Challenge of the Decade

What supreme issues face Christians in the Eighties?

"An expanded awareness of God can help us conquer our fears and face the eighties with a sense of joyous expectation."

—Jessie R. Rousselow

When I graduated from college in the early sixties one of the popular Christian books was J. B. Phillips' Your God Is Too Small. The thesis of this book is that Christians have a tendency to create images or projections of God which have the effect of scaling Divinity down to human size. According to Phillips, it is not uncommon for God to be pictured as a kindly grandfather seated in a rocking chair or as a benevolent Santa Claus figure who dispenses gifts to good children. This tendency to view God through such images has a detrimental effect on our faith because it leaves us with the impression that God can be contained and controlled by human beings.

The specific images of God identified by Phillips may have changed over the last two decades, but the impulse to reduce God to a containable level has persisted in evangelical thought. The trouble with viewing God as "best friend" or even "father figure" is that these images are incomplete and reductionistic and, therefore, inadequate when Christians face the real and potentially terrifying changes which characterize the last quarter of the twentieth century. We all know that friends and fathers provide a comforting presence in our lives, but we also know that this presence is limited in its ability to control external factors which impinge on us.

It seems to me that if evangelical Christianity is to fulfill its mission in the world during the next decade, this
tendency to reduce God to a manageable image will have to be resisted. Instead, we need to cultivate an expanded vision of Divinity whose mystery is finally unfathomable, whose majesty is overwhelming, and whose power is unlimited. Such a God has the ability to enable us to face courageously and creatively the realities of our world including the seemingly unsolvable problems of diminishing resources, world hunger, economic instability, and political and social unrest. This God is also big enough to accommodate the burgeoning scientific and intellectual revolutions which seem so threatening. Personally, institutionally, and culturally an expanded awareness of God can help us conquer our fears and face the eighties with a sense of joyous expectation.

"Should we fail to supply Biblical truth to our problems, the rising flood-waters of chaos will engulf us all."

—Mark Cosgrove

The most pressing challenge to Christians in the 1980s will be the need to articulate and defend an applied Christianity that can meet the needs of a world experiencing a kaleidoscope of change. This decade's headlines will flash by like blurred memories announcing startling scientific advances, diluted morality, global economic and political chaos, and a rise in emotional illness, family disintegration, and criminal violence. To just say "Christ is the answer" will not be sufficient in our increasingly secular age.

Christians must not be trapped into compartmentalizing their faith in the face of enormous problems by allowing their Biblical beliefs to affect only their Sunday worship. Christian education, whether in the pulpit or in the Christian college, must go beyond learning Biblical history and translating Greek words. In the next

Seven faculty members sound their convictions.

Photos by Doug Kramer '80
ten years we must develop an applied Christianity that prepares Christians to voice and defend Christian approaches to ethics, economics, social concern, mental health, criminal justice, political action, and many more.

To this end we need to require of our Christian educational system the teaching of the Christian world view and its application to the challenges of the '80s. We should consider founding new Christian graduate institutions which would prepare students with post-graduate training to enter the "secular" professions as salt and light. Christian graduate schools would be a stimulant to quality Christian scholarship and publication, which would serve to educate both scholars and lay persons, Christians and non-Christians.

However, a renewed emphasis on Christian education will be needed at a time when college-age enrollments are at an all-time low, and inflation-linked college expenses are on the increase. Therefore, though the cost, effort, and risk of Christian education will be tremendous in the 1980s, the cost of failing in this task is incalculable. Should we fail to apply Biblical truth to our problems, the rising floodwaters of chaos and unhappiness will engulf us all.  

---

"He demands total commitment, yet today, 'sacrifice' is defined as a percentage of our excess."

—Richard Squires

"In spite of their belief in Christ and their full acceptance of biblical authority, evangelicals display no clear understanding of Christ's deity...the barber on the street in ancient Constantinople had a sharper understanding of the deity of Christ than does the average evangelical today." (1979 Gallup Poll, Christianity Today, 21 Dec. 1979.)

George Gallup's conclusion raises a disturbing question: have we been successful at preaching Christianity without demanding a real confrontation with the Christ? If Gallup's numbers are correct, the Christian message has convinced some 31 million adults to see themselves as

problems from which we Christians cannot escape. Some of them are peculiar to the Christian community. They will take shape around the intensifying struggle over inerrancy as well as the increasing differentiation between fundamentalist and evangelical approaches to Christian involvement with social institutions and thought.

Other problems flow from our membership in the nation and the world. Christians are certainly not immune from the problems related to a shrinking supply of natural resources, inflationary pressures of the modern economy, or the continuing fragmentation of domestic and international political power.

I believe the real problem, however, is none of the above. It is, rather, the problem of divining God's word in an age of despair and acting on that word so we may be the salt and light to the world as Christ mandated. In the coming decade the Christian community must not be caught with large numbers of intellectually lazy Christians whose opinions simply parrot last night's news. Nor dare we support faddish Christian writers whose publications wrap a thin veneer of Christianity around those current ideas which have captured the media's attention. Our challenge, in short, is to bring to the crucial decade lying before us a mind renewed by Christ, a mind which sees and processes the world's data in a fashion giving direction to problem-solving rather than a mind which wallows in despair and indecision.

At the risk of seeming unduly abstract, I suggest the world needs the Christian community to focus less on sociopolitical action, less on social pertinence, and more on intellectual

—Philip Loy '82, associate professor and head, Political Science Department

Richard Squires, assistant professor of biology

evangelicals. Perhaps we have packaged and sold the virtues and blessings of Christian living without presenting the world with a substantive understanding of who Christ is. I wonder, if Christians do not really know who He is, how can they (we?) understand His message or His mission?

As I enter the '80s, there are three things which perplex me, yea, four which I do not understand. He said the world would hate us, yet today it's chic to be a Christian; He drove the money changers from the temple, yet today Christianity is big business; He demands total commitment, yet today "sacrifice" is defined as a percentage of our excess; and He has made us stewards of His creation, yet today we act as if we own it. Would these puzzles exist if we really understood who He is?

As I enter the '80s, three things confront me, yea, four echo in my ears. "You are not your own, you are bought with a price"; "be in the world but not of it"; love your neighbor as yourself," and "Who do you say that I am?"  

---

"The increasingly educated world with which we must dialogue will not accept small answers to their questions."

—Philip Loy

As one stands poised on the horizon of a new decade, a host of problems come into focus—
relevance. It needs from Christians a faith brought to bear creatively upon social and political problems . . . a faith which can offer some hope for solutions to problems because the social institutions in which the problems are anchored are being transformed by people whose minds are being renewed by the living God. With renewed minds comes insight and perception based on an understanding of the proper role of social institutions in the created order. That, I believe, is the task of Christian higher education. It is crucial that we at Taylor and those in other Christian colleges take that task seriously, and do it effectively and efficiently in the coming decade.

Much has been written about the way we live or the manner in which we should live. It dominates Christian periodicals and is sure to raise a heated discussion during any coffee break. I do not want to minimize the importance of constantly holding up our lifestyles to critical reflection. But our reflection must be based on serious Biblical analysis rather than general impression and sentiment. That is particularly important in a decade in which we will all have to address seriously our lifestyles. We must devote more time to genuine Bible study in our personal lives and we, at Taylor, must do all we can to ensure that Taylor students develop a thorough Biblical knowledge during their college years. Beyond that, Christians must recognize that Biblical values need to be integrated into all facets of life. Certainly we must begin that during the college years by demonstrating intellectual integration of faith with the disciplines taught in the classroom.

I have just outlined an answer to the old problem of speaking God’s word to this age. That challenge is not unique to the coming decade, or for that matter, any decade. It will, however, be a more pressing task during the next ten years, because the lifestyle of abundance and the political ideologies it spawned are becoming less relevant. As the world begins to perceive that irrelevance, as it is just beginning to do, we Christians will find ourselves closely scrutinized as ones possessing a potential road map out of the chaos.

We must now, as never before, begin preparing to share our Biblical values with an educated world trained in the scientific method, a world which asks demanding questions and expects thoughtful answers. The increasingly educated world with which we must dialogue will not accept small answers to their questions. It is this task—the task of giving thoughtful answers—which looms as the greatest challenge of the new decade.

"Is the Christian heritage of hymnody so badly out of date that we can no longer ‘Hail the Power of Jesus Name’?"

—Dale Heath

The most pressing Christian problem of the 1980s may well be very subtle—sheer retention of the Gospel among its ingrown competitors. Collateral issues, like the care of widows in Acts 6:1, or medieval Christian institutionalism, or Anabaptist millenialism in the Reformation, have always tended to distract the Church from its central message, and even to replace that message with attractive substitutes. Current trends in Christianity have been immensely creative in production of innumerable religious alternatives to the New Testament message of Christ and redemption. Brief examples may illustrate.

Competition has forced religion to enter show business. And such media may now be necessary, but if so, the Christian’s challenge is to keep the message preeminent rather than the show. Biblical exposition, with its ringing call to repentance, commit-

ment, and renewal, must not give way to dramatics which differ little from the secular, perhaps only in vocabulary. And the personalities of the show must not displace the person of Christ.

Wide ranging musical tastes in evangelical circles have borrowed heavily from the entertainment world, including its romantic and suggestive undertones. Is the Christian heritage of hymnody so badly out of date that we can no longer “Hail the power of Jesus name,” or ‘sound His glories forth’? A romanticized Jesus appears strangely unlike the Christ of the Gospels.

Refined analyses of human problems, whether individual or social, are surely necessary in our complex society. Without the analysts and their work we might be more hopeless than we are. But over-concentration upon human sinfulness can eclipse the Saviour’s power to make us new creatures in Christ. The analytical process must culminate in the personal dynamism of realized faith.

Christian confrontation of the subtle dangers of losing our Gospel in the forest of our competing exhibitions and scientific “ologies” may require all that Jesus taught and exemplified in prayerful self-giving plus the sanctified intellectualism of Christianity’s first great thinker, the Apostle Paul.

These pointer readings of Christian challenge to religious substitutes for the Gospel are deeply engraved in the heritage of Taylor University. And though frequent distractions may sometimes deflect the campus community, the long-range purpose for this decade remains committed to centrality of the Gospel with firm resolve to recognize and subordinate collateral issues as we strive to “bring into captivity every thought to the obedience of Christ” (2 Cor. 10:5).

"The stable Christian family may, in fact, be the only effective witness the church has in the ’80s."

—William Hill

Many people are predicting that the ’80s will bring about drastic changes in our mode of liv-
religious beliefs. These things children absorb from their parents almost as readily as the air they breathe.

In order to effectively teach our children Christian principles, values, and behavior, parents must be competent and consistent Christian models before them. This observation is foundational, for young people want to know and grow close to adults whom they can respect as maturing Christians.

The Christian church is challenged to give guidance, support, and encouragement to the family in the building of stable relationships. The stable Christian family may, in fact, be the only effective witness the church has for the ’80s. 😊

“...to continue to ‘progress’ as Christians in this country by always buying the latest gadget never should be our goal.”

—Wally Roth

As one might expect, given my area of interest, I am deeply concerned about the ways in which Christians will utilize high technology in the future.

It appears to me that to continue to “progress” as Christians in this country by always buying the latest gadget is not and probably never should be our goal. Our own U.S. economy is no longer letting us “advance” unabated. In fact, if advertising says I should buy something, there are probably several good reasons—some of them economic and sociological—why I shouldn’t.

My thesis thus far has been mostly negative. There are, however, some exciting developments for the 1980s. Just as Christian missions discovered some years ago that radio could tremendously extend the missionary’s range and message, so today, mission organizations are realizing that inexpensive computers can help them be better stewards of their time, personnel, and financial resources.

Space does not permit a detailed discourse on this point, but a few examples may help illustrate the things which are happening and are anticipated:

- MARC (World Vision) using advanced systems analysis techniques to organize the missions in nations such as Brazil.
- Wycliffe taking portable microcomputers (typewriter size) into the jungles to speed up extensive Bible translation into new languages. (They then use computer typesetting and editing to get new translations into print. The first Bible concordances took 30 years; they now take fewer than 6 months.)
- Cooperation between Christian organizations such as the sharing of knowledge and software between Taylor University and the Sudan Interior Mission in New Jersey.
- New projects such as Taylor’s Computing Assistance Program (CAP) installing an inventory control system on a ship’s “bookmobile” to save many hours and invested dollars yearly.
- New mathematical methods and computer-based studies of literary authorship which show that traditional views of Biblical authorship are far more accurate than higher critics have been willing to accept.

And these only scratch the surface!

The ’80s will be an exciting period for Christians, with re-thinking and new challenges for us all. We must remember what Christ’s mission was, and what our own should be. Doing this we can be confident and enthusiastic about the future—not knowing what it holds, but knowing who holds it. 😊
For Those Who Think Young

The mind is a terrible thing to waste, say these “retired” Elderhostel participants.

by Laurie Robinson Turnow '77

Who were these students and what were they doing at Taylor? They were enthusiastic individuals eager for new experiences as promised by sponsors of the unique educational program: “Elderhostel.” Elderhostel, an independent and non-profit organization, began in 1975 on a small scale nationally, but the program has been expanding rapidly. Last summer, in addition to Taylor, 10 colleges and universities throughout Indiana hosted programs.

Twelve Elderhostelers, representing a variety of backgrounds, personalities, and localities, lived for a week last July in English Hall. They ate at the Hodson Dining Commons, visited sites of cultural and historical interest, and enjoyed a cookout, movie night, and an ice cream social. In-between these endeavors they found time to attend some very interesting classes. Each course was offered as a week-long, non-credit, college-level class taught by regular Taylor faculty. These students had the advantage of no exams, no grades, and no required homework! Courses offered last summer included The Geography of Religion, by Professor Roger Jenkinson; Fundamentals of Systems Analysis, by Professor Leon Adkison; and Living the Good Life, by Professors John Wallace and Marilyn McQueen.

Participant response was so favorable that the program is not only being continued, but expanded this summer. (See schedule and details below.) One Elderhosteler, who was a Taylor student in the early thirties, said that although the buildings and

After viewing a case study film, Elderhostelers identify communications breakdowns and draft plans to correct the problems.
faculty at Taylor have changed almost totally in the last five decades, the spirit remains the same. She affirmed, “There’s the same capacity for growth in the things of God. We’ve seen that this week in the classes in Elderhostel. I recommend it [the Elderhostel experience] to everybody who wants a challenging and stimulating vacation under really ideal conditions.”

Another woman, who was a student at Taylor 50 years ago (the first time around), summed up her feelings by saying she is more convinced now than ever that “older is better.”

An Elderhosteler who is not a Taylor alumna said the atmosphere reminded her of the life of Christ—the people were so kind and helpful and their lives reflected a beautiful spirit. “It’s been a great week and I’ll never forget it,” she concluded.

One man commented that he very much appreciated Elderhostel because of his belief in the statement, “the mind is a terrible thing to waste.”

But the most stirring expression of gratitude from the Taylor University Elderhostel class of 1979 came in the form of a gift. The class, following the suggestion of Elderhostel participant Dr. William Tinkle (a Taylor faculty member in the early 1930s), gave a Linden tree to the University. The tree now stands in the plaza of the Rediger Chapel/Auditorium and an inscribed plaque will accompany it. The class chose for the plaque these lines from Browning’s “Rabbi Ben Ezra”: “Grow old along with me! The best is yet to be, The last of life, for which the first was made: Our times are in His hand Who saith, ‘A whole I planned, Youth shows but half; Trust God: see all nor be afraid!’”

The tree is intended to be a gift of an endearing and enduring nature—a symbolic expression of youth and age. (The Linden tree is known for its lithe flexibility, while concurrently being firmly rooted in the soil.)

Taylor is touched by the gift and the spirit in which it was given. The University appreciated the opportunity to serve last summer, but, at the same time, Elderhostelers can be assured that the Taylor campus was greatly enriched by what they brought to us. The 1980 Elderhostel program at Taylor University will be offered in two summer sessions: June 15-21 and July 6-12. Professors and subjects announced for the first session are David Neuhouser, Lincoln and His Time; Mary Edna Glover, Physical Fitness and Recreation; and Winfried Corduan, Spirit, Nature and Self: A Look at Eastern Religions.

“I recommend it to everybody who wants a challenging and stimulating vacation...”

The faculty and topics for the July session will be Dr. Neuhouser and Miss Glover, who will repeat their courses, and William A. Fry, whose subject will be That Untravelled World: The Literature of Later Years.

The cost, including lodging and meals, is $130 per session. Applications are now being accepted, and must be received no later than three weeks before the session begins. All are welcome to attend both sessions.

For further information, or to apply, please contact Thomas G. Beers, Director of Community Services, Taylor University.
Ray stands by the Dairy Queen in Columbia, Missouri, one of ninety "DQs" which resulted from his purchase of the state franchise in 1945.

The Right Mix

"Earn all you can, save all you can, give all you can."—John Wesley

While students, Ray and Garnet Rice could not have imagined what lay ahead. But discipline, strict management, and God's leading brought them through the Depression and worked together for good.

Life is pleasant enough now for Ray and Garnet Rice. A casual visitor to their home in Missouri could never imagine the hardships, risks, dependence on God, and eventual fulfillments that have marked their lives since leaving Taylor in 1929.

Ray's childhood was normal for the time—when the Twentieth Century was only in adolescence.

The son of a banker, he was exposed to the world of business from childhood. But after eleven years in banking, Ray's father, Edward O. Rice, developed a nagging, almost guilty feeling that he had missed his calling—the ministry. Then the Lord seemed to speak more dramatically. Mr. Rice had a serious auto accident, barely escaping with his life. This experience led him to give up business and to begin serving the Lord as a fund raiser at Asbury College, Wilmore, Kentucky, where Dr. John Paul was President. (Ray attended 5th and 6th grades in the elementary program at Asbury.)

Dr. Paul became President of Taylor in 1922 and soon after persuaded E. O. Rice to join his staff in Upland as business manager and fund raiser. Mr. Rice then became the driving force behind the creation of MCW
"Industrious people find few things so agonizing as not being able to work."

Residence Hall. One of his clients and friends, Mrs. Ella MaGee, provided major funds toward the construction of the fine building.

By this time a Taylor student, young Ray worked for 25¢ an hour, staining the new woodwork being installed in MCW. One night, as a result of spontaneous combustion, the lumber burst into flames. Fortunately, the night watchman spotted the blaze in time to prevent major damage.

"The next day," Ray muses, "I was working on plumbing."

Interestingly, Garnet Williams '29, who was to become Raymond's wife, was one of the first students to live in MCW. "I could still smell the new plaster," she says.

In those days Taylor offered two programs—ministerial and education. Ray completed the education course, and then taught at Hobart, Indiana, for 2½ years. Then the Depression struck.

Hard times swept across the land. Like millions of others, Ray lost his job. Ray recalled the economic plight: "You wonder how people managed to get along in those days." Then he added, "Industrious people find few things so agonizing as not being able to work."

During this arid time the thought of a steady job was a mirage. So Ray and Garnet worked on a farm, picking tomatoes for only $1.00 per day, and later Ray secured a clerical job for $12.00 per week at his uncle's Ford garage. Somehow, the Rices always managed to put something aside.

"Our greatest strength, it seems to me, has been our careful management of the resources God has made available to us. Regardless of how little the income," Ray continues, "we determined to save 25¢ each week. So every month we put $1.00 in savings at 2½ percent interest." Thus, at the end of each year they had $12.00 in Postal Savings, plus a little interest.

During these years Ray also sold automobiles part-time, providing a definite financial boost—with most of that extra income going into savings. "During a contest I had more sales points (Ford gave bonuses for sales) than the worst full-time salesman!"

In 1936 Ray secured a job with the Universal Credit Company, Peoria, Illinois. Later, he worked for the Caterpillar Tractor company and the Office of Price Administration.

One never knows what an apparently typical day may bring.

Ray went to work as usual one day in 1945, but what transpired was to change the course of his life. An exuberant salesman bounded into Ray's office with the announcement that he had just the right investment for the Taylor alumni—the Dairy Queen franchise in East Moline, Illinois. By this time Ray and Garnet had managed to save about $8,000. Could they have been saving for this moment, to invest in what was to them an unknown enterprise? The frugal, penny-stretching Rices faced a monumental decision.

Ray then remembered his days at Asbury and his student friend, Barney Claghorn. Often they talked of someday becoming business partners. It so happened that Mr. Claghorn was now teaching ROTC at Knox College in Galesburg, Illinois, west of Peoria on the direct route to East Moline. Ray phoned his friend: "I'll drop by to pick you up on my way to Moline."

Arriving at their destination, they learned that the franchise was not available. However, they were confronted with the opportunity to purchase the franchise for the entire state of Missouri (except St. Louis). Ray

Garnet was among the first residents of MCW dormitory, shown in the early photo by Ray Rice. Roade Avenue, then a dirt road, ended abruptly at the Magee entrance.
felt led to accept. He not only parted with his $8,000 life savings, but agreed to establish fifteen stores within five years.

Ray and Garnet and their son, Robert, moved west to the college town of Columbia, Missouri. Without any promotional efforts Ray soon found several investors willing to purchase "DQ" franchises with the agreement that he would receive royalties on the ice milk mix.

The timing was perfect. "After World War II there was a pent-up demand for the simple pleasure that Dairy Queen provided," Ray explained. By 1961, fifteen years after the Rices moved to Columbia, a total of 90 DQ stores had been built in Ray's territory.

Was it simply good fortune that turned $8,000 into such a prosperous enterprise? Definitely not, Ray affirms. "With my conservative approach to management, all of this had to be the Lord's leading—there's no other way to explain it." He continues: "More and more as you mature you want to take the Lord as your partner and seek His guidance. This is the right way to begin life, and to end it."

In their continuing efforts to manage their resources wisely, Ray and Garnet recently asked Taylor's Office of Estate Planning to review their existing plans and to help them make refinements that would achieve their objectives in the least costly and most satisfying way.

One of the results of these planning efforts was the Rice's presentation of very meaningful gifts to their Alma Mater. One of these was their prized cow creamer collection described in this issue of the Taylor University Magazine.

Why are the Rices investing in Taylor? "I never became a minister or missionary, so I thought this would be a good way to perform an important Christian service," Ray answers. The University accepts these expressions of trust prayerfully, and resolves to remain true to her purpose which existed long before Ray painted woodwork in MCW dormitory.

Howard Taylor Heads Alumni Program

Howard W. Taylor '70, has been named Director of Alumni Relations and Annual Programs at Taylor University, according to Jerry L. Roberts, Vice President for University Advancement.

An experienced member of the University administrative staff, Howard had been Director of the Annual Fund the past three years. During this time annual giving from alumni, parents and friends has increased from $180,596 in 1976-77 to $292,500 in 1979-80.

Howard first served the University as Director of Financial Aid from 1975-77. Earlier in his career he was Campus Life Director on Long Island from 1970-74, and from 1974-76 was Director of North Central Indiana Youth for Christ and Campus Life. He holds the M.A. degree in Executive Development in Public Service from Ball State University.

In the alumni program Howard succeeds Robert A. Cotner '58, Director of Community Relations at Taylor since 1977. "Bob's service to the University the past three years has been marked by a high level of commitment, creativity and energy. We wish for him and his family a very productive and satisfying future as they pursue God's will in another area of leadership," Roberts commented.

Cotner resigned his post at Taylor to accept an administrative position with a business firm in Chattanooga, Tennessee.

"I plan to concentrate heavily on our club programs and look forward to working with many alumni and friends of the University," Howard Taylor stated. The new director of Alumni Relations already has been involved in club programming and in the Trojan Club. Betty Freese continues her valued service in the Alumni Office as Administrative Assistant.
The Rice Collection: America’s Finest

by Robert A. Cotner ’58

Rightly viewed no meanest object is insignificant; all objects are windows, through which the philosophic eye looks into Infinitude itself.  Thomas Carlyle

Myth has it that the dog is man’s best friend. As one who owns two Siamese cats, I would have to argue the point. But as the caretaker of the Rice Cow Creamer Collection at Taylor University, I would undoubtedly contend that the cow, not the dog nor the cat, has been more genuinely endeared in popular art—and for good reason.

The cow, that docile, leisurely beast, whose strength moved the world before the engine did, whose warmth made the stable (and often the house) bearable, whose milk has nourished countless generations, whose cheeses tantalize the gourmet, whose body—when sacrificed—produces the most succulent of feasts, and whose wastes give a measure of growth to crops unattainable without it—that bovine beauty, the cow, when seen through the philosophic eye of the craftsman of the cow creamer, is, beyond any doubt, man’s best friend.

Consider, for example, the tenderness with which the milkmaid approaches her duty in the delightful creamer dated about 1760, from the hand of artisan, Thomas Wieldon of England. The mottled orange, grey, and white cow appears to chew its cud contentedly as the maid leans both shoulder and head gently against its side and milks into a pitcher. A careful look at her face, ever so delicately created by the craftsman, reveals that she is as contented as the beast she milks.

The simplicity of the lines of the cow and the maid suggest the primitive technique of the craftsman and the early date of the piece. It is one of the finest creamers of the more than 250 cow creamers given to the Special Collections of Taylor University in 1978 by Garnet and Raymond Rice.

You may ask, as most persons who hear of our Cow Creamer Collection do, “What’s a cow creamer?” When asked if the University ought to accept such a gift, I raised that very question myself. The only cow creamers I had ever seen were those small, plastic, cow-shaped pitchers on the tables of not-so-fancy restaurants at obscure intersections of Indiana state roads, and I had never referred to those as “cow creamers.”

But Mr. Rice informed us that his collection contained more than 150 antique cow creamers and a number of exquisite sterling silver pieces, and that several creamers were thought to be from the eighteenth century and many were from the nineteenth century.

G. Bernard Hughes, in Small Antique Silverware, calls the cow creamer “A quaint conceit of the third quarter of the eighteenth century . . . the milk jug modeled in the form of a cow” (p. 28). The cow is usually standing, sometimes on a low pedestal made to look like a pasture and sometimes sim-
A sampling of the types and varieties of cow creamers in the Rice Collection are pictured above. A brief identification of each follows.

Left row, front to rear: Delft creamer, lying cow, from Germany, 19th century; modern creamer, made in Japan; Sterling silver creamer, hallmarked “JTS,” “13,” with cluster of grapes, hair finely detailed, collar with buckle and bell, 5½ ounces; Sunderland Luster, purple and brown spots, circa 1815.

Right row, front to rear: Sterling silver creamer, hair finely detailed, 7 ounces; Sterling silver creamer, hallmarked “GebN,” jeweled eyes, 4 ounces; small black and gold Jackfield, circa 1750; Delft standing creamer, signed “Mrs. George’s,” 19th century.
ply on its own four feet. There is always an opening in the
center of the cow’s back through which milk is poured into
the creamer; the tail usually loops over the back or occasionally
downward, forming a small handle; the mouth is always
open to serve as a spout for the pitcher. The facial expres-
sions of creamers created by the various shapes of the mouths
run, as one commentator noted, from surprise and innocence
to “simple idiocy.”

It is possible to trace increased sophistication in design of
creamer and capability of craft from century to century. Inter-
estingly, the care in creation in the nineteenth century seems
to have been lost by modern potters, who often produce the
most elementary, stylized creamers that in some instances
must be described as silly. I wonder if the difference is in the
diminished appreciation of the cow in modern culture rather
than a diminished capability in the potter’s craft.

The cow creamer is thought to have originated in the
eastern Mediterranean area more than 3,000 years ago.
Felice Davis, writing in the New York World-Telegram
and Sun in 1955, suggests that traders carried the craft to
Holland—that country of cows—where it gained impetus in
the eighteenth century. She calls Dutch silversmith, John
Schuppe, who moved to England in 1750, the man “largely
responsible for starting later cow creamers on their way.” Mr.
Hughes claims both Schuppe and David Willaume to the
younger as the two earliest silversmiths applying their skill in
the creation of creamers in England.

Of the seven silver creamers in the Rice Collection, one
appears to be a creation of Schuppe, who died in London in
1773. This particular creamer is of sterling silver, approxi-
mately three and one-half inches tall, and weighs five and
one-half ounces. Typical of other “silver cows,” as the assay
office termed them, an over-sized fly which serves as a
miniature handle rests on the hinged lid. Flies were, of
course, always directly associated with the milking operation
and were not held in as low esteem as they are today. Thus
the fly on the back was seen to the eighteenth and nineteenth
century mind as a nice touch. The Rices acquired this fine

piece in 1952 from Edward G. Wilson, Philadelphia antique
dealer.

The Rice collection, which is seen by Ray Browne, head of
the Popular Culture Association of America, as the finest in
the United States, contains representative examples of
creamers from nearly every region of Europe and America
and from nearly every era. There are, for example, fine Staff-
fordshire creamers of varying designs; there are Lustet
creamers from Sunderland, there are shiny, black-and-gold
Jackfield creamers dated 1750, there is a wide variety of Delft
creamers from Germany, Holland, and France, and there are
Bennington creamers from Montgomery County, Pa., dated
1840.

“And what do you do with such a collection—besides hand-
dle it very carefully?” one may ask. Esthetically, it makes an
extremely pleasing display when appropriately arranged. The
farm folks who come to campus from the Upland area—or
elsewhere—always gather about display cases containing the
cow creamers. They point out individual items and specific
features about certain creamers that they find interesting. A
cluster of people around such a display is never silent.

“I remember one just like that,” one woman was overheard
saying recently.

“My grandmother has one like this,” another countered.

“I think I’ve got one like that one over there—somewhere,”
another observed with a touch of excitement in her voice.

Both the Allen County Historical Museum of Fort
Wayne and a Marion arts group have expressed interest
in borrowing portions of the collection for display
purposes. And we’ve talked of organizing a touring display of
selected creamers for State Fairs, where there would be great
interest in such items. Security, of course, is always a factor
in any display use.

Another dimension of use will be for research purposes.
Members of the Ceramic Division and the Metals Division of
the Museum of History and Technology, Smithsonian Institution,
have expressed an interest in the collection. No cow
creamers are owned by the Smithsonian at all.

Dr. Browne has requested a paper on a portion of the col-
lection at the annual national meeting of the Popular Culture
Association in Detroit in May. We were honored to fulfill
that request. University students will be utilized in research
and photography as a part of their course work.

As Carlyle commented, nothing is insignificant. Each cow
creamer is a miniature window itself through which the
careful observer can see, if not infinitude, at least certitude of
interest in and concern for a dimension of life significant in
the cultural history of its time. And the collection itself
represents a love for and appreciation of the dairy industry by
Garnet and Raymond Rice, who, through their involvement
in Dairy Queens over the years, depended greatly upon that
industry. Their generosity in contributing the fine Cow
Creamer Collection to the Special Collections of Taylor
University permits us to share it and the love it signifies with
many, many others. And we are grateful.

Special note: Taylor University would be pleased to receive addi-
tional materials for this collection. Antique cow creamers and
other items relating to the dairy industry suitable for display and
research purposes would be appreciated. Inquiries may be directed
to Jerry Roberts, Vice President for University Advancement,
Taylor University, Upland, Indiana 46989.
Becki Conway is, in many ways, a typical college freshman, with typical college friends, pursuing a typical liberal arts education.

What separates her from this typical generalization is "Harold the Hairless Wonder." Harold is a prosthesis, or artificial limb. Becki had her left leg amputated a year and a half ago.

Now don't feel uncomfortable. The Taylor University student wouldn't want that. She is, in fact, so forthright about her condition she's likely to talk to you about her use of "Stubby," the remaining portion of her leg, before introducing you to Harold. And she might wryly tell you about how she went on a crash diet and lost 17 pounds.

"I don't mean to sound insensitive," Becki explains. "It's just that it's good for society to see my situation out front."

The 18-year-old daughter of the Reverend James and Sally Conway of Urbana, Illinois, has been "out front" about her condition from the start.

While active in YMCA competitive gymnastics in junior high school and cheerleading in eighth grade, she experienced pain in both legs just above the knees. At the time, doctors diagnosed the problem simply as a strain.

But the pain grew worse, and the left leg began to swell, to the point that Becki was put on crutches so she could continue going to school.

During the fall of 1976, Becki's sophomore year at Urbana High School, X-rays showed a growth above the left knee. Her parents took her to a clinic where Becki underwent a series of tests. Samples were sent to the Mayo Clinic and the Air Force Pathology Laboratory, but the cause of
the growth was undetermined. Doctors decided to wait and watch.

About a year later, physicians discovered that the growth on the left leg had enlarged, so they took another biopsy.

By the middle of her junior year in high school, Becki was told she would be going to Texas for surgery. Soon after, her doctor, a close family friend, phoned Mr. and Mrs. Conway to make sure they would be at a church fellowship dinner one evening. Becki thought this a bit strange, since the physician knew that her father, the pastor, would be there.

Becki began baking brownies when, to her surprise, her parents returned home early, bringing the doctor with them. The alert teenager sensed the gravity of the moment. "You see, I sort of knew what they were going to tell me that my leg would have to be removed. Once the doctors hinted that this could become a possibility, so when my parents finally broke the news it was not a shock," Becki recalls.

"It is ironic to me that the smallest thing can literally destroy a life . . ."

She then dealt with a mixture of feelings including curiosity, wonder, and even excitement. "At this point in my life I was strongly seeking God's will—I knew this was His plan and that He was bringing about drastic changes in my life. It would be good even though I couldn't understand it.

"God knew long ago that this was going to happen to me," Becki said. "So, He provided understanding and peace through my Christian upbringing. And He gave me an optimistic personality and a crazy sense of humor that makes me laugh at myself," said Becki. With all these resources she did not react with depression or fear, or become bitter.

Understandably, what their youngest daughter faced made the Conways upset. "I did my best to encourage them," Becki added. "What's the big reason for getting all upset about crises like this? If we do, we are placing too much importance on what we are physically. But life here is just a preliminary to the great life to come.

"I called up a girl friend and told her to come over. It's strange how you break news to people. It was hard to do—it's not easily worked into conversation. And I didn't want to be dramatic or dwell on it.

"People respond in kind," Becki asserted. "If I was positive, my friends would be, too. But if I refused to talk about my leg, then they wouldn't either. But when you talk about something like this openly it makes people relax and understand more."

Before the surgery, Becki went to Florida for two weeks. "I took full advantage of my complete body," Becki recalls. She had two weeks left with two legs and she ran up and down the beach, her legs barely keeping up with her spirit.

"I believe," says Becki, "that I appreciate my body with one leg more than many people do that have two legs. I strive to have a balance between just taking my body for granted and trying to make physical well-being my goal. After all, the body doesn't last.

"With human beings, it seems that the most important emphasis is so often on outer looks. It is ironic to me that the smallest thing can literally destroy a life if the confidence is on the outside. I have chosen to put more emphasis on what I live for as a Christian," Becki affirms.

Following the amputation Becki was thankful she could call on Divine help. The pain was excruciating. Then came that strange phenomenon—phantom pains, where the left leg used to be.
ward, locking the knee, rolling through with all the weight on the hip, and breaking the knee. She also had to learn to walk on different surfaces like linoleum, carpeting, and grass, as well as uphill and downhill and going up and down stairs. She practiced her gait to make it look as normal as possible.

A vibrant young woman, Becki is on the Taylor Trojan track team, finishing third in the high jump during a recent meet with Wheaton. "I hold the Taylor record for one-legged high jumpers," Becki exclaims. She jogs up to four miles a day on crutches and tries to inspire her teammates to extend themselves. "When you go out for track you have to force yourself to go way beyond just being tired," Becki insists. She expressed appreciation for the chance to belong to a team of Christian women. Becki also enjoys snow, water, and cross-country skiing, bicycling, repelling, roller skating, swimming and diving, horseback riding, gymnastics, and volleyball.

Taylor students have welcomed Harold as "the guy living on the fourth floor" of the women's residence hall. For his first birthday this summer, Harold received a big party and many gifts, including garters, mismatched socks, and pantyhose with one leg.

Even strangers are learning to accept her condition. "When I walk around the malls in Marion and Muncie," Becki says, "people stop and stare, and I let them. It's good for them to see it. Most people who have a fake leg always wear it in public. Not me."

She said little children are the most fun because they all want to know why she doesn't have two legs.

"I can understand, because I used to know a man with only one arm, and I was constantly looking up his sleeve to see where it went."

She feels she has something in common with children, who tend to feel they are different than other people.

"So I tell their parents it's all right that their children stare. I usually let the children feel the stump and explain to them that my leg was sick. I tell them that it was removed so that the rest of me would not get sick and that I am fine now. And I always tell them about Harold."

Becki is aiming for a degree in recreational therapy, teaching the mentally and physically handicapped adventure sports and, at the same time, providing physical and emotional therapy.

But the best therapy of all will be Becki's vital and deepening faith in her Lord.
ON AND OFF CAMPUS

Virginia Cline '38
Honored at Retirement

After more than thirty years of service to Taylor University, Virginia R. Cline '38, retired from her position as Chief Accountant. Miss Cline, who left for health reasons, joined the Business Office staff in July, 1946, serving under Mr. M. E. Witmer, Business Manager. She quickly became an integral and vital member of the College staff.

At a luncheon held in her honor on February 20, 1980, many comments were made about Miss Cline's service to the University. In a letter written for the occasion, William Davis, Vice President for Business Affairs from 1966-1976, said of his friend, "Our association in the Business Affairs Office covered about one-third of your career at Taylor. During this time, you were observed to be a totally dedicated, technically competent person who gave selflessly of your time and your being to the job. Your abilities and high standards for professional conduct and performance resulted in timely work of consistent, excellent quality."

Mr. Davis continued his tribute: "Your attributes of dedication and devotion to the job, willingness to assume responsibility, pride in your work, and consistency are rare qualities in the work force today. But, I also know that the motivating factor behind your work at Taylor has been your commitment to Jesus Christ.

This faith has expressed itself in your work on the job and your works in private life.

"Completion of thirty years of service is an occasion of honor," the letter continued, "not to be lightly regarded, because it represents not time spent or years 'put in,' but rather a thirty-year investment of your life in the service of others . . . At this intermediate point in your total life's work, I do not think it is inappropriate to apply the Scripture 'Well done, thou good and faithful servant.'"

President Milo Rediger presented Miss Cline with a plaque which reads, "Upon your retirement from the Office of Business Affairs, with gratitude and appreciation, Taylor University acknowledges your 30 years of loyal and dedicated service to God, the University, and this community."

Paul Keller, Business Manager from 1944-1968 also sent a tribute expressing his deep appreciation for Miss Cline's life and service.

Dr. Hazel Carruth '38, Professor Emeritus, shared some of her feelings and thoughts about her long-time friend, and Allan Smith, Controller, presented Virginia with a Taylor University watch.

Clearly, Virginia Cline is respected and appreciated by all who have known her and worked with her throughout the past thirty years. We all wish her many more meaningful years filled with God's special challenges and blessings.

Former Soviet writer addresses students

One morning in 1968 Arkady Polishchuk, Soviet journalist, expert on African affairs, member of the Communist Party, woke up and told himself, "I am no longer an atheist, I believe in Jesus Christ."

Polishchuk was later arrested as a dissident and forced to leave the Soviet Union.

The Russian, who spoke on the campus May 7, said he couldn't really explain his conversion to Christianity. His parents were Jewish, but he was an atheist, he said. He graduated from Moscow University, worked as a sports reporter for awhile, and then became an expert on African affairs for Pravda, the major Soviet newspaper, and Izvestia, a Soviet news service, and was managing editor of the magazine Asia and Africa Today.

Polishchuk said he joined the Communist Party to get ahead in his profession, and because he believed in the Party.

"It was my dream to be a Communist Party member," he said.

"At that time I really believed. It was my religion."

However, after he began working as a journalist he became disillusioned.

"Very soon I realized I had to lie, even writing about sports. You have to write something in reverse in every story."

He said he realized the country's leaders were using Marxist principles, which sound good in theory, to impose a dictatorship on the people.

"Fear is ruling the country. All of us remember when the 60 million or so people were killed during the Stalin years. It wasn't so long ago." In 1973 Polishchuk left his job and the Communist Party and began working for the Christian Emigration Service.

In 1978 he was arrested and told he could either leave the country or go to prison. He said his mother and sister were blackmailed by government officials into urging him to leave, so he came to the United States.

When he left he took with him a list of 30,000 Christians who want to leave the Soviet Union.

Since then he has worked as a representative for those Christians.

He said the reason many people want to leave is that they are afraid their children will become atheists.

Polishchuk said he believes the United States must make a strong response to Soviet aggression around the world.

"They (Soviet leaders) pay attention only to power," he said.

He said the crisis in Afghanistan began when the United States failed to respond strongly to the invasion of Africa by Cuban troops a few years ago.

He said he supports the decision to boycott the Moscow Olympic games.

"The Soviet citizen will be quite able to understand this. It will help," he said.

Sonnenbergs thank Taylor friends

The Sonnenberg family for whom many have prayed and to whom some have given, are progressing. Mike is back teaching at Nyack though he yet wears covers on his hands and has therapy for his hands which were so badly burned in the accident. Joel has been home from Shriner's Hospital for four weeks and is doing nicely though he is currently back in Boston for further grafting and work. Through the article and notice in the Taylor University Magazine (Fall-Winter, 1979-80), friends of the Sonnenberg family contributed $1,675.17 as of the end of March. The family sends its thanks to their Taylor friends for all their support.
"I know two persons who can walk on water. Well, no... I guess Dr. Schenck would sink to his ankles." The man who spoke those words on February 21, 1980, was James Diamond. As he talked, he manipulated pegs on what appeared to be a children's game but what in actuality is the Moberg Nine-Hole Peg exerciser. The man about whom he spoke is Robert Schenck '51, Director of Section of Hand Surgery and Associate Professor in the Departments of Plastic and Orthopedic Surgery, Rush-Presbyterian-St. Luke's Medical Center, Chicago.

Mr. Diamond had lost his right forearm half-way to the elbow in an industrial accident in 1978. In an 18-hour operation, Dr. Schenck re-attached surgically the forearm, and since that time, Mr. Diamond has undergone therapy to learn dexterity of the hand and forearm with the Nine-Hole exerciser.

A cum laude graduate of Taylor, Dr. Schenck took his medical degree at the University of Illinois College of Medicine, Chicago, and interned at Akron General Hospital in Ohio. He has held fellowships at Columbia University, Western Pennsylvania Hospital, Pittsburgh; The Presbyterian Hospital, and The Roosevelt Hospital, New York City, and has taught at Columbia University.

His hospital appointments have been as Staff Physician at Door of Life Hospital, Ambo, Ethiopia, where he performed the first reconstructive surgery on leprosy patients in the country; and at Brownsville General Hospital in Pennsylvania. Dr. Schenck publishes frequently in professional journals and is a noted lecturer at medical conferences around the world.

The Winter 1980 publication, The Magazine, of Rush-Presbyterian-St. Luke's Medical Center featured "Microsurgery" at the Center. Dr. Schenck is the Chairman of the Microsurgery Research Laboratory Committee and is the central figure in The Magazine's story. With gracious permission of Anne Clary, Publications Manager at the Center, The Taylor Magazine is reprinting "Week in the Life of a Microsurgeon" and the accompanying photographs.

Wednesday, 10:00 p.m.—Robert Schenck, M.D., is reading a novel at his North Side apartment, trying to unwind from a hectic day at the hospital. He saw twenty patients in his office and performed three operations. A lengthy microsurgical procedure is scheduled for 8:00 a.m. tomorrow. The phone rings.

The caller is an orthopedic surgeon from Indiana. He has an emergency
Thursday, 8:00 a.m.—Dr. Chesney arrives and scrubs up. He takes over the vein anastomosis while Dr. Schenk takes a short break. In the scrub room he nibbles on a chocolate bar.

Fifteen minutes later he is back in the operation. Sitting on opposite sides of the operating microscope, Dr. Schenk and Dr. Chesney decide to remove a large portion of damaged vein and replace it with vein graft from the boy's forearm.

Thursday, 11:00 a.m.—Vein, arterial and tendon anastomosis is complete. Dr. Schenk turns the operation over to Dr. Chesney, and Frank Madda, M.D., senior plastic resident, helps close the wound while Dr. Schenk talks with the patient's mother.

The replant is then dressed and elevated to prevent clotting. Dr. Schenk doesn't feel tired, so he decides to stay the day at the hospital. In the afternoon he performs a three-hour microsurgical nerve graft operation and sees patients.

Friday—The replant continues to come along nicely. Dr. Schenk sees patients and looks forward to a relaxing weekend.

Saturday, 8:00 p.m.—He is having dinner with friends when his beeper goes off. On the phone the resident monitoring his replantation case tells him the thumb's temperature has dropped. Something is wrong with the circulation. The replant is failing.

Saturday, 9:00 p.m.—Dr. Schenk is back in the OR with Drs. Chesney and Jones. Hours are spent trying to locate the cause of the problem. It is apparently due to arterial blockage because the venous anastomotic sites have not clotted. The artery with suspected internal damage will have to be removed and replaced with a vein graft. In other words, the thumb will have to be revascularized.

Sunday, 7:00 a.m.—Revascularization is complete. Dr. Schenk returns home and the day passes uneventfully.

Monday—Despite the weekend disruption, Dr. Schenk follows his normal weekday routine. He sees patients all day.

Tuesday, 10:00 a.m.—The thumb is failing again. Dr. Schenk suspected this might happen, but had hoped against the odds. After discussing the situation with the patient and his mother, the decision is made to amputate on Wednesday.

Dr. Schenk reflects on the week's experience. "There was apparently damage further out in the artery than was visible to us initially, even through the microscope. The injury was an avulsion, and the thumb had been literally twisted off. That's the worst kind of amputation, and only about one in six can be salvaged.

"We can't fully see all the damage inside the vessels, but there must have been quite a lot since the problem wasn't our anastomoses. We did all we could."

This particular case was Dr. Schenk's only failure this year. Eight weeks later a similar replantation was performed—this time the result of a table saw accident. It was successful.

"I try to make it clear to my patients that there is no guarantee as to the final result. Even in the best cases the final result is never as good as the original. Microsurgery can repair, but it can't restore function to exactly what it was before. And there's always the possibility of amputation."

While the patient must prepare for the worst, Dr. Schenk prepares to give his best. Because microsurgery is endurance work, he stays in good shape physically.

"I try to exercise several times a week, usually by swimming. It helps me stay alert during long, unexpected procedures. However, when I'm operating under the microscope, I don't realize how much time goes by until it's over."

Patience. Concentration. Endurance. A steady hand and an even disposition. These are the necessary attributes for the microsurgeon, for even the simplest procedures may take several hours.

Not all hand surgeons use microsurgery in their practice. "In fact, when I was in training, there were no schools that offered microsurgery. I basically had to teach myself. My initial exposure to microsurgery was in a workshop at Montefiore Hospital in New York City."

His first microsurgical replantation was done in December, 1973. A man had crushed all his fingers and thumb in an escalator gear. "I lost the thumb but managed to save all the fingers," Dr. Schenk recalls.

His enthusiasm for the field has been the driving force behind the
Dr. Robert Schenck: "We did all we could."

growing interest in microsurgery at the Medical Center. In 1978 he established the Microsurgery Laboratory and his Section of Hand Surgery offers one of the few hand/microsurgery fellowships in the country.

Since 1973, Dr. Schenck has replanted over 70 digits (fingers and thumbs). Many more injuries and disabilities have been treated microsurgically in the form of flap transfers, nerve grafts, tendon implants and revascularization procedures. Dr. Schenck has performed pioneering work with free muscle flap transfer using microneurovascular anastomosis (reported in the April, 1977 issue of Orthopedic Clinics of North America and in the Journal of Hand Surgery, January, 1978).

A member of the International Society of Reconstructive Surgery, Dr. Schenck is recognized as one of the leaders in microsurgery worldwide. In his office, stacked neatly behind his desk, are trays holding thousands of color slides that attest to his six-year effort. This past winter he presented a filmed report on his work to the Seventh International Congress of Plastic and Reconstructive Surgery in Rio de Janeiro. In the audience was Dr. Chen Chung Wei, the first surgeon to replant a hand (in 1963).

Dr. Schenck never loses sight of the fact that modern microsurgery is a young art and replantation is an unpredictable proposition.

"You really don't know if your anastomosis is successful until you release your clamps. If it leaks, you may have to redo several stitches.

"My replantation success rate has been quite good (96 percent last year), but with each procedure it will be 10 days after the actual operation before I can be certain of success. During that time the hand must be closely monitored. We now use temperature probes in the fingertips. If the surface skin temperature drops below 30 degrees Celsius, it's an indication there's vascular trouble."

Replants are never scheduled. You just take them as they come.

"The calls often come in the late afternoon or evening," he notes.

"Most are industrial or farming accidents. Not every case is suitable for replantation, but when the victim is young and the digit is as important as the thumb, or multiple digits are involved, we want to try."

It is fortunate for Dr. Schenck that complicated (and therefore long) replantations aren't seen too frequently. He is a specialist in a superspecialty and has no direct peers at the Medical Center. While he will allow one of his fellows to perform some of the anastomoses, he never leaves the OR. He is the only surgeon at Rush-Presbyterian-St. Luke's Medical Center with the necessary expertise to oversee such operations.

"I've had times when, after going all night, I thought we were done at 7:00 a.m. But then a complication set in and I had to go back . . . I actually got done at noon.

"You have to be prepared not to give up."

Dr. Schenck recalls that his longest operation was an elective procedure—a toe-to-thumb transfer that took four operations with 33 hours of surgery over a four-day period. Several clotting complications necessitated reopening the wound, reanastomosing certain veins and grafting others. But the "thoe" as it is called, survived.

How can a microsurgeon withstand the strain and uncertainty of such work? Replies Dr. Schenck, "I like what I'm doing. I love things difficult and delicate.

"I couldn't be doing microsurgery if I didn't."

Neither Wonder Woman nor Total Woman

I am writing because I am struggling with an issue that involves me personally, as a woman, and I would appreciate some help with it from my Taylor community.

The article, “Some of Our Best Mothers Are Women,” from the Fall/Winter issue of the Taylor University Magazine, is the one to which I am reacting. From many sources recently I have read about the virtues and successes of working mothers. The purpose of every article has been to dispel guilt in the women who are doing both. I am not contesting the need for this. What is disquieting me is that I am beginning to believe that there really is a “Wonder Woman”? The pace, the accomplishments listed for the woman filling dual roles are truly “Super.” But where does that leave the gals who are living only one role (whether by choice or by circumstance)?

Somehow this recent push to release the guilt for the Career/Mother woman seems to elevate her to a pedestal and hang a guilt-trip on me—the Mother woman. I am not saying it will always be this way for me, as my Lord only knows my future, but I do not see at this point a personal need for more than what I am now doing.

I have a college degree and seven years of career experience. When I worked I did not have a family, nor did I “home-make” very well. Even now when I am deeply involved in much volunteer church work, I do not fill my other roles very well. Something had to give, and for me it was career, because of my priorities and not because Hubby said so. (He is not that kind of guy.)

I feel that homemaking is not regarded with the respect it was just a few years ago.

The greatest joy of our 10-year reunion at Taylor last fall was to rejoin so many dear friends and to share where we are now; and to hear that most every woman who had a family was home full-time and loved it! Most of these gals had been teachers for several years; some talked of going back to work later. This was in sharp contrast to so many women I know who are racing to work because they can’t stand to be home and those who are fearful of having children for fear of staying home. (I get many calls requesting me to babysit full-time so a mom can go to work. I turn them down because I can only handle the two God gave me. I am neither “Wonder Woman” nor “Total Woman”)

This reaction is what hitting “little ole’ me, in little ole’ town, USA”!! Sometimes I feel that perhaps if I’d never had the broadening of college, nor had been made aware of greater scopes, then I’d be more content and not struggle with issues like this one. I usually can look around me and find reason to conclude that, whether or not I ever go back to the career world, the years I spent at Taylor (and my Dad’s money!) will never be wasted.

What I really feel I need is some good feedback on these things. Until now I have not gathered my thoughts in writing, nor had opportunity to discuss them with others here. I would really like to sit down over coffee with Taylorites and get some perspectives! How to do that? For now it is helpful enough just to get the thoughts out on paper.

I do feel closely knit to Taylor and her people. I feel keenly that most of who I am today came from Taylor and the experiences provided or made available through Taylor.

In Christ,
Marilyn (Hay) Habecker ’69

Reprint Ted Engstrom’s “Christian Excellence”

We always appreciate the Taylor University Magazine and look forward to getting it each time. We especially appreciated the article “Christian Excellence,” by Ted W. Engstrom in the last issue. We were wondering if we could have permission to reprint it to use with our Education staff and Sunday School teachers. Thank you for printing such fine articles.
—Terry and Shirley Snyder ’68

Recent Deaths

Joanne Terrell, wife of John Terrell ’56, was killed in an auto accident in Seattle, Washington. John was injured but has been released from the hospital. His address is 44507 S.E. 144th Street, North Bend, WA 98045.

Word was received that Lula Fern Cline ’20, died May 1. Miss Cline was a graduate of Taylor University and taught here for 17 years. Survivors include a foster son, Gene E. Troutwine, Anderson.
preaching and visiting pastors, churches, and interested persons. His address is 680 Robinson, Barberton, OH 44203.

'51

**Douglas E. Wingeier** recently authored a book entitled *Working Out Your Own Beliefs*, published by Abingdon. Douglas is affiliated with the Garrett-Evangelical Theological Seminary in Evanston, IL, as a professor of Christian Education and as director of the Continuing Education and Doctor of Ministry programs. He has written numerous books and articles for periodicals.

**Bruce and Ruth (Laurence x) Frase** have experienced both ups and downs in their first year of operating a motor lodge, but overall it has been a successful undertaking. The Frases' address is c/o Rob Roy Motor Lodge, Rt. 25, Box 66, Moultonboro, NH 03254.

**Douglas x and Wanda (Burked head x) McFall** were featured in *Action* magazine last year. The article tells of their missionary involvement in Haiti and various other countries, serving in whatever capacity needed. The McFalls' "permanent" address is 315 S. 4th Street, Carmi, IL 62821.

'52

**John and Jeanette (Badertscher x '54) Cornell** are on furlough this year from their field responsibilities with TEAM in Maracaibo, Venezuela. They report that John's thyroid condition is improving and they welcomed their first grandchild into the family in November (their daughter Ruth gave birth to baby Jennifer).

'53

**Roger and Wilma (Augsburger) Wischmeier** have moved to Kentucky where Roger is a doctoral student at the School of Music, Southern Baptist Seminary. Wilma is helping "put hubby through." Their son, David, age 17, is a high school senior at the School for the Performing Arts and their daughter, Barb, age 18, is a freshman at Judson College (where her Dad taught). The Wischmeiers reside at 7909 Avanti Way, Fern Creek, KY 40291.

'57

**Ray and Ruth (Skaaden x '59) Isely** are living in Chapel Hill, NC, where Ruth works as a staff nurse in the neonatal Intensive Care Unit of the North Carolina Memorial Hospital and Ray is employed full-time as a senior analyst in the Center for Health Studies at the Research Triangle Institute. He also has an adjunct appointment as Assistant Professor in the Dept. of Health Education at the School of Public Health of the University of North Carolina. He has had several papers published in the last three years and has been invited to speak at several international meetings. Their four children, Joel (18), Becky (16), Sara (15), and Lisa (10) continue to be the center of their lives.

'59

**Russell M. Ruch** and his family are involved as a lay family in a Bible Fellowship Church planting ministry. They invite any Taylor friends or alumni who may be in the area to visit them at 23 Anglin Dr., Robscott Manor, Newark, DE 19713.

**Sandra (Moore) Bedford** and her family have moved to 9348 Almar Place, Pittsburgh, PA 15237. Sandra is currently a Beauty Consultant for Mary Kay Cosmetics. Her husband, Clark, was recently installed as Director of Music Ministry of the Memorial Park Church in Allison Park, PA. Their sons, Christopher and Timothy, are ages 12 and 8.

'62

**Talmage Keenan** was honored recently in a Columbus newspaper because of his role as regional vice president of Fidelity Union Life Insurance Co. His region, consistently one of the top in the company, boasts more than $1 billion in insurance in force. The article described how Tal enrolled in Marion College (IN) under a program designed for youth from inner city neighborhoods. (Tal had previously declined a number of football scholarship offers because he had to work.) After receiving the grades necessary to be accepted at Taylor, Tal transferred and joined the Trojan team. Following his graduation from Taylor, he accepted a job as coach and English teacher and eventually worked into his current position with Fidelity Union Life. Tal and his wife Lynn have three daughters: Kelli (14), Traci (13), and Talli (9). The family is active in the Grace Brethren Church in Worthington, OH, and the Worthington Christian School, where the girls are students. The Keenans live at 870 East Johnstown Rd., Gahanna, OH 43230.

**David Bruce** took a leave from his responsibilities as professor of physiology at Wheaton College last spring and summer in order to work in Scotland. David was engaged in muscle differentiation research at the University of St. Andrews and also worked at a hospital and a medical school. The Bruces, including John (Foltz) and his son, Robert, age 9, and Scot, age 8, enjoyed the "refreshing and challenging change of pace." Jan keeps busy at home tutoring in remedial reading.

'63

**Jacquelin (Ruchti) Ashton** reports that after fifteen years of teaching all over the world, she married Air Force pilot Kent Ashton in 1976. Their son, Jack Ruchti...
Ashton, was born in July, 1978, and the family was transferred to West Germany in August of 1979. Their current address is PSC Box 4957, APO: NY 09123.

David and Alice (Hendrickson '63) Golden have completed a four-year tour in Germany and are now at the United States Army Chaplain School. Their new address is 327A Lasher Rd., Ft. Wadsworth, NY 10305.

Bruce and Karen (Palmer) McCracken have moved to 10 Sunny Hill Lane, Havertown, PA 19083.

Chantler and Marcia (Cripe) Thompson have joined the staff at Huntington College (IN). Chant is Director of Counseling and Guidance and the Head Resident of Wright Hall for Men, as well as the Assistant Dean of Students. Marcia is busy as an admissions counselor. The Cripes moved to Huntington College from Pasadena, CA.

John and Joyce (Rutzen) Schwenk have moved. Their new address is 8712 N. Austin, Morton Grove, IL 60053.

Craig and Susan (Bechtel) Bugno had their first child, Stephanie, on July 2, 1978. Craig has just begun his first year in medical school at the Medical University of South Carolina. The Bugno family lives at 1236 Wimbee Dr., Charleston, SC 29407.
76
Karl and Johanna (Palmer) Hildabrand have a new address: Route #1, Box 545 P, Williamsport, PA 17701. Karl is now employed with the Williamsport law firm of Mitchell and Mitchell.

77
J. Bradley Martin reports that he and his wife have moved so that Brad can begin his first full-time ministerial appointment—with the Farmer United Methodist Circuit. Brad received his Master of Divinity degree from the Methodist Theological School in Ohio at Delaware (OH). He noted that he appreciated the preparation Taylor had given him toward his seminary studies. The Martins’ new address is Box 34, Farmer, OH 43520.

Mary Lynn (Simpson x Schrock) completed an Associate of Science degree in Radiologic Technology from Indiana University in May, 1979.

Leo “Chip” and Rochelle (Bricker) Price are currently working at the Happy Hill Christian Children’s Home. Chip also is attending Southwest Baptist Theological Seminary, as he feels called to full-time ministry and seminary training. The Prices live at Happy Hill Farm, Star Route, Glen Rose, TX 76043.

Heidi Lappin is in her third year of teaching at Franklin High School (NC). She takes student groups to France on Study-Travel programs every other summer. Her address is Rt. 2, Box 86, Flat Rock, NC 28731.

Mona Williams lives at 506 W. Edgar, Mishawaka, IN 46544. She is teaching music at Bethel College in Mishawaka.

78
David and Mendi (Beatty ’79) Dunbar are now living at 940 Garys Mill Rd. 2C, West Chicago, IL 60185. David teaches junior high math at Indian Trails Jr. High in Plainfield (IL), and Mendi is employed at Mid America Federal Savings and Loan Assoc. as a mortgage processor.

GLOBAL TAYLOR

Cherie Hiron’s ’79 has accepted a two-year assignment to the Okinawa Christian School. She teaches 15 fourth-graders who represent a variety of backgrounds, cultures, and levels of ability. Although Cherie’s work is challenging and Satan seems very real, she writes, “It is very beautiful here. The people are beautiful, too. And the Lord is more beautiful still.” Cherie’s address is Okinawa Christian School, Box 42, Urasoe, Okinawa, Japan 901-21.

Norm and Virginia (Gilchrist ’50) Hoyt report from South Africa that they are now working with Indian churches. Norm is coordinator of the Extension Bible School and Virginia is busy with women’s groups. They both do visitation in Hindu homes. The Hoyts reside at 19 Moodie Crescent, Montclair, Durban, 4001, South Africa.

David Brown ’72 is involved in mission work in France and hopes to eventually serve in North Africa. His new address is c/o Michel Reboullet, Villa Les Iris, Ave De La Cible, 13100 Aix-En-Provence, France.

Suzanne K. Surber ’73 is serving at the Christian Academy in Japan. Her address is 2-14 Shinkawa-Cha, Higashi Kurume-shi, Tokyo, Japan 180-03.

Donald ’57 and Barbara (Benjamin ’59) Love report from the Philippines that their mission work continues and so does their need for the prayers of fellow believers! They recently had their home burglarized, which is not an uncommon experience for the ABWE missionaries there. The Loves would appreciate hearing from you c/o ABWE, Box 5000, Cherry Hill, NJ 08034.

For Ruby Enns ’52, the missions experience in India continues to be full and busy one. She is thankful for the prayer support of friends as she works with International Missions, Inc. You can write to her at 14 Hutchins Rd., Cooke Town, Bangalore, India 560005.

Lee and Bonnie (Rauch ’65) McCullough continue to serve the Lord with Greater Europe Mission. The family has claimed Romans 5:2 for the year: “... we confidently and joyfully look forward to actually becoming all that God has had in mind for us to be.” The McCulloughs live at 553 Liles Road, Apt. 4, Carol Stream, IL 60187.

Stan and Joanne (Duto ’54) Maughlin are thankful for support of their work in Zaire. They also are grateful that Joanne finished her chemotherapy and all tests are negative. Now the Maughlin family, including four children, are at Bethel College in Kansas where Stan is teaching Industrial Arts. Their hearts are still burdened for Zaire, though, and they urge support for the work of the United Methodist Church around the world. The Maughlins reside at 413 W. Broadway, Newton, KS 67114.

Patricia Moore ’69 reports that a great deal of suffering has taken place in Indonesia (where she is a missionary) because of a severe epidemic among babies there. The new Christians facing extreme trials need special prayer. Also, Pat covets prayers for another missionary couple to join the staff in Senegao and for the ongoing translation work. Pat’s mission address is c/o TEAM, P.O. Box 969, Wheaton, IL 60187.

David ’65 and Karen (Plueddenman ’66) Horsey are excited in Kenya about the birth of their first son, Jonathan David, born October 23, 1979. Although he was 6½ weeks premature, he has survived many complications and is now in good health. (Jonathan has two older sisters: Margo, age 9, and Melinda, age 3.) While Karen was in the hospital waiting to deliver, Dave was busy coordinating the annual African Directors’ Conference. Their mailing address is P.O. Box 21485, Nairobi, Kenya, East Africa.

Tom and Dotty (Keeler ’56) Hash share that after beginning their ministry 24 years ago with just the two of them, they have reached the state of being only two again. Their three children are all enrolled in college and now Tom and Dotty are traveling together to carry on the ministry of the Asia field director. They are with Overseas Christian Servicemen’s Centers, P.O. Box 10308, Denver, Colorado 80210.

Ann Kemper ’77 is teaching Bible knowledge and English grammar at a school in Zing, Nigeria. She says she has a new appreciation for school teachers in America! Ann’s address is P.O. Box 659, S.U.M.U.M., Jos, Plateau State, Nigeria.

Marie Heinemann ’38 retired this spring from her position as missionary-teacher with World Gospel Mission in Burundi, Africa. She is spending this year in deputation work and is living at Apt. 20, 425 20th St., S.E., Haron, SD 57350.

Barbara Hovda ’63 keeps a home in Taiwan supplied, organized, and restful for the many missionaries who are weary with all the activities that make up modern missionary life. Barbara will be taking a six-month furlough beginning in March, and she can be contacted c/o her sister Eunice at 407 South 2nd Street, Buffalo, MN 55313.

Lila (Hansen ’54) Cosmades and her husband Thomas request that, since 1980 has been designated as “Year of Evangelism” in Germany, we remember to pray that God will do a mighty work there. Their address is Sohlibacher Str. 180, 5900 Siegen 21, W. Germany.

Phyllis A. Engel ’58 has accepted the position of librarian at the David Livingstone Teacher Training College, Private Bag 1, Livingstone, Zambia. She will be working as a missionary with the Brethren in Christ Church. Prior to this, Phyllis spent 7 years in a literary ministry in Rhodesia.

John ’51 and Marsha Emery continue to experience God’s blessing in Quito, Ecuador. They ask for prayer for the busy months of furlough ahead of them. The Emery’s current address is Alliance Academy, Casilla 6186, Quito, Ecuador.

Donna Colbert ’54 is serving with the Evangelical Mennonite Church in Belgium. Her address there is 15 rue de la Valee, 1050 Bruxelles, Belgium.

Ralph and Eunice (Davis) Dodge, both ’31, have returned to Rhodesia (with the United Methodist Church) to serve as missionaries to thousands of African refugees who have fled the war zones. They are living in a “miniature” apartment at P.O. Box 3408, Salisbury, Zimbabwe/Rhodesia, Africa.

DEATHS

L. Lyle Case ’35 passed away on April 13, 1979. His wife, Ida ’35 is now making her home with her daughter and son-in-law, Janet and Gary Langenwalter.

Mary H. (Young ’42) Wilcox, 61, died October 26, 1979, after being ill for some time. Her husband, Robert Wilcox ’41, is supervisor of instruction for the Maysville City Schools (KY). Surviving also are two daughters, Becky ’71 and Barbara (’Bobbi’) ’78 and a son, Steve ’89.

Mary centered her life on her home, church, and school (where she taught for several years). She was a faithful member of Central United Methodist Church and was active in the Gideons Auxiliary, as well as holding numerous offices in the United Methodist Women’s Organization. The Wilcox family resides at 605 Florence St., Maysville, KY 41056.

Lester M. Bonner ’24 passed away November 11, 1979, at the age of 90. His sister, Mary Bonner, lives at 700 Bowar Hill Rd., Pittsburgh, PA 15237.

Della (Ringel) Clay x ’24 died on September 20, 1979 in Spiceland, IN. Surviving are a son and a daughter who report that Della never failed to be interested in Taylor and its happenings.

William Bruteyn ’63 passed away on April 2, 1979. He is survived by his wife Lois (Charles ’63) and sons Jeff (9) and Todd (7). For the past ten years, Bill headed Family Dentistry Associates in Lancaster. Lois resides at 218 Riveredge Dr., Leola, PA 17540.

Calvin Revis, husband of Rosemary (Weston ’46) Revis, died October 16, 1979, of a heart attack. Survivors include his wife, two sons, and two daughters. Rosemary’s address is Box 71, Van Buren, IN 46991.

Ruth Hayes, the wife of Robert Hayes, former professor of education and head of the Education Department from 1959 to 1963, died of cancer on Friday, March 14, after an extended illness. Dr. Hayes, who is president of Marshall University, would appreciate your prayers and cards. His address is 1040 13th Ave., Huntington, W. VA 25701. Mrs. Hayes was the sister of George Harrison of our Biology Department.
I suppose all of us have to be considered expendable, but Bob Stoops simply cannot be replaced. One of Taylor’s greatest friends, and a rare friend to many, Bob entered eternity October 18, 1979.

Director of Land and Property Resources at Taylor the past ten years, Mr. Stoops created a standard of service and caring that is a challenge to us all. And those who depended on him for personal and financial counsel will never forget this man who was so thoughtful and astute.

Bob spent most of his life in a highly-productive farming business near Tipton, Indiana. Some of his work was so creative it was featured in Life Magazine in 1956.

University officials invited Bob to join the Development staff in 1969. When Bob became convinced that he could perform a useful service here, he accepted the invitation. But Bob also came for another reason: Taylor had been so helpful to his daughters DeeAnn and Janie during crucial times in their lives that he wanted to express gratitude in some significant way.

Shortly before he was taken from us, Bob shared the following with Gordon Leffingwell, a close friend and colleague: “When I reflect on my life, I think of the best I have been able to give, and it is as filthy rags.” Gordon responded: “If a man like Bob Stoops, who has given so much to so many, can have such a humble perspective in his final days, my life calls for re-assessment.”

Quite often during his decade of tireless service, Bob coped secretly with physical distress. Because his was a quiet, personal, but complex ministry, most people on the campus were unaware of the magnitude of Bob’s calling and of the self-discipline he exercised.

During a memorial service held on the campus October 28, Gregg Lehman, Executive Vice President, observed, “When mourning the loss of a dear friend, we often feel helpless and sometimes bitter. We need to approach our lives now as Bob did every day—with a sense of vision and a challenge to live each day in greater service.”

President Milo A. Rediger, summing up the past twelve years of knowing Robert Stoops, concluded, “For him, like Paul, to live was Christ and to die is gain—for to be with Christ is far better.”

Bob’s widow, our dear friend Betty Stoops, resides at 220 W. South St., Tipton, IN 46072.

Note: A Robert L. Stoops Memorial Fund has been established to which contributions may be given.
Robert L. Stoops 1920-1979

"I had the utmost confidence in Bob Stoops. He had a marvelous love for people." Ruth Flood, Beacon Woods, Florida

"A great friend—that's how I describe Bob Stoops. He had a deep commitment to serving others." Harold Snyder, Mancelona, Michigan
