Teeter is now railroad mail clerk on the Wabash railroad between Ft. Wayne and St. Louis.

CHARLES BELLVILLE PERFECT'S KKAUT CUTTER

The Marion police force has a number whose inventive genius rivals—well, we were going to say Thomas A. Edison. Anyway, as a result of the activity of said wizard the "coppers" are preparing barrels of kraut to combat the high cost of living this winter.

Charles Bellville, one of the city's best, has arranged a kraut cutter which, according to the force is the best on the market. A rotary knife with four blades has been fitted on a sewing machine base. The blades are revolved by means of a belt which is carried over and around the large wheel of the machine. A slow turning of the latter imparts a rapid seining motion to the cutters where the embryonic kraut is applied. By means of a chute arrangement the shredded cabbage is conducted to a crock or jar beneath. Very simple, isn't it? Several of the men have used it, even the chief himself, and all testify to its serviceability.

Modesty alone prevents the inventor from obtaining a patent on the machine, even the assistance has been volunteered by different members of the fo.—Marion Chronicle.

Miss Mary Draper of Fairmount has honor of being the first woman of that place to be nominated as a candidate for a town office. She was placed on the ticket by democrats as a candidate for Town Clerk and Treasurer.

BOX SUPPER

Ruby Beuoy is making arrangements for a novel box supper to be held at the Union School House next Friday night. Girls bringing boxes will be masked and many other novel features will provide entertainment for the evening.

Two More Enlist

Basil Osborn and Mark McKee, students at Tay. or University enlisted Saturday in the Second Amb. Co., located at Hattiesburg, Miss. There is already a number of former Taylor students in this company.

Pledge Card for United States Food Administration

If You Have Already Signed, Pass This on to a Friend

TO THE FOOD ADMINISTRATOR:

I am glad to join you in the service of food conservation for our nation and I hereby accept membership in the United States Food Administration, pledging myself to carry out the directions and advice of the Food Administrator in my home, in so far as my circumstances permit.

Name _____

Street _____

City _____

State _____

There are no fees or dues to be paid. The Food Administration wishes to have as members all of those actually handling food in the home.

Anyone may have the Home Card of Instruction, but only those signing pledges are entitled to the Membership Window Card, which will be delivered upon receipt of the signed pledge

Cut this out carefully and send it to the Federal Food Administrator, Room 20, State House, Indianapolis, Indiana. Do not send it to Washington. Send it to Indianapolis.

This is the same as the pledge card, and just as official. Do not sign this if you have signed a pledge card. Do not sign a pledge card if you sign this.

When you send this in, with your name and address, you will be sent free: (1) a handsome three-colored window membership card to show that you are trying to

live up to the suggestions of the food administration at your house; (2) an interesting and valuable book of suggestions and recipes, entitled "Ten Lessons on Food Conservation"; (3) a wall card to hang in your kitchen, entitled "The Kitchen War Creed," to show you how you can help win the war in your own kitchen if you wish.

And the food administration will mail you other helpful things later, perhaps.

To sign this card is a patriotic privilege. It will make you a leader in your

neighborhood in the task of saving certain foods for our soldiers and our allies.

Sign this card. Show Mr. Hoover you are with him. Hang out your window membership card when it comes. Read the interesting literature that will be sent you.

The government is not going to ask for your canned goods or for anything else, because you sign this card. You incur no obligations. You merely promise to study the problem of "food saving to win the war" and do what you can to help.

PERSONALS

The following speech has been made by Prof. W. E. Lagerquist of the Northwestern University, as an appeal to the farmer:

"Do you realize Mr. Farmer that the farmers, as a class, purchased the smallest amount of the first issue of liberty bonds, though they have been among those that have profited most financially by the present war in Europe? Do you further realize that no class will be more vitally affected in the future by the failure or success of this war? If our president had not persisted in the right of our ships to carry your cargoes unmolested to the Allies he could have avoided war. But not only would the greatest of all rights, the safety of humanity on the highest seas have been surrendered but our just rights as a neutral in the shipment of goods to all nations have been surrendered.

If the United States had bowed to the German Autocracy's denial of our free rights to the high seas, thousands of farmers would have faced financial ruin and many would have suffered want. Prices of farm products would not only have fallen as far below normal level as they have now soared above and thousands of acres of land would have been forced into idleness.

"Hundreds of the men who are shouldering a musket as a private for our Country are also making large sacrifices in salaries. For them it is an added contribution. And with the low wage of \$360 a year for a private it does not take much of a sacrifice before he has given up a \$1000 income. For this he never receives a single penny. And after months of privation in trench-warfare he may return a helpless cripple for life. - You buy a \$1000 bond - you have the safest investment money can buy - your interest is paid and your \$1000 is returned when due.

"Are you not then a Slacker in the most objectionable sense of the term if you do not offer your support in the purchase of a Liberty Bond that food, clothing, munition, equipment and ships may be provided for fighting and the necessary support of their families."

Robt. Waterman, the Upland marshal, states that he will arrest anybody doing damage while having their Hallowe'en fun, and that parents should advise their children

Herbert Bowen writes that Camp Shelby is leading all camps in the Second Liberty Loan subscriptions. The boys have taken \$1,250,000. Mr. Bowen states that he has taken three bonds.

Mass Meeting

Next Monday night every mother and father, sister and brother in Upland and vicinity are urged to attend a mass meeting and hear some snappy three minute talks concerning Food Conservation. The meeting is held as a forerunner of "Food Conservation Week." Every interest in Upland is to be represented. It is understood that a large parade will take place prior to the meeting. Watch for window cards.

SHOW YOUR FAITH IN AMERICA

By THOMAS R. MARSHALL,
Vice President of the United States.

If we are standing in statecraft for the same things for which the Nazarene stood in religion, then we ought to be able to glean something from the discussion of his followers. Peter and Paul grew acrimonious over the relative merits of faith and works and the discussion ended with the somewhat caustic statement, "Show me your faith without your works, and I will show you my faith by my works."

We have been running up the American Flag at all the school houses in America; we have been rising with solemn countenances whenever the "Star-Spangled Banner" is played, and we have proclaimed to the world our never-ending allegiance to those great principles of democracy upon which the republic was founded and is now supposed to rest. Now we have reached the point where our faith is being put to the touchstone of our works and we are soon to find out whether this love which we profess for our institutions, our country, and our Flag, is but a sounding brass and a tinkling cymbal or whether it is a great and vital inspiration of individual and national life.

Our young men, with a devotion unexampled in the history of the world, are laying aside all the hopes of future years and are going gladly "somewhere in France" to offer, if need be, the last drop of blood in their veins as a free libation upon the altar of constitutional liberty. They cannot go half-clad, half-fed, unequipped or unassured that they will be properly looked after if disabled.

We did not prepare. We thought there was no danger. And in one year there came upon us an outlay of extraordinary expense, which might have been prevented had we exercised foresight and courage, little by little, to hold post-mortems. The past is the dead and eternal past. This war must be fought, and it must be financed in order to be fought.

My objection to Carnegie libraries is not directed at Carnegie nor at libraries; it springs from a deep-rooted feeling that we do not take real interest in anything for which we do not make some sacrifice.

I do not, therefore, want this war to be financed by those who are easily able to do so financially. I want every man, woman and child in America, who has been waving the Flag, singing the "Star-Spangled Banner," and bragging about the glories of democracy, to prove now by their works that they have a genuine faith in the American republic. That proof demands of us all that we take enough of the war obligations of this government to make us feel some sort of sacrifice for the cause in which each one of us professes to believe and does believe.

MASSES SHOULD SUPPORT LOAN

By HARRY PRATT JUDSON,
President, University of Chicago.

I trust that this loan will meet a very wide subscription in small amounts. One of the fundamental elements in the stability of the financial condition of the French Republic is the fact that the national loans are taken up in small amounts by persons who are able in that way to put away their savings with a sense of entire security. Such a policy adopted here in the first place would make it possible for government loans to be placed rapidly and effectively. In the second place, it would be a distinct encouragement to thrift, providing a ready and safe investment for small savings. In the next place, it stabilizes the entire condition of the republic. Every investor in the national securities is thereby a financial partner in the national prosperity. I believe that few things, therefore, could be more effective for the benefit of the nation than the rapid placing of this second Liberty loan among the masses of the people in small amounts.

Student in Bad

Israel Cechanowitz, a Russian Jew, got in bad with the faculty and students of Taylor University, by an alleged remark, that "If I was to fight I would fight for Germany."

Prof. Shaw was discussing as a subject "Ingratitude," before the chapel assembly Tuesday morning and alleged remark as coming from a student. Dean Ayers at this part of the speech, shouted "Send Him Back" and Prof. Wray cried "Shame on Him." Other remarks were made and Israel Cechanowitz left the auditorium. The occurrence reached the ears of the County Sheriff in the afternoon and John Ruggles and Bert Fowler, deputy sheriffs, accompanied by E. H. Graves and Robert Waterman made an investigation of the affair. The lack of evidence did not warrant arrest.

Notice Women

Every woman has a chance to do her "bit" in the kitchen. Sign a Hoover Pledge Card and receive in your mail box "Ten Lessons on Food Conversation," from the government and other literature from time to time.

"If you will use corn bread part of the time instead of wheat bread it will help Uncle Sam win the war."

"This sounds far-fetched, doesn't it? But it is every word true.

"And there are other little things like this that experts have figured out that you can do, which will help the United win the war against Germany. They are all little things to you, but BIG things if enough people do them.

"For instance, there is this matter of corn bread. If every family in this country could get along without wheat one day each week; it would amount to a saving of from 80,000,000 to 90,000,000 bushels a year for the whole country.

"See what it means if YOU save a little?"

"Why save wheat? Well, because our allies will starve if we don't send them many shiploads of wheat this winter. Why not send them corn? Because corn spoils on the way across the ocean. Because it takes more room in ships. Because in Europe they don't know how to bake corn bread. And for other reasons.

"Now, there are a lot of interesting facts like this about things you can do to help lick Germany - in your own kitchen. "The government wants you to agree to try to learn all you can about things you can do in your kitchen to HELP WIN THE WAR. That is why it asks you to sign the food pledge.

"It wants to send you information. It will not take your canned goods, as some folks have rumored. It will TAKE NOTHING. IT simply wants to send you suggestions.

"Send in the pledge card and start out now to learn all you can about HOW FOOD CAN WIN THE WAR."

AMERICAN WOMEN WILL BUY BONDS

By MARTHA KIMBALL WOOD,
Member Women's Liberty Loan
Committee.

Never before in history, save in the mind of Plato in his ideal republic, has the economic or financial aid of women been sought by the government of a nation. Since Susan B. Anthony sounded the reveille of equal suffrage, women the world over have been clamoring for their rights. And now that the government asks our aid, in no way will women gain suffrage more surely than through responding to every call the government makes upon them.

Washington has asked us to conserve foodstuffs and other necessities of life; to support the Red Cross; to register women for war service; to protect the interest of women and children in industry; to relieve the suffering of our allies in this great entente; yet at the same time to curtail in no way our aid to home charities. These requests prove that while in some states suffrage is withheld, the government feels that we are entirely capable of doing any work asked of us; and now the supreme test, from a man's standpoint, is placed in our hands to be of financial aid to the government of the United States.

These thoughts have been in the mind of every thinking woman and are reasons why every woman should support the Liberty Loan. However, I do not believe them to be the supreme reasons why they will support the loan.

Every real woman is potentially a mother. In our new National Army there are 687,000 "first call" men; and this means nearly a million mothers anxious that the war should cease before their sons are called upon to face the sacrifice required of the boys of other nations. And there are countless other mothers, without sons to offer, but knowing that unless our troops are successful and the war speedily closed, their daughters may have to bear the shame under which the girls of invaded Europe are crushed. Will these mothers feel that they can refuse to support this second Liberty Loan?

No real woman with mother instinct, who has read of the flower of European youth—clean and sweet and strong—enduring the filth of the trenches; facing malignant ruthlessness of the enemy's onslaughts; returning maimed, blinded, and eaten with disease—no woman picturing even faintly the sickening horror which brutal lust has wrought upon the girls of France, Belgium and Serbia—will hesitate for one moment in doing anything to cut short the duration of this war. For the protection of their sons and daughters, American women will buy Liberty bonds.

MUST OVERWHELM THE KAISER

By RUTH LAW,
Famous Aviatrix.

The government has asked us for another great Liberty Loan. Thousands of American men and women are wondering what they can do to help bring peace to the distracted world. The word war is beginning to bring horror to our hearts, as it has brought horror to the hearts of men and women of Europe ever since 1914. Our boys are now in that dreadful cauldron of death and suffering, the battlefield of France. Many a mother has sent her only son away to the land she has never seen to fight for the cause of Liberty and Freedom. Other mothers have given several sons for this noble cause.

This is the moment of opportunity. Grasp it before it is too late. Subscribe to the new Liberty Loan, the loan that is to help bring back our sons, brothers and fathers from a war that was forced upon us by the German Kaiser. We must show the enemy of democracy and liberty that every last American is standing back of Uncle Sam with every penny that we possess. Let us show the Germans that the great masses of the American people are individually working for peace by subscribing to the new Liberty Loan.

Particularly, men and women of small means, this is your opportunity to do your bit for Uncle Sam. We will overwhelm the Kaiser's forces with money, men and airplanes and drive them forever from the fields of battle.

BUY YOUR BOND FOR LIBERTY TODAY.

BRYAN BOOSTS LIBERTY SALE.

Every American's paramount duty is to stand behind the president and congress and support "anything and everything our government does in this war." William Jennings Bryan told members of the New York Advertising club.

"The furnishing of money," said Mr. Bryan, "is one of the most important ways of supporting the government. Before we entered the war it was a matter of opinion and discussion, but it is no longer a question of opinion. It is time for action now."

He declared he would make no complaint against high taxes as long as there are men giving their lives for the country.

I shall not put the dollar above the man nor property above blood," he said.

Submarine Improvements.

Since April 1 German submarines have been equipped with four new devices which increase their destructiveness, and render it more difficult for chasers to discover their whereabouts. Formerly the U-boats, to remain in one spot, had to come to the surface, or anchor themselves to the bottom; but four small pumps are now used which enable them to remain stationary while submerged. This not only conserves fuel, but prevents its enemies from hearing the throb of the submarine's propellers. Telescopic periscopes give further assistance to the submarine in concealing its position. A mixture of oxygen and strained gas is now used in the engines, and the exhaust is washed free of smoke and broken into small bubbles, which do not leave a wake. Finally, new listening devices enable it to hear and judge the size of ships at a considerable distance.—Exchange.

An Exaggeration.

"Crossing the ocean nowadays is a serious proposition," said J. P. Morgan, who crosses the ocean continually, "but it isn't, after all, as terrible a thing as certain exaggerations would make you believe."

"Anything to declare?" a customs officer said to a man who had just crossed the ocean.

"Yes," said the man. "I declare that I'm one mass of black and blue bruises from jolting and bumping for six days over a regular corduroy road of German mines and submarines."

Temperance Notes

"WHY KILL THE GOOSE?"

A cartoon issued by the publicity department of the liquor traffickers is entitled, "Why Kill the Goose?" says Prof. John A. Nichols in the Union Signal. It represents a fat goose, labelled, "Internal Revenue." Its three eggs are very conspicuous, but an ax marked, "Prohibition," is in dangerous proximity to its neck. Well, there are many reasons why the goose should be killed. In the first place, the cost of feeding it is too great. What would you think of a farmer that kept a flock of geese at a cost ten times greater than the amount realized from the eggs produced? If, when his attention had been called to the matter, he tried to defend his position by telling you how much he obtained from the sale of the eggs, and spoke of it as a profitable transaction, you would at once consider him a fit subject for some kind of mental treatment. For many years Uncle Sam has been that kind of farmer. But skillful mental treatment, in the form of scientific and economic facts, having been administered to him for some time, he is beginning to show signs of sanity, and we hope ere long this expensive and dangerous goose will no longer find pasture on Uncle Sam's farm.

PROHIBITION PROHIBITING.

From The State, daily newspaper of Columbia, in dry South Carolina, comes this testimony: "For weeks the city has been thronged, especially at night, with workmen, many of them white and hundreds of them negroes, but there is little or no evidence of disorder and practically none of drunkenness in the streets."

"With the country engaged in war and with the nerves of the people at high tension, with money abundant, with soldiers better paid than ever before, with wages high and with an immense transient population, the Columbia of 1917 presents such a contrast to the Columbia of the Spanish-American war that those who remember that time could hardly believe it to be possible if they did not see it before their eyes."

"What the future of the whisky traffic shall be it is not worth while to discuss, but it is the simple truth that prohibition is prohibiting and the old argument to the contrary, so long relied on by the whisky dealers, is, for the present at least, discredited. Whoever says that prohibition will not prohibit is heard with derision."

POT CALLS KETTLE BLACK.

The Brewer and Malter: The reason why a beer saloon is a success is because a man can drink a large quantity of beer without getting drunk. He can stick around and talk or play cards for the greater part of an evening and go home sober. He cannot do that and drink whisky. That is why a whisky saloon is not a success.

Midas Criterion (champion of distillers):

Any man who has had any experience in drinking knows it is possible to get exactly as drunk on beer as on whisky. If we were to decide between the merits of the beer drunk and the whisky drunk, we would say candidly that the mushiest and sloppiest kind of a drunk in the world is the beer drunk.

PIANO SALES INCREASE.

According to traveling representatives of Eastern piano manufacturing concerns who have recently been in San Francisco, says the Musical Times, piano sales in the western states that have joined the dry ranks show marked increase. They report that business in Colorado, Arizona, Washington and Oregon was never better and that retailers, many of whom opposed prohibition, are now heartily in favor of the change. More pianos are being sold, it is asserted, initial payments are larger, collections are much better and fewer instruments are returned.

IN THE CITY OF SEATTLE.

The prohibitory law of the state of Washington went into effect January 1, 1916. Of buildings occupied the last day of 1915 by 211 saloons, ten are now occupied by drug stores, haberdasheries, women's specialty shops and the like; 56 by cigar, candy and soft drink places; 14 by groceries and meat markets; six by confectionery stores; 19 by cafes, bakeries and the like; 20 vacant for repairs, or because building is too poor for business.

A GOOD RULE.

The law for the soldier and the law for me

Are not the same, but they ought to be. To him it says: "No whisky or beer," Who'll say the same while war is here?

GRAPES FOR HOGS.

The California College of Agriculture has found that it is more profitable to feed grapes, dried, to hogs and cattle than to manufacture them into wine. This is very disturbing to the wine trust.

DIFFERENT NOW.

In the Spanish war supply trains were sidetracked to let the product of Milwaukee pass through to army camps. We have moved a long way on the road to national sobriety since then.

What Well Dressed Women Will Wear

The Schoolgirl's Coat.

The schoolgirl's coat is an important consideration which cannot be deferred now, although the outfitting of the "flapper" is about the most difficult of a mother's problems. This young person is apt to have ideas of her own coupled with more determination than her limited experience warrants. When she is past sixteen the task of clothing her becomingly grows easier every day. Before that time it is best to select things designed for "the awkward age" by those who specialize in this line of work. They are artists that know how to make the most angular of younglings look attractive.

The schoolgirl's coat shown in the picture is of heavy wool velour in brown. It is a straight-line model with somewhat narrow shoulders, long waist line, narrow belt and ample, convertible collar. All of these good points will commend it as up-to-date; a chic example of the mode in coats. Its collar and actual pockets reflect the styles for grown-ups and it is of the same soft and comfortable material that is used for the most mature wearers. This is an item that will please the "flapper."

Some models, in heavy wool velours and other coatings, are banded with fur fabrics or the short-haired furs. For all-round wear the plain cloth model is most apt to please the discriminating mother and in the long run will force its good points on its youthful and impressionable wearer. She has to be educated in the selection of clothes as in everything else. It is important to dictate her choice in them sometimes as it is to choose the right books and the right music for her.

Breakfast Coats Made Their Debut.

And now a new luster is to be added to the wardrobe of women, for the "breakfast coat" has made its debut. The holidays are always preceded by pretty, gay conceits in breakfast jackets and this year the breakfast coat will present another allurement for the Christmas shopper. It is an enticing garment made of light colored taffeta; a more or less straight coat, open down the front and reaching almost to the bottom of the petticoat.

The breakfast coat is an unpretentious but very pretty affair, easy to make and simply trimmed. Ruffles and ruchings of silk, like the coat, take the place of lace for finishing collar and sleeves. Narrow girdles are also made of the silk. By keeping to simplicity in trimming and in design this new claimant for favor may be made up in gay colors and still deserve to be called a coat.

The breakfast coat appears in company with fascinating new caps and head-bands that take the place of caps. Ribbons and laces, little hand-made flowers of chiffon or satin and small, fancy braids are used for these bands. Sometimes a wide ribbon, with narrow field of lace on each edge, headed with bands of the tiniest flowers, is fastened at the ends with snap fasteners. Other bands are made of wider lace and narrower ribbon, like that one shown in the picture. The last word in headresses for boudoir or breakfast wear is a Chinese "coolie" hat made of satin ribbon and lace. It is rather difficult to make and accord-

ly high in price, but the breakfast coat is very moderately priced and to see it is to love it.

Charm of Crepes.

There is a prediction that crepes of many sorts will be decidedly fashionable next year. And for that we are thankful, says a fashion writer. We have all learned of the charm of crepes of various sorts in the last few seasons, when georgette and other crepe fabrics have been in such wide vogue. Perhaps one of the chief charms about crepe is that it clings and falls in such soft and attractive folds and lines. Moreover, it is eminently practical, for it does not show wrinkles.

Shirring by Machine.

An easy and quick way to make shirring on a sewing machine is to loosen the tension to make the thread draw easily, lengthen the stitch and sew across your material as many times as you desire rows of shirring. Then pull the under thread tighter and you will have as even shirring as if done by hand, and it will wear much better.

Flowered Tea Coats.

Charming tea coats are of flowered mousseline de soie, with wide silts at the waist, through which strands of silken heads are passed.

BROKEN DOWN IN HEALTH

Woman Tells How \$5 Worth of Pinkham's Compound Made Her Well.

Lima, Ohio.—"I was all broken down in health from a displacement. One of my lady friends came to see me and she advised me to commence taking Lydia E. Pinkham's Vegetable Compound and to use Lydia E. Pinkham's Sanative Wash. I began taking your remedies and took \$5.00 worth and in two months was a well woman after three doctors said I never would stand up straight again. I was a mid-wife for seven years and I recommended the Vegetable Compound to every woman to take before birth and afterwards, and they all got along so nicely that it surely is a godsend to suffering women. If women wish to write to me I will be delighted to answer them."
—Mrs. JENNIE MOYER, 342 E. North St., Lima, Ohio.

Women who suffer from displacements, weakness, irregularities, nervousness, backache, or bearing-down pains, need the tonic properties of the roots and herbs contained in Lydia E. Pinkham's Vegetable Compound.

ADAM SPRUNG FIRST JOKE

Asked Eve if She Expected an Ichthyosaurus, When She Objected to Spider on Rose.

We believe that in the Garden of Eden, Adam gave Eve a rose in exchange for a kiss. And she shuddered and said, "Ugh! There's a spider on the rose!" and he answered, "Well, what do you expect for one stinging little kiss—an ichthyosaurus?"

We believe that to be the oldest joke in the world—older than the goat, the mother-in-law, or any that are supposed to be included in the Original Seven. In varying forms one finds it in the Talmud, in Plautus, in Aesop, in Rabelais, in Joe Miller, in all the almanacs and comic papers.

When we were a boy, it was told in a minstrel show, thus: A man buys a suit of clothes at a second-hand store. He comes back and complains that the coat is inhabited by unpleasant insects. And the dealer says, "Well, what do you expect for \$5—humming birds?"

Vaudeville knows it in this form: Tenant—"Look here, you'll have to make some repairs in this house. The cellar is full of water." Landlord—"Well, what do you expect for \$15 a month—champagne?"

And just last week we ran across our old friend again in a weekly comic paper. This time a passenger on a street car calls down the conductor for not calling the names of the streets distinctly. And the conductor replies, "Well, what do you expect for \$14 a week—a tenor solo?"

Lastly—a few days ago, we ran a version of the old thing in this column. We cut its hair, trimmed its whiskers, and fitted it with a new suit, but we could not disguise it completely. When you run across it in any of its costumes, send us a clipping, will you? We are making a collection of that joke.

JIM DALE.

By ELLIS PARKER BUTLER.
Young Jimmy Dale, across our street,
Is just a gawky lad,
He grew so fast, the doctors said,
His heart was mighty bad.

They wouldn't let him do much work,
Or any hearty play,
But, just the same, they drafted Jim,
And Jim has gone away.

Jim was a sort of great, big kid,
And fooling all the while;
So, when they ordered him to camp,
He went there with a smile.

Jim Dale is in the army now,
Lank legs, bum heart and all,
To fight like other drafted men
That got the country's call.

God, yes! Jim's heart may drop him dead
Or he may live to be
Shot all to pieces "over there"—
What odds to you or me?

By thunder! It's these odds to you:
If kids like Jim can go,
With smiles, to fight our wars for us,
We can put up the dough!

If we can buy a bond or two,
And don't, while Jim, poor cuss,
Goes smiling off to death or wounds—
Then hell's too good for us!

AUTOMOBILISTS, ATTENTION!

Every motorist in the United States is expected to paste on the wind shield of his machine one of the Liberty loan posters provided by the government. The publicity department of the Liberty Loan executive committee of the Seventh Federal Reserve district has sent out such a poster to every registered owner of an automobile in this district.

There is no excuse for any automobile to appear in public without one of these posters pasted on the wind shield.

Do your share, Mr. Motorist, in aiding the government to float this bond issue and win the war.

Shall we buy Liberty bonds, or pay indemnities to the Kaiser? We've got to do one or the other. Which will you choose?

ARMY CALLS FOR YOU

Have you a relative in the army or navy?

Every one of the thousands of men called to the defense of the United States in this war against Germany must be taken care of by the government—furnished with suitable clothing, arms, etc.

What have you done to help furnish equipment for your relative? It is your money that must do it, for the government is dependent upon the people for its support. What is not freely loaned at good rates of interest must be secured by taxation, with no return to you.

Here are some of the things your money can do for the men in the army and navy:

A \$50 bond will supply four months' sustenance in the field for one man.

A \$100 bond will supply 200 pounds of smokeless powder.

A \$200 bond will supply complete uniform and outfit for four navy men.

A \$500 bond will supply 180 gas masks.

A \$1,000 bond will supply gasoline enough to drive a submarine 2,000 miles.

A \$2,000 bond will supply 520 13-pound shells to destroy submarines.

Will you buy a bond of the second Liberty loan and help win the war?

WAR WILL BE WON BY LAST DOLLAR

By THOMAS H. BARRY,
Major General U. S. Army, Commanding at Camp Grant, Rockford, Illinois.

The United States is now engaged in a GREAT WAR.

It is no ordinary war. It is the culmination of a struggle centuries old between two forms of government opposed to each other—Autocracy and Democracy.

Under Autocracy the government dictates to its people.

Under Democracy the people dictate to their government.

Under the one the people are servants of the government.

Under the other the government is the servant of the people.

The government of the United States is a great democracy. The central thought of its fundamental law is HUMAN LIBERTY. It was established by our forefathers and bequeathed to us. For nearly a century and a half we have lived under it in the fullest measure of human liberty that any people have ever enjoyed.

We are at WAR to preserve the principle of Democracy.

Upon VICTORY depends whether we shall continue to enjoy our liberties or whether they shall be curtailed or terminated by Autocratic Will.

If there be a man or woman living under the Stars and Stripes who has enjoyed the privileges that our Flag symbolizes, it is his or her duty, to ancestors and progeny, liberally to contribute to Victory.

Munitions! Munitions!

To achieve Victory, the government must have MIGHT and MUNITIONS.

Its MIGHT is in its young men. It takes money to get MUNITIONS. In response to the call for Might the young men have come forward unflinchingly—but they are useless without Munitions.

The Government now calls for money.

No man or woman who has shared in the benefits of Liberty and Freedom—guaranteed by our government and which are now assailed—can withhold their means without falling in their duty to their government and to the men who have gallantly responded to its call. To withhold money will discourage our armies and give comfort to our enemy.

To provide money the government is issuing bonds, popularly known as LIBERTY BONDS in amounts so small that they are within reach of all.

JUST AS THERE IS A LAST STRAW THAT BREAKS THE CAMEL'S BACK, SO THERE IS A LAST DOLLAR THAT WILL WIN THIS WAR.

I therefore urge everyone who can spare that Last Dollar to place it at the disposal of the government with the satisfaction and thought that it may be that last dollar that will win the War and preserve the wives, mothers and sweethearts from the indignities in the next generation which those of Belgium are suffering now.

Every community, no matter how small or isolated, is expected by the United States government to stage some kind of a demonstration in the interest of the Liberty Loan. Patriotic mass meetings are finding much favor in almost all parts of the nation and entertainment "gentuses" are putting on many attractive "side shows" in connection with them. An abundance of patriotic music is provided at all the meetings.

These gentlemen are all representative citizens, and have been found on the right side of all questions having to do with the moral welfare of the community. So far the women have a right to vote, and this fact has the politicians guessing. The Monitor feels as does the Van Buren News Eagle who had the following to say about the coming election in their paper last week.

It is the duty of every citizen to keep sweet throughout the campaign. It is folly to engender a spirit of antagonism and hatred that leads to misunderstandings and enmity between citizens of the town, with the final result of injury to all.

We do not expect the affairs of the town to go the denunciation bow wows whoever is elected. Certainly you have a right to your opinion and should have one. You should have enough interest in the town to have a preference for candidates, but it is a mistake to foster the creation of a spirit that will lead to disastrous results to the town in general.

Routes Change

Rural mail routes all over Grant County are being changed, and the following change for the routes here were received from the Postoffice Dept. at Washington this week, to become effective Nov. 1st.

Route No. 1 from Upland, Alvin Ginn, carrier, will go through Matthews and pick up mail at the Matthews postoffice for distribution, the only route Matthews had has been discontinued and the Upland and Fairmount carriers will cover that territory. The mileage of each carrier has been increased, and no doubt several carriers throughout the County have lost their jobs through the change. The change is being carried out all over the United States just as fast as the department can handle the work. By the following the changes can be noticed.
