Keeping up appearances  My life at sea  Why study the polar mesosphere?
...a covenant 'twill be between us; but, whatever fate befal thee, I shall love thee to the last...

From Michael by William Wordsworth, poet, 1800

His oath, His covenant, His blood support me in the whelming flood; When all around my soul gives way, He then is all my hope and stay.

From the English hymn Solid Rock by Edward Mote, cabinetmaker, 1836

Come, agree, the law's costly.

From Polite Conversation by Jonathan Swift, author, 1738

Do not say to yourself, “My power and the might of my own hand have gotten me this wealth.”
But remember the LORD your God, for it is he who gives you power to get wealth, so that he may confirm his covenant that he swore to your ancestors, as he is doing today.

Deuteronomy 8:17,18

We must indeed all hang together, or, most assuredly, we shall all hang separately.

Remark, July 4, 1776, at the signing of the Declaration of Independence by Benjamin Franklin, U.S. statesman

Outside of our class, beyond our majors, there were some pretty big life lessons we learned at Taylor. Some people seemed to figure out things pretty easily. As for the rest of us . . . well, let’s just say we caught on eventually. And in the end, maybe, we’re a little better off for

the lessons we learned while at college.

Occasionally take a chance to learn something different, to take on something outside of your interest. I took a class on Russian civilization and as a result developed a lifelong interest in Russian art and Russian life.

Robert Gilkison ’57, Williamsburg, Va.

Avoid summer make-up classes.

Ralph Wolford ’49, Cincinnati, Ohio

I learned how to study at Taylor, though not until my junior year. I’m lucky I survived. And now I’m working on my doctorate.

James Fereira ’81, Circle Pines, Minn.

I took too many courses that I thought I had to take and not enough that would have been more enjoyable.

Jay Riggle ’78, Erie, Pa.

One hundred pennies, inserted between the door and the frame, provide a lot more than a dollar’s worth of entertainment.

Anonymous ’84
I learned how much my parents loved and cared for me. They couldn’t afford the cost of Taylor, but they sacrificed to give me a great education.

Anne Lee Boyer ’94, Fort Wayne, Ind.

Work to hear the voice of the Lord, and listen for the direction He wants you to go.

Alicyn Jacobus Amann ’86, Castle Rock, Colo.

There was so much going on, you have to know what your priorities are.

Elaine Warner Handschu ’60, Marion, Ind.

That my God will supply all my needs as it says in Philippians 4:19.

Ellen Smith Culp ’31, Gaithersburg, Md.

I learned spiritual lessons, to spend more time in God’s word and prayer.

Svend Abrahamsen ’66, Crossville, Tenn.

I learned not to go driving on the county roads in a snowstorm when the county declared the roads “closed.”

Anonymous ’74

I learned that college was definitely worthwhile for me - I met my husband.

June Pugh Bergwall ’44, Waterman Village, Fla.

You never know how a friendship will turn out. Freshman year, first day at Taylor, my square dance partner is now my wife.

Andy Albert ’01, Fishers, Ind.

Try to get along with your roommates; they could end up being your lifelong friends.

Lucette DeKruyter Bamford ’73, Oak Brook, Ill.

Never take calculus at 8 a.m. first semester of your freshman year.

Michael McGee ’92, Greenwood, Ind.
At the newsstand

The January 2004 issue of Kiplinger's Personal Finance listed Taylor University as one of the top 100 best values in private colleges in the United States. Taylor was also ranked as one of America's best colleges in the 2004 US News & World Report survey.

Kiplinger's evaluated more than 1,300 private schools "to determine which combine academic excellence with generous aid packages and lower total costs." Taylor ranked 64th. In the U.S. News survey Taylor ranked number two overall against the more 150 other schools in the Midwestern Comprehensive Colleges - Bachelors category and ranked as the highest among the top 10 colleges in the same group in areas like selectivity and alumni giving rate.
A few words about this issue, the answer to some questions we've been getting, and a word about spring…

While the University has been in the publications business for much of her 158-year history, this issue stands out from its predecessors in that it is on larger paper. But the essence has not changed. It is still basically an oversized version of the update letter your family sends out each Christmas.

If the last magazine you have received is summer 2003, you haven't missed anything. We replaced our fall/winter edition with an enhanced, expanded President's Annual Report. Consequently the alumni notes this spring issue are jam-packed.

Ah, spring. The flowers that pop up around the bell tower on campus remind me that life is unbelievably beautiful – and short. This spring issue of the magazine is dedicated to the countless alumni who receive little of the spotlight now but in the end will get the sort of recognition that matters most. Keep the faith, keep at it, and keep going.

D. Ritchie

They have class

It takes more than just a friendly smile to be a great teacher. The 72 graduates from last year's class who work as full-time teachers in 20 different states and three foreign countries are finding that out first hand.

"I go in an hour early and stay late whenever I need to," explains Ashley Weaver '03, a high school U.S. and world history teacher at Eagle Valley High School, Gypsum, Colo.

Eighty-eight percent of those who graduated in 2003 with a major in elementary or secondary education are now employed using their degree.

Yet success in the classroom requires a lot more than just getting hired. Statistics show that the drop-out rate for new teachers nationwide remains high.

Weaver credits her successful start to, among other things, strong support from her principal and fellow teachers.

"I can't imagine having a different profession," remarks Weaver. "It's hard work ... but I love it."
The space within

Not many people set out to build a chair. Adam Becker '04 did. "My grandfather built homes, so I'm especially interested in art that can also serve a very functional purpose."

Becker unveiled the chair to the public at his senior show entitled The Space Within, which opened on September 28, 2003, and ran through October 18.

"It took so long," Becker said. "But it was a great learning process. I especially enjoyed the actual design phase."

-Gina Putaite '04

A healthier, stronger community

How do you build a better leader? The CEOs of more than 30 Fort Wayne, Ind., area non-profit organizations are finding out.

For the past three years Allen County non-profit leaders have been attending monthly workshops on leadership development – and iOE, the Institute for Organizational Effectiveness, is spending $3 million making sure they have the best learning experience possible. The Institute uses the funds, provided by a grant from the Fort Wayne-based Foellinger Foundation, for training, servicing and supporting the participating organizations.

The executive leaders have the opportunity to learn from nationally known speakers, apply for a planning grant of up to $45,000 for their organization, and participate in a "coaching" relationship with a CEO of another area non-profit group. "The most important individual benefit from my involvement with the iOE has been the fellowship and support from the other cohort members," explains Stan Veit, executive director of Lutheran Social Services of Indiana.

With the successes of the initial years of the program being recognized by Fort Wayne Mayor Graham Richard and others, the Foellinger Foundation recently provided an additional half million dollars to fund the Institute through December 2005.

The Institute believes it can help those groups achieve world-class nonprofit performance. And the iOE does not seem to be alone in that belief. Already, people from several states from across the country have contacted Garrett Cooper, executive director of the iOE, and asked how they can replicate the program's success with nonprofit groups in their area.

Taylor University, which serves as the fiscal sponsor and provides project oversight, is also pleased with the Institute's success. "The iOE," explains Cooper, "provides the University with a means to contribute directly to strengthening the fabric of the community."

For more information about the Institute for Organizational Effectiveness, contact Garrett Cooper at grcooper@taylor.edu or 260-426-9446.
Faculty accolades

Professors are far too familiar with the tension of being both an accomplished scholar in their field and an excellent teacher in the classroom. To truly challenge students, professors must master their subject and develop a passion for pedagogy. Scholarly research presented in a timely, engaging manner can ignite the creative spark for undergraduates.

Dr. Thomas Jones, director of the University’s newly-funded Center for Teaching Excellence, speaks with enthusiasm about “dynamic classrooms where students are nurtured and challenged and pushed.” The Center will function on about $150,000 annually thanks to the interest being generated by a $3.5 million grant from the Lilly Endowment, Inc.

While the Center begins its work, faculty members continue to study, write and pursue research. The items to the right are a sampling of their recent undertakings:

Dr. Matt DeLong, mathematics, with Dale Winter and Carolyn Yackel, published “Management, Motivation and Student-Centered Instruction I: Analytical Framework,” in the June 2003 issue of PRIMUS, a quarterly journal devoted to all aspects of teaching undergraduate mathematics. They also published “Management, Motivation and Student-Centered Instruction II: Applications,” in the September 2003 issue of PRIMUS.

Dr. Ken Kiers, physics, received a research grant, “RUI: Theoretical Investigation of CP Violation in Non-Standard Models,” from the National Science Foundation. The start date was July 1, 2003.

Dr. Joe Ricke, English/honors program, presented the paper “Cleanliness and Chaucer’s Parson: the Influence of Wycliffite Images of Ministry on Chaucer’s Portrait of the Ideal Parson” at the “Revisiting Chaucer and Christianity” Conference held at Canterbury Cathedral, Canterbury UK, July 21-23. He also played the role of King Herod in a Middle-English performance of the mystery play Herod and the Slaughter of the Innocents, part of an evening of readings and performances in the Cathedral Crypt.

Dr. Edwin Welch, coordinator of academic support services, presented “Equal Access: the Harmony and Dissonance,” at a pre-conference workshop at the National Association for Developmental Education in Austin, Texas, in February 2003. He also published “Serving Students with Disabilities: A Process Model for Establishing and Evaluating Services and Programs” in The Learning Assistance Review.

Meanwhile, in other University news...

As spring returns so do the regular close encounters with wildlife on campus. Deer wander by, dogs trot through, and geese glide overhead. No big deal. Yet one group of little creatures consistently gets second glances from visitors and locals alike — the black squirrels.

Possibly migrants from Canada where their heat-absorbing dark coats helped protect them from the harsh cold, the black squirrels seem to have made themselves right at home in Upland. Their high wire, tree top antics keep people grinning – and ducking when the occasional nut comes flying in their direction. No one can say exactly how long the black squirrels have been a part of the campus landscape, though some old men in the barbershop downtown will tell you they escaped from traveling carnivals in the 1920s. Others in town claim that the owner of a local business thought that black squirrels would be a nice attraction for the community, so he imported some from Michigan.

While most are entirely black, others have melanistic features such as lighter bellies and/or tails. A few even sport a midnight coat and a red tail. “Black squirrels are actually the same species, Sciurus carolinensis, as gray squirrels,” explains Biology Professor Jan Reber. “They are just a different color morph,” she notes.

Whether scampering across the light green lawns in their contrasting coats or traversing the tree tops, black squirrels have found a place in the hearts of students and professors. Now if they would just stay out of the bird feeders.

—Serena (Thrush) Duke ‘04
2004 spring sports preview

Have you ever seen someone running with a grin on their face in single digit weather? January and February again provided campus with a reminder of why the members of the men's cross country team are nicknamed the Jar Heads and the women are called the MadDawgs. At least they wear wool hats. Even with a good deal of construction still to go, the new indoor track in the Kesler Student Activities Center has students and athletes alike excited.

The fall sports season ended well. Highlighted among the team records was the 5 and 1 conference finish for the women's volleyball team. They came out 31 and 11 overall. Also noteworthy was the men's basketball team's home victory to clinch the MCC championship. It's now time for the spring teams to take their shot at producing a season for the record books.

Golf: As new head coach Jon Ochs prepares for his first season, he should be excited about having five returning players for the 2004 season. The group played exceptionally strong in fall tournaments, winning the Huntington Invitational. Seniors Joe Zimmerman and Bryan Simmon lead the squad as they chase the MCC title.

Baseball: Four seniors will lead the Trojans in the 2004 season. Kenny Miller, Cory Neuenschwander; Ryan Rupp and Matt Alspaugh will head the Trojans' effort on the diamond. Greater pitching depth should give TU its best shot at advancing to NAIA Regionals in several years.

Softball: Seniors Brandy Thornburgh and Brooke Kanitz will spearhead Coach Stephanie Smith's 2004 club. Four freshmen will add to the mix as the Lady Trojans look to move up to the upper half of the challenging MCC.

Women's Track: With only three seniors, one might think the Lady Trojans are in a rebuilding year, but a strong group of underclassmen will keep the team very competitive. Jennifer Kamps, Rachel Stuckey and Katie Spencer will lead the TU effort. Spencer and Carolyn Betteridge return as NAIA National qualifiers.

Men's Track: The Trojans seek their tenth straight MCC crown this spring, and have the depth needed to pull it off. Seniors Andrew Burgess, Matt Docter and Matt Abernathy, along with junior All-Americans Richie Gibbs and Bryan Jackson, head a talented squad ready to meet all challengers.

Women's Tennis: Coach Dara Syswerda will be depending upon senior Kristel Bailin and her MCC Champions in #1 doubles, Holly May and Kathy Clark, to lead her squad into the NAIA Regional meet in April. This is the second year in a row the Lady Trojans have reached the Regionals, and hopefully the experience will be the difference as the club attempts to reach NAIA Nationals for the first time.
Rats

Dr. Tim Burkholder, biology, along with Taylor pre-med students Gabrielle DePlanty and Rachel Holt, spent the summer of 2003 doing cardiovascular research. They studied the anatomic innervation of the rat heart, and were especially interested in the parasympathetic pathway of the Autonomic Nervous System. Over 50 rats were operated on. The two senior biology majors made presentations at the Indiana Academy of Science meeting Nov. 17, 2003, at Anderson University. DePlanty presented “Effect of Extraseptal Fat Pad Ablation on Vagal Control of Cardiac Response in Male Sprague Dawley Rats” and Holt presented “Physiological Response to Systemic Injection of Acetylcholine, Nicotine, and Muscarine after the Surgical Removal of Various Fat Pads Located on the Rat Heart.”

You must have pretty strong stomachs.

Brie: I’ve always been able to handle the sight of blood.
Rachel: My dad was accident prone so I enjoyed watching my dad in the emergency room getting his gashes and cuts sutured.

What exactly is Extraseptal Fat Pad Ablation?

Brie: It’s fat located on top of the heart on top of the muscle.
Rachel: We would remove those areas in order to do our research.

How did the presentation go with the Indiana Academy of Science?

Rachel: It went well. Afterward we answered some questions from various physiologists from across the state of Indiana.

What about all those rats?

Brie: We euthanize them.
Back to the drawing board

With lots of ideas floating around about where possible future buildings should be located and what campus improvements should take top priority, the University is in the process of creating an overarching campus master plan. The last time one was designed for Taylor was in 1981. After an extensive interview process with 12 different firms, the contract was awarded to the same firm that devised the plan in ’81.

Before the consultants recommend where to place potential future buildings, they will undertake an extensive interview and comment collecting process. During 2004, input from many members of the Taylor community will be solicited. In addition to locating structures, the consultants will be trying to determine how to place everything from roadways to landscaping to signage. For more information contact the office of administration and planning at 765-998-5200.

Ring downs or wing downs?

While the guys in Morris Hall are figuring out how best to prank their friends in Wengatz, the women in residence halls across campus are trying to decide whether a new twist on a quaint old tradition is for better or for worse.

The “ring down” ritual that celebrates a recent marriage proposal has become, over the decades, a hall-wide affair that sometimes includes hundreds of women. In Olson Hall, for example, late in the evening shortly after someone has become engaged, a bell is rung and all the residents are invited to the main lounge. The name of the bride-to-be is not immediately announced. Instead the engagement ring is tied to the end of a lit candle and a group of about 10 girls are called to the front and asked to pass the candle around their circle. On the second time around, the engaged student blows out the candle, the room erupts with cheers, and then the story of the proposal is told to everyone.

“It was wonderful,” recalls Lorraine (Matthews ’65) Ebright of her ring down. The traditions she experienced over 40 years ago mirror the ring downs that still take place on campus today. Ebright noted that every time a ring down was announced by a long constant ring on the dorm buzzer system, everyone would “drop what they were doing and flood down the stairs” to the main lounge for the ceremony.

Starting this past fall, the female PAs and the residence life staff began asking campus women to keep the celebrations limited to just the wing mates and close friends of the engaged. Now closer to 40 women, rather than 200, will be participating in the new “wing downs.” Student leaders want to place the focus on “celebrating the lifelong commitment to marriage” and hope the smaller setting will be even more intimate and meaningful.

How far back does this campus tradition go? Send your memories or comments to editor@taylor.edu.
from the president

An intentional community

I am more convinced than ever that we honor Jesus Christ by doing the right things, in the right ways for the right reasons. The ancient Hebrews often made the mistake of allowing the means to become the end—believing that if they perfected the system and followed it fully, God’s pleasure and blessing were guaranteed. My anchor verses for this academic year, Micah 6:6-8, reminds me that the precision of the system, and our adherence and commitment to it, will be ineffective in strengthening Taylor’s covenant community in ways that please Him if it is not a means for changing and equipping the lives of those we serve.

What can we bring to the Lord to make up for what we’ve done? Should we bow before God with offerings of yearling calves? Should we offer him thousands of rams and tens of thousands of rivers of olive oil? Would that please the Lord? Should we sacrifice our firstborn children to pay for the sins of our souls? Would that make him glad? No, O people, the Lord has already told you what is good, and this is what he requires: to do justly, to love mercy, and to walk humbly with your God.

To do justly requires doing the right things. Over the past three years at Taylor University we affirmed core values, focused mission, fine-tuned administrative systems, developed mechanisms for data enriched decision-making and identified strategic priorities. We have internal and external validations that our systems work both effectively and efficiently. All of this helps us to do better what we do best—to be a covenant community on a journey of Christ-centered discipleship.

To love mercy challenges us to do the right things in the right way so that we deliver the redemptive love of Jesus Christ to one another and a hurting world. Efficient systems and refined processes are not ends in themselves. I am in awe of how quickly and willingly the Taylor family responds to those in need. Whether it is a member of the campus facing a life threatening illness or an alumnus in need of an extended faith community to support them in a time of crisis, compassion abounds. Mercy is the spiritual marrow that strengthens and nurtures our resolve to inform minds, transform hearts and equip hands for competent, compassionate service.

And to walk humbly reminds us to do the right things in the right ways for the right reasons. What we do, and the way we do it, must be motivated by the desire to bring glory to God the Father. Taylor is a Christ-centered covenant community. We know that when it is all said and done only what has been said about and done for Jesus will have eternal value. Equipping men and women through living, learning and serving experiences to glorify God is the reason our covenant community exists. The fruit of that commitment bears witness to the life and work of our Savior in many places throughout the world.

This three-fold exhortation provides us with clarity, conviction and courage in these times when what Taylor University delivers is needed more than ever. Our 158-year legacy is a life changing and culture influencing force. We can be confident of God’s direction and provision as we embrace the call to be a covenant community doing the right things in the right ways for the right reasons. What a blessing to know that thousands of you join with us in this challenge to do justly, love mercy and walk humbly with our God.

—Dr. David J. Gyertson, president

New marketing efforts underway

When Georgia based Crane MetaMarketing, Ltd. arrived in Upland in 2002, they came to undertake the first extensive institution-wide marketing study of the University since 1987. Crane conducted thousands of student, faculty, administration, staff, board, parent and alumni surveys and interviews. Their findings, presented to the University last fall, contained volumes of useful information such as:

- Some of the leading descriptors included “academically rigorous,” “worth the cost,” “ministry oriented,” “clear about mission” and “transforms lives.”
- 77% of students surveyed admired their professors and found them accessible.
- 85% of alumni said they would choose Taylor if they had it all to do again.

“That’s a huge number,” said Patti Crane, president of Crane MetaMarketing, of the alumni percentage. “We are always happy when we see percentages in the 60s. Taylor is in the 80s and that is amazing.”

The data is still being analyzed, but according to President David Gyertson there is confidence among stakeholders in the methodology, findings and general conclusions of the Crane MetaMarketing study.

Even with the new look and feel that comes with a branding campaign, some familiar items at the University will remain unchanged. The athletic colors will continue to be purple and gold. The current TU or “cross and crucible” design will still be used as the official logo of the Upland campus. In addition, the Upland and Fort Wayne campuses will have their own distinct marketing studies and branding. —Jim Garringer
Keeping up appearances

She worked out at the fitness center for two hours every night and went back to her dorm exhausted. Unsatisfied with her body, she went out later and ran another six miles. This routine went on for a year until her close friend confronted her and told her the truth: she was anorexic.

Her story is not unique on Taylor’s campus. Seventy percent of the students last spring chose the phrase, ‘concerned about body image,’ as the most chosen descriptor when asked on a survey to describe their fellow peers.

While being overly concerned about how you look is a long leap from having a medical condition like anorexia, the two issues point to one reality - women at Taylor struggle with the same body issues as women on college campuses across the nation.

“When I started at Taylor, I was overwhelmed,” said a Taylor female grad. “I felt like I didn’t fit in and while I compared myself to others, I began to control my eating in order to look better. It eventually began to consume my every thought.”

“I continued going downhill and was hospitalized for a few days because my heart rate had dropped to 30 beats per minute,” explains another current student as she recounts a near death battle with her eating disorder.

“Each day was another struggle as I fought my mind, my heart, and my body,” she admitted.

While this is a deeply personal and often awkward topic to discuss, the Taylor community seems set on tackling the issue directly through two methods: Eating Disorder Task Force and the counseling center.

“Our desire is to be proactive about these issues and not solely reactive,” said chairman of the task force Julianna Hutchins. “We want to educate students and have people talk about body image issues and discuss how faith in Christ integrates with these issues.”

The Task Force was started by Lori Holtmann, former associate dean of students, three years ago.

“As I began to do more research on the issue and learned that eating disorders have reached epidemic proportions especially among college age women, I felt a responsibility to develop a plan of action for Taylor,” said Holtmann.

The Task Force is responsible for a week of campus-wide programming which coincides with the National Eating Disorders Awareness Week during the last week of February every year. During this week, chapel speakers focus on these issues, and the counselors and Task Force hold floor-based and campus-wide panel discussions and forums about body image.

“It is the goal of the task force to raise campus awareness and also promote, through comprehensive educational programming, healthy thinking about identity formation and the integration of our faith and who we are in Christ with that process,” said Holtmann.

Another available resource to help students cope with body image issues and eating disorders is the University counseling center.

“Taylor embraces the problem and we put our energy into developing our student leaders on how they can make the initial level of assistance to those suffering from this,” said Counselor Kay Keller.

“We had about 272 students seek counseling last year and while 25 came specifically for eating disorder treatment, almost 70 percent of the students indicated that struggling with overly critical thoughts about their body image and appearance was one of their primary issues,” said Director of the Counseling Center Bob Neideck ’82.

The counseling center sends a yearly survey to those who have sought counseling at the center and the feedback remains positive.

“From our survey, we’ve had favorable ratings,” said Neideck. “Ninety-five to ninety-eight percent say the counseling center helped them and would recommend people go there.”

Surveys done five to ten years ago showed almost no concern about body image or students struggling with eating disorders at Taylor. This issue is a relatively new phenomenon on campus, and it may be attributed to the shift in the youth culture in America.

Although body image problems still continue at Taylor, the counselors and task force members are assisting students to overcome this problem and make the campus aware of this problem.

“I recovered with the help of a counselor I met with every week,” said one Taylor alumna. “I also had a lot of indirect support from my small group, girls from my floor and chapel.”

“It was good to hear other women share their struggles with body image and self-esteem,” says a current student. “I felt somewhat alone in that struggle before I heard from these women.”

-Gloria Pudate ’04
Back to nature

After a 60 year absence, the University decided to offer a masters level program again in Upland. Three reasons why environmental science was the natural choice.

Like a runner who goes for her first jog of the season after spending the winter months indoors, there are some kinks to work out when one begins something again after a long hiatus. Steering a University back into offering graduate degrees has come with a fair bit of stretching and strain. But with science alumni already making news nationally and regionally and with local efforts making their mark around the globe, the new masters program seems to be off to a good start.
A steady hand at the helm
Why the EPA counts on Steve Johnson's balanced management

Before he had to deal with issues like acid rain and Senate hearings, Stephen Johnson '73 cut his teeth on Taylor University's horizontal rain and finals weeks.

"Sometimes I still think of myself as a Taylor student at Ivanhoe's or eating sausage barbecue pizza," Johnson quipped during a recent campus visit. These days, he's been known to eat in the White House Mess.

Johnson is now the acting deputy administrator of the United States Environmental Protection Agency, a position he was appointed to following the resignations of former EPA head Christine Todd Whitman and deputy administrator Linda Fisher. Johnson's appointment as acting EPA DA came from President George W. Bush this past July. He will continue in that role until he is appointed permanently or another successor is found.

While there can be a great deal of pressure managing 18,000 employees and a $7.7 billion budget, there are also the perks - one of which included an unexpected West Wing hallway encounter with White House Chief of Staff Andy Card. A moment later, President Bush, who was following Card, greeted him saying, "Steve, I think you are doing a great job."

"It is exciting to be in Washington and be a part of that team," said Johnson, who has watched national news stories that included the 9/11 terrorist attacks, the anthrax scare and the DC sniper attacks unfold from a front-row seat.

"There were F-18 [fighter jets] overhead, and smoke pouring from the Pentagon," he said. "They are days and times I'll never forget. [The response to 9/11] took team work; there were over 50 agencies and departments involved."

Before this presidential appointment as acting deputy, Johnson was appointed by President Bush and confirmed by the U.S. Senate as assistant administrator of the Office of Prevention, Pesticides and Toxic Substances (OPPTS). Prior to this job he served as principal deputy assistant administrator of OPPTS.

Looking back on his college days, Johnson confessed that while he felt he was getting a good college education at Taylor, he wondered how he would stack up against fellow graduates of the state universities. He now says the concern was unfounded. "I found out I was prepared as well as or better
“There can be a great deal of pressure managing 18,000 employees and a $7.7 billion budget ...”

equipped than those students,” he stated, adding Taylor was not only the place where he began his career but also where he met his wife Deborah (Jones) '72.

"[We learned the] value of community. Thirty years later, our lifelong friends are from Taylor," Johnson said. "It is exciting to see our kids experiencing the same thing we did in academics, values and friendships."

The Johnsons sent their three children Carrie '99, Matthew '02 and Allison, a current student, to Taylor, and also served on the Taylor Parents' Cabinet. Johnson is on the advisory panel for the new master of environmental science program. -Jim Garnger
Drew Daily has battled fires in forests, fields and just about anywhere else a fire can burn in the wildlands and he says that every one of them has one thing in common. They were started by people.

“Many of the fires in Indiana are less than an acre [in size]. In Indiana, 20 acres is a big fire; out west, 20 acres is small,” Daily said. “The major cause is trash fires, debris, camp fires and warming fires; a lot of times it is [caused by] a lack of awareness.”

Daily, a 1996 Taylor University graduate, was recently named assistant state wildland fire coordinator for the State of Indiana. At one end of his job with the state’s Department of Natural Resources, Daily works to prevent forest and wildland fires, while at the other he manages a program that prescribes the careful implementation of fire for forest health. From his office in the Morgan Monroe State Forest near Martinsville, Ind., he is currently developing a prescribed fire management course to be taught at Ball State University later this year. There are numerous other aspects of his job that include firefighter training, disaster assistance and fire prevention programs.

And Daily has traveled to other states to assist in forest firefighting. “You work 16-hour days in dangerous conditions and on rugged terrain and throw fire in on top of that and you’ve got a whole lot of excitement,” Daily said. “I hate to see it happen, but when it does, I want to be there.”

His dream was almost derailed in college when he struggled initially with his academic pursuits. After taking a couple years off before returning to complete his degree, he pursued his studies with a newfound sense of urgency. “I turned my love of the outdoors into a career,” Daily said. “I’ve been really fortunate to be surrounded by professionals who pushed me to be my best. It started at Taylor with Dr. Squiers and Dr. Rothrock.” Squiers said he was humbled by Daily’s compliment. “He in large measure is what he is today because of himself; he made the connection of, ‘What I do today at school is in fact the determining factor for what I do in my career and in my life,’” he said.

Daily said the goal of any forest and wildlands firefighter is containment and survival. “We don’t have the option of putting a (forest) fire out. It has to put itself out,” he said. While the tools for forest firefighting include leaf blowers, chainsaws, torches for backfires and pickaxes, Daily says teamwork is the key to defeating a forest fire and to living to fight another day. “We rely on others to help us with escape routes, safety zones and watching the weather,” he stated.

“There are a lot of constants, but a lot of things can change. A fire with moderate behavior and flames of only one foot can change to a fire with aggressive behavior with flames of twenty feet in a matter of seconds. Fire moves exponentially.”

The teamwork Daily said he experiences with his colleagues at the DNR is gaining a national reputation. “Indiana is becoming well known nationally for having top notch firefighters,” he said. “If you see a forest fire being reported on television, you can almost be guaranteed there are people from Indiana there.” Even with a big title, Daily still loves to get his hands dirty. “All you can get done with the staff we have is unbelievable,” he said. “I am one of the fortunate people who get to live out their dreams. I always wanted to be a park ranger and a firefighter.” —Jim Garringer
The goal of a wildlands firefighter is containment. "We don't have the option of putting a [forest] fire out. It has to put itself out."
This past September, for the first time in over six decades, graduate students again were a part of the community at Taylor University. The Upland campus welcomed nine students pursuing a master of environmental science (MES) degree.

In January 2003 Taylor received official notification from North Central Association (NCA) that the graduate program in environmental science was approved at the meeting of their Institutions Actions Council. The NCA is a private organization involved with public and private school accreditation in 19 states. NCA accreditation is voluntary, but makes a strong statement to prospective students and to other institutions about the University's commitment to strong academics. "The bestowal of accreditation on our new graduate programs marks another stage in Taylor's development as a full-service, Christ-centered liberal arts university," said Dr. Dwight Jessup, vice president for academic affairs and dean of the University.

The Taylor University MES program plans to grow to 15-18 students a year. An anonymous gift to the University has paid tuition costs for each student for the program's first 15 years. "Thanks to the hard work of our Taylor faculty and the generosity of our friends, the new MES degree program will provide our students with a nearly one-to-one faculty involvement and tie them more closely to the environmental scientific community," said Dr. Steve Bedi, Taylor's provost.

The MES program is the latest step in a process that began 23 years ago when the first environmental science courses were offered at Taylor. "Our program is unique in that a school like Taylor has been able to assemble an array of scientists who are specialists in environmental science," said Dr. Edwin R. Squiers, chairman of the earth and environmental sciences division. "We will be tailoring the program to link each student's individual skills and interests to their career goals."

The Four Plus One option, open to students entering Taylor's environmental science program, will allow them to complete their bachelor's and MES degrees within five years, with the fifth year's tuition paid by the school.
Forty years of technical titles

When students sign up to attend the “Annual Science Seminar Series” they know what they’re in for – presentations full of words like “genetic algorithms” and “pharmaceutics.”

This year will mark the 40th year for the series at Taylor. The 14 lecturers in the 2003 line-up included Dr. Jeffrey Patrick of Indianapolis-based Eli Lilly and Company. True to form, his lecture was entitled, “Biotechnology, Mass Spectrometry, and Characterization - The New and the Tried and True.”
A global reach

Work by two faculty members in Taylor's earth and environmental sciences departments is making an impact, not just beyond the village border, but well beyond America's borders.

Dr. Mike Guebert, professor of geology, led a team of students to Guatemala to drill a well for drinking water during the January Interterm. The students worked in two groups drilling a well in the village of El Triumfo. While they were there, they also gave hygienic lessons to children and adults in the village while teaching 75 students at the local grade school how Jesus is the only source for Living Water. "The entire team worked together with encouragement and teamwork," Guebert said.

Fulbright Scholar Dr. Richard Squiers was the lead author of the newsletter of the Russian Academy of Science. "I think it speaks to the global reach of Taylor University," Squiers said, adding that he has been invited to read a paper that compares theistic and atheistic views of creation at a poetry conference in Roanoke, Va. in March.

All in the family

After a dozen years in the making, "Flora of North America" issued volume 23 which covers the sedge family. Paul Rothrock (TUU biology/environmental science) contributed to the treatments of Carex section Ovales and Carex section Paniceae. The volume, published by Oxford University Press, represents the first comprehensive review of flora for our part of the world. Rothrock notes, "We now have over 840 species of sedges and are still counting."
A life together
Even the most ordinary activities have doxological overtones.

A smile from someone you don't know.
When people visit the campus, they talk about “the good feeling” they get from folks around here. They are sensing our community. They are sensing a unique bonding that exists between students and faculty members who have come from across the country and around the world. This reality of strong community life has been associated with Taylor for decades, and in that time there has been lots of good opportunity to think about what it all means.

How should community be practiced?
Taylor defines itself as a “Christian” institution. In the New Testament, one of the characteristics of the new Christians was that they “continued in fellowship.” This fellowship was not just one grand party time, but rather one where people stuck with each other – even through the difficulties of life.

We are to look for ways to encourage one another. “Bearing one another’s burdens” gives a positive focus to how community is practiced as opposed to the confraternity of a legalistic lifestyle. It expresses and is motivated by a love for God and for others as opposed to being a self-righteous “Thou shalt not…”

Community also is practiced in not offending one another. Love for God and for one’s brother shows care for the attitudes, needs and even foibles of others.

Can community be legislated?
Perhaps, for Taylor University, it is appropriate to re-examine the Life Together Covenant (LTC) to avoid any legalistic emphasis of issues not adequately based on Scripture (Colossians 2:28ff). The problem of legalism is that it causes people to focus on their works and their efforts at righteousness rather than upon the mercy of God.

The church, throughout its history, has often oscillated either towards antinomianism or neo-nomianism. The danger of antinomianism is that one more easily devolves into a self-indulgent lifestyle devoid of glorifying God. The apostle Paul strongly rebuked those who believed that “I enjoy sinning and God enjoys forgiving, so we can both be happy” (Romans 6:1f). Neo-nomianism, on the other hand, diminishes the finished work of Christ and a salvation that is by faith alone. Both extremes attack the Reformational sola fide.

While antinomianism defangs the law which Christ necessarily has completely fulfilled to satisfy all righteousness, neo-nomianism makes our salvation, or at least our sanctification, a matter of works. The spirit of a life lived out to the glory of God does not swing to either of these extremes. The LTC ought proactively to be more clear in its emphasis of this via media.

A life of love
Our actions are to be guided by two loves; a love for Christ and a love for each other. In light of the Reformational sola scriptura, we must look to Scripture alone to define how a life motivated by love ought to be lived. And with a heritage of strong community life to build on, we must work diligently to preserve this important aspect of the Taylor ethos.

— Hadley T. Mitchell, associate professor, business, accounting and economics department

There is a unique bond that exists between students and faculty members who have come from across the country and around the world. This reality of strong community life has been associated with Taylor for decades.

"A Life Together" is excerpted from a longer essay, "The Covenant Community," which is available as an exclusive Online Extra in the current issue of the online magazine. The essay provides an in-depth examination of how a broadly evangelical institution incorporates the idea and ideals of covenant community. Read more at: www.taylor.edu/magazine/
My life at sea

How one grad is making a smooth transition from scholarship to service

by Abbie Hansen '97

Tony Van Alstine '03 spends some afternoons scrubbing decks and other afternoons at the helm of a 522-foot converted cruise liner. His free time sometimes entails Ultimate Frisbee with up to 30 other crew, and is sometimes just him and a piece of rope - hour after hour spent trying to master 20 different sailor knots. At nights, Tony retires to his cabin, about a 10-by-8 foot space he shares with a Canadian and a Ghanaian.

Tony is a volunteer onboard the Anastasis, the flagship of Mercy Ships.

“This is one of the best things Christianity has to show the world,” Tony says.

He's here, in part, because of some advice he heard as a student at Taylor University. Tony remembers Bart Campolo saying during one chapel service: Commit to giving God your first year out of college. It could be in the form of a 9 to 5 job or it could be in full-time missions. But give that year to God.

The words echoed in Tony's mind as he prepared to graduate, and eventually guided him up the gangway of the world's largest non-governmental hospital ship.

Medicine?

While Tony majored in philosophy, he also took all the required pre-med classes. He felt drawn to medicine but wasn't sure if he wanted to attend medical school straight out of college. During his senior year, Tony and several other students drove to Kentucky for a medical missions conference. Tony grabbed a brochure for Mercy Ships as he passed its booth. “It struck me as really innovative,” he says, “a hospital ship versus mobile teams on the ground.” Mercy Ships currently has two ships – and a third one undergoing its conversion from ferry to hospital ship – that dock in Europe and North America for several months each year to procure supplies and give tours. The bulk of the year, though, the Anastasis and the Caribbean Mercy provide free medical care in developing countries, in West Africa and the Caribbean, respectively.

Tony tucked the brochure away. Several months later, he lay in bed one night and thought, “Mercy Ships! That's what I need to do next year.”
He applied the next morning. Tony was
told that although he would not be able to
work in the medical department, he could
sign up to watch surgeries. He hoped he
would learn if medicine was for him. His
dad supported the decision. “Yeah,” his
dad told him. “That’s the thing for you.”

Other family and friends also backed him
and help pay (along with Taylor professors,
his church and a Lion’s Club from his
hometown) the $428 a month in crew fees
for Tony to volunteer with Mercy Ships.

The community
Tony was disappointed at first when
he learned he would work in the ship’s
reception. He worked odd shifts and
some weekends for two months, fielding
questions, orienting newcomers and
directing calls. It wasn’t a job or a schedule
he would have chosen. “I was serving in
a way that wouldn’t be my first choice.
But I learned patience,” he says. “It was a
humbling experience and it changed my
heart in some ways.”

He was told that once the deck
department had an opening, he could
transfer.

Until then, he began to find redemptive
aspects of his job. Working weekends had
meant wishing other crew well as they
left for weekend trips around Europe. It
meant forced solitude. Tony spent much of
this time with God – something he hadn’t
had as much time for in the busy months
since graduation.

His attitude shifted. “Time with God,”
he says, “is more precious than any
weekend travel.”

And despite the initial frustrations
with his job, Tony felt Mercy Ships was
providing a smooth transition from college
life to life beyond. “Here,” Tony says,
“there are so many Christians from all
over the world. It’s the next step, seeing
the global church interact. There’s no way it
could work without God being behind it.”

The Anastasis carries volunteers from
about 35 countries. A woman from Ghana
told Tony she imagined working and living
with other Christians would be just about
on par with heaven. After boarding the
ship, she told Tony, she found it wasn’t at
all like that. “It’s the real world,” Tony says.

During the frustrating times, Tony tries
to keep perspective by thinking about
why he’s here. “I think about the people
we’re going to serve,” he says. “Their
entire infrastructure of economy has been
bombed out. They struggle daily for food
and water and medical attention. They’re
in desperate need. My not wanting what
they’re serving for dinner, or issues with
my cabin being too small and the guys
next door being noisy, or not getting
the schedule I would want seems pretty
insignificant.”

Ship life
For his seven months onboard the
Anastasis, Tony packed some Frisbees,
photos of friends and family, and books –
loads of books. He brought *All Quiet
on the Western Front, Les Miserables,
Harry Potter and the Order of the Phoenix,"*  
Confessions of St. Augustine and Shadow of
the Almighty.

Tony did not bring his guitar. He
thought his cabin would be too small. Not
bringing it, he says, was one of the top
10 stupidest things he’s done. Although
the cabins are small, he would have had ample
space for a guitar.

Sometimes, in the middle of the night,
Tony wakes up and sees his roommate
Ebenezer from Ghana lying in bed,
reading his Bible. “The beauty and
sincerity of his faith just really impresses
me,” Tony says. “These people who have
come from Africa and have seen violence
and destruction – in Liberia and Sierra
Leone – they still praise God and they
still work with all their energy to make a
difference. Instead of falling into despair,
they jump into action.”

Tony has not only been encouraged in
his faith, he has found himself doing the
same for others. Although sometimes at
Taylor he felt he wasn’t making much of
a difference in Upland, he is now grateful
for those years when he had time to think
through various theological questions –
such as the existence of God and whether
or not Christian faith is compatible with
evolution – and come to conclusions on
some issues and rest in the mystery with
others.

“God used that time to shape my mind
and to shape my heart,” Tony says. And
he has had answers for fellow crew’s
questions. When a friend on the ship
was questioning whether or not the
devil exists, Tony thought back to the
ontological nature of evil. “I just received
so much truth at Taylor,” he says.

Working the deck
Oct. 13, Tony transferred from reception
to the deck department. “Being from
Indiana,” Tony says, “and not having seen
the ocean until I was 18, it’s amazing to be
out on the sea, being a sailor.”

Just after joining deck, Tony was asked
to train and become a “waterman.” Shortly
after that, he received a care package
from his mother. She had made a blue
T-shirt with the words “Water Boy.” As a
waterman, Tony is in charge of pumping,
purifying and testing water onboard the
ship. In his first week as a waterman,
he helped pump 400 tons of water onto
the ship over the course of 12 hours.

“I’ve never been in charge of 400 tons of
anything before,” Tony says, smiling. The
ship and its crew consume between 40
tons of water each day, and more than
that in Africa, where the surgeries
will occur and where the sterilizers will
require heated water. Tony checks each
of the ship’s seven tanks, where the water
is stored, to be sure the water evenlys out
and doesn’t make the ship list (tilt). This
is especially important during a sail
because the stability of the ship, Tony says,
depends on the hundreds of tons of water
being dispersed evenly.

Although Tony is not working toward
becoming an able-bodied seaman, he is
learning 20 sailors’ knots, the minimum
number that seamen need to know.

He has a piece of rope in his cabin
to practice with, and experienced sailors to
look up to. “These salty old sailors are
just magicians with rope,” Tony says.

One sailor, a man named Dusty Ray,
can tie 60 different kinds of knots – all
behind his back.

Volunteers in the deck department
come from the United States, Canada,
England, Sierra Leone, Ghana, Liberia,
Nigeria, the Faroe Islands, Holland,
Norway and Australia. “In this group
there’s so much diversity, but there’s such
a unity of purpose,” Tony says.

In Emden, Germany, the deck hands
helped load hundreds of tons of supplies
onto the ship. One pallet, Tony says,
was formula for malnourished babies.

The next was building supplies. Then a
pallet of Bibles. Then ICU units. Then
prosthetic limbs for amputee victims. And
then a pallet of water pump equipment.

“We were just so overwhelmed,” Tony
says.

Citing the founder’s mission for Mercy
Ships, Tony says the organization seeks
to live out a two-handed Gospel, to care
for the whole person, not only for people’s
spiritual needs, but also their physical
needs. “Jesus went and healed people
and forgave their sins at the same time.
... One without the other is incomplete,”
Tony says. “I think this is the work Jesus
wanted us to do.”
President's Weekend

The April 3-4, 2004, President's Weekend will be a wonderful celebration. The festivities will include an induction ceremony for new members of the Council of 100, alumni and friends who have given more than $100,000 lifetime to Taylor. The Friday chapel and the Saturday evening President’s Dinner for friends and alumni who have given $1,000 or more to the University in the past year will provide an opportunity to publicly celebrate the completion of the Taylor Tomorrow Capital Campaign. The $75 million goal announced in 1996 was more than four times than Taylor had ever raised in a campaign. With the final total at $79,667,000, University officials and the Taylor family will take the opportunity to say, “To God be the glory.”

Give the Taylor Experience.

Justin and Veronica Norman ’98 found their time at Taylor to be life changing. “We give to Taylor University because we believe in what the school stands for,” state the Normans. “We believe in an institution that strives for excellence in education while providing for Christian learning.”

They are committed to giving back to the University so that the students today can have the same kind of opportunities they had. Join them in providing the Taylor experience today for the leaders of tomorrow.

http://www.taylor.edu/giving/index.htm

GIFT initiative

The Get Involved For Taylor (GIFT) initiative has been extremely successful thanks to a generous matching grant from The Lilly Endowment, Inc. Taylor met and exceeded the $3.5 million match within the 18 month goal and alumni participation jumped to 40 percent.
1933
Naomi (McKibben x) Shumaker stepped peacefully into her heavenly home on Sept. 8, 2003. Naomi was the mother of Dawn (Shumaker x’58) Kinzer; mother-in-law to Lee Kinzer ’59; grandmother of Mark ’78, Michael ’79, Lea (Kinzer ’84) Bergman, Laurel (Kinzer ’90) Dean and Lynne (Kinzer ’92) Steiner; as well as the great-grandmother of TU students Erika Kinzer ’05, Erin Kinzer ’07 and Sarah Kinzer ’07.

1934
Rev. Donald J. Kenyon died Feb. 3, 2003. During his career Rev. Kenyon taught at the following colleges: Hebrew Christian Synagogue, St. Paul Bible College, Nyack College, Detroit Bible Institute, Simpson College, Cathedral at the Crossroads, Asbury Seminary, Toccoa Falls College and Canberra College of Theology. He was a church planter, conference speaker, musician, artist and writer. He is survived by wife Marie who resides at 530 Dawson Dr, Duncanville, TX 75116.

1939
Francis Johannides passed away June 3, 2003. Starting his ministry in 1936 as a circuit rider in western Canada, he served the Lord as a pastor from 1940 to 1981. After “retirement” he continued as an associate pastor in Holiday, Fla., until 1996. He is survived by wife Mildred Mae who can be reached at PO Box 22, Penney Farms, FL 32079.

1944
Warren Bergwall went to be with the Lord suddenly on Feb. 21, 2003. Dr. Bergwall practiced medicine in Indianapolis and Wisconsin before practicing in Muncie, Ind., for more than 43 years. He was the former director of Family Practice Clinic at Ball Memorial Hospital, founder and medical director of Hospice at Ball Memorial Hospital, and former medical director of Gateway Clinic of Muncie. The Indiana Academy of Family Practice awarded him the “Outstanding Family Practitioner in Indiana” in 1985. Surviving is wife June (Pugh x) who resides at 2890 York Ln, Mount Dora, FL 32757. • Mary Green, wife of Bill Green, passed away Sept. 8, 2003. Mary was an exceptional math teacher who went on to receive the state TOTOM award for college math teachers, the first private college teacher to be so honored. Teachers of Teachers of Mathematics is an organization that meets yearly to discuss issues around teaching mathematics to future teachers. Mary’s contributions to her church in Oregon included her devotional writings and her years of service in finances at the local and yearly meeting levels. Bill resides at 1015 E Cherry St Apt 9, Newberg, OR 97132. • Martha (Huffer x) McDonald died May 12, 2003. She taught piano lessons from 1948 to 1982, and was active at Forest United Methodist Church. Her husband Gordon ’42 preceded her in death in 2000. She is survived by her daughter Ruth Ann (McDonald x’66) Fouse and son-in-law Danny Fouse.

1949
Betty Kinstler received the Distinguished Service Award at the Annual Convention of the Michigan Association of Retired School Personnel on June 5, 2003. From 1989 to 1993, she served as VP for the Shiawassee Chapter of the MARSP and president from 1994 to 2003. • John Strahl passed away Aug. 31, 2003, due to cancer. His entire professional career was at Greenville College, retiring as associate VP for alumni affairs in 1990. In 1976, John was inducted into the NAIA Hall of Fame for meritorious service; and in 1977, he was national president of the National Assoc of intercollegiate athletics. He later served for six years on the US Olympic committee. Surviving is wife June who lives at 508 Kilarney Rd, Greenville, IL 62246.

1951
Norm & Muriel (Culver x’53) Cook were honored for their work with Multnomah Bible College by the renaming of the Multnomah Overseas Endowment to the Norm & Muriel Cook Missions Endowment. Norm has taught at the college for 22½ years retiring in the spring of 2003. • David x & Margaret Jansen reside in Laurieton, Australia, where David is a psychologist specializing in couple therapy. He is also the co-director of Jansen Newman Institute in Sydney, Australia. E-mail is davidjansen@fasternet.com.au. • Dave & Kay Rathjen celebrated their 60th wedding anniversary in June 2003. Dave spent 30 of his 34 years in the Air Force as chaplain. Their address is 10202 Ironwood Dr, Sun City, AZ 85351. • Valetta (Short x) Werder passed away July 20, 2003, in Archbold, Ohio. She had been a school teacher in Pettisville, Ohio, for 30 years.

1952
Dr. Paul Gentile was selected as Indiana Family Physician of the Year 2003, by the Indiana Family Physician Association.

1956
Margaret Bash is retiring from active ministry in Hungary for Child Evangelism Fellowship and is returning to the US. Her address is 711 Robert E Lee Dr, Wilmington, NC 28412. E-mail is cefmab@aol.com.

1957
Joanie (Selleck x) Yoder has entered her 47th year of missionary work in Europe. During the next year or two, Joanie’s “active retirement” will allow her to continue in ministry mainly in England as an ambassador-at-large for Youth for Christ. E-mail is joanie.yoder@virgin.net.

1958
Rev. W. David Richards retired in 2002 after 43 years of service in the Methodist Church including parish ministry, hospital chaplaincy and seminary professor. Peggy, his wife of 45 years, passed
1960
Skip & Joan (Haaland) Britton moved to 148 Dovenshire Dr, Fairfield Glade, TN 38558. E-mail is skipbritton@earthlink.net. • Nancy Laberdy has retired after 34 years as God’s worker in Kenya’s secondary schools. She returned to the US and resides at Rt 1, 8451 Laberdy Rd, Eau Claire, MI 49111. • Jan (Gushiken) Terui retired in July 2003, from her director/teacher position at the Kapaa Missionary Church Nursery School. She founded the school 32 years ago. Her husband Ed (TUFW ’60) retired at the end of the year after serving as pastor at Kapaa for 39½ years.

1961
Bruce & Kathleen Brenneman live in Houghton, N.Y. Bruce is an assistant professor of theatre at Houghton College. E-mail is bruce.brenneman@houghton.edu.

1962
Nelson & Sarah (Owens x’63) Gould can be reached at PO Box 4707, Eagle, CO 81631. Nelson is the principal at Eagle Valley High School. E-mail is nfgould@centurytel.net.

1963
Sterling & Bonnie Davis reside at 5460 E Idlewood Ln NW, Atlanta, GA 30327. Sterling continues as VP for engineering at Cox Broadcasting. E-mail is sterling.davis@cox.com. • Terri (Soerheide) Nieto has semi-retired after teaching for 30-plus years at Green Valley Christian School in Watsonville, Calif. She now periodically substitutes and is active at her church as a Sunday school teacher and greeter.

1964
Robert & Rebecca (Thompson x) Brunton recorded their 13th album. The couple has been involved in church music since they were very young. They can be reached at PO Box 218, Eaton Rapids, MI 48827.

1965
David & Karen (Plueddemann ’66) Horsey have moved to 9797 Poplar Pl, Orlando, FL 32827, where David will begin as associate director of global operations for Campus Crusade for Christ. E-mails are dave.horsey@cci.org and karen.horsey@cci.org.

1966
Barbara (Durnbaugh) Bickel was one of 120 Indiana educators to receive a Lilly Endowment Teacher Creativity Fellowship for 2003. In June/July 2003, she and husband Dan traveled to Pietermaritzburg, South Africa, to visit friends whose daughter was an exchange student in Barbara’s high school English class. During this trip, Dan & Barbara shot video footage and still pictures to be edited into a 30-minute film that she will use in the teaching of Cry, The Beloved Country and other South African literature at the Canterbury School in Fort Wayne. E-mail is dabie@kconline.com. • Joseph & Cynthia Corey live at 24342 McCloud Ct, Laguna Niguel, CA 92677. E-mail is joecorey@cox.net.

1967
Douglas Briggs x and Barbara Burch were married April 5, 2003. Attending the wedding were the groom’s mother Margaret (Shyter ’39) Briggs and his sisters Cynthia Briggs ’73 and Barbara (Briggs ’76) Guenther. The bride is a staff attorney with the Legal Aid Society of Palm Beach County and the groom is on the staff of Florida Atlantic Univ in Boca Raton as coordinator for research programs, Department of Ocean Engineering. The couple makes their home at 925 NW 6th Ave, Boca Raton, FL 33432.

1968
David & Ann Bleivik reside at 112 E Country Barn Rd, Houston, PA 15342. David continues as executive presbyter for the Washington Presbyterian. E-mail is bleivik@comcast.net.

1969
Linda (Greenstein) Kaminski has retired from teaching middle school and has been privileged to serve on two short-term missions trips to Haiti within the last year.

1972
Kathy Kitzmann still loves teaching high school chemistry after 29 years. Her new address is 16273 Pomona Dr, Redford, MI 48240. E-mail is kathyk@sefmd.org.

1974
Curt x & Mary Kovener recently celebrated their 30th wedding anniversary. They alternate their time between work responsibilities (he as editor/publisher of the Loggersville Times and she in county government) and managing Heartland Oaks Woodland Farm, a remote retreat near Brown County, Ind., that they are developing into a bed and breakfast. They can be reached at PO Box 141, Crothersville, IN 47229. E-mail is ctimes@sonline.net. • Bruce & Karen (Palmer) McCracken live in Lancaster, Pa., where Bruce is dean of undergraduate studies at Lancaster Bible College and Karen teaches elementary physical education. They have two boys — Ryan (20) and Ross (17).

1975
Steve & Lisa Morris reside at 1631 W 76th Pl, Indianapolis, IN 46260, where Steve is the controller for Repro Graphics Digital Imaging. E-mail is eslgm@aol.com. • Michael & Karen Pierce live at 2197 Tallavana Trl, Havana, FL 32333. Michael is ESOL Curriculum Specialist/Elementary Generalist at Flagler College. E-mail is piercenn@tcc.fl.edu.

1976
Timothy x & Connie Welty live at 2206 Circle View Ln, Hoover, AL 35244. Timothy is associate professor at McWhorter School of Pharmacy, Samford Univ. Children are Elisabeth (22), Nathan (18) and Luke (16). E-mail is timwelty@earthlink.net.

1977
Don & Peg Faimon continue to live in Cincinnati, where Don is an optometrist at MidWest Eye Center. Their children are Anna (6) and Noah (5). E-mail is dfaimon@cinci.rr.com. • Ron & Karen (Adreani x) Solyst live in Northfield, Ill. Their daughter Rachel is a TU freshman. E-mail is ksolyst@hotmail.com.

1978
David & Vicki Fren have moved to 3919 Gelding Ln, Olney, MD 20832, where David works as senior systems engineer at Axcels Technologies. Children are Leigh (15) and John (12). • Gregory Johnson married Anna Tokash on Sept. 8, 2003. The couple lives in Keller, Texas, where Gregory is materials manager at Sara Lee Foods. E-mail is gjohn4317@hotmail.com. • Walter & Margaret (Hitchcock) Knight reside in Salem, Va., with children Kyle (17), Victoria (15), Ryan (14) and Justin (9). Their oldest son Brandon is a TU freshman. Walter is a Wesleyan pastor while Margaret is the church musician. E-mail is knight@rova.net. • Ted & Teresa (Andrews ’79) Smucker reside in Granger, Ind., where Teresa is employed by Notre Dame Univ. E-mail is smucker.1@nd.edu. • Jim &

Penny (James) Stone continues her studies in Pennsylvania State University in the College of Medicine.

Looking for a way to make a substantial gift to Taylor University that won't affect your lifestyle right now? Consider bequests, or gifts by will. The most common bequests involve cash or securities, but gifts of real estate, works of art or antiques can also be left to Taylor.

With a residual bequest, you direct that Taylor University receive all or part of your estate remaining after other specific bequests and expenses related to settlement of your estate have been made. With a testamentary bequest, you set up a trust that, upon your death, provides income to your spouse and/or other beneficiaries during their lifetimes, after which the assets of the trust are given to Taylor. With a contingent bequest, you name Taylor University as the recipient of your estate, only if others named in your estate plan are not living at the time of your death.

You may also designate Taylor as the beneficiary of the remainder of your IRA, Keogh Plan, tax-sheltered annuity or qualified pension, profit-sharing plan or life insurance plan.

For more information about these and other giving opportunities (including suggested language to ensure your gift is ultimately received by Taylor), contact Ken Smith at the William Taylor Foundation at (765) 998-5239.

Bequests and the William Taylor Foundation

A simple way to ensure a brighter tomorrow by giving today.

'53 makes history
Class breaks reunion giving record

The Taylor University Class Reunion Cup shines brightly in the corner of a room in Sickler Hall, William Taylor Foundation headquarters. The cup will go to the class of 1953 which has raised the most funds for Taylor.

Five years ago, '53 class member Ernest Cobbs suggested a class goal of $500,000 be raised in order to create a permanent Venture for Victory historic display. Don Odle had been their class sponsor and founder of Venture for Victory. It was decided that some of the class funds would be added to the Class of '52 funds in order to support this project.

This decision soon led to friendly competition to see if the 1953 class could "outgive" the 1952 class goal of $600,611.

"After five years $610,684 was raised breaking the old record of $600,611, which took three years," Nelson Rediger said. "They're a class who has given more than any other class in Taylor's history."

Of the 118 current members from the class of '53, 100 percent of the classmates financially supported this class project. Twenty-three percent of the classmates gave at the Presidents Associates $1000 level. The class of '53 is the second class in Taylor history to have 100 percent participation during class reunion competition. The class of 1950 was the first class to achieve 100 percent class giving.

The permanent history display of Venture for Victory will be housed in the Odle Gymnasium and will be unveiled to the public in a year or so.

Venture for Victory was a sports ministry started by Odle in 1952. A group of student athletes went to Asian countries to share the gospel of Christ through playing basketball. Several members on these first trips were from the classes of 1952 and 1953.

The money raised has not only gone to the display project but also to books in the library, trees planted in memory of classmates that have passed away and a project in the Mitchell Theatre.

A class committee consisting of Don Jacobsen, Rex Gearheart, Dave LaShana and Jane Everson all helped plan and direct the Golden Reunion weekend. —Gloria Pudate '04

writing career while teaching at Ivy Tech State College. She has written over 2,000 articles that have been published nationwide as well as four cookbooks. She, husband Craig and children Loressa (18), Zachary (13) and Kiersten (10) live in Muncie, Ind. She would love to hear from her TU friends. E-mail is pennyworks@yahoo.com.

1983
James x & Lora Devine live in Jupiter, Fla. James is director of marketing at Ship Shape TV. E-mail is dev3392@bellsouth.net. • Keith Taylor x resides in Miami where he is a firefighter/paramedic/driver engineer. E-mail is ktaylor999@aol.com.

Watch for the mail
Alumni keep in touch via a string of letters spanning nearly 60 years

A letter that was sent 58 years ago with a three-cent stamp is continuing today, keeping Taylor alumni connected. Shortly after graduating, Catherine Grostic ’45 and five of her friends (Sarah Burdon, Barbara Deich, Marg Arnold, Kaye Hill, Jean Holcombe) began a round robin letter to “keep track of what we’re doing,” said Grostic. “[The letter] is always such a special treat to get– and we often send pictures,” she added.

The chain of letters has followed these six across the country, through moves and job changes, children and grandchildren, joys and sorrows. “It has kept us close, through the different paths we’ve taken,” Grostic said. This past year one of the group’s participants passed away, which in a sense broke the chain, but the group continues their meaningful written correspondence.

Grostic and her friends are certainly not the only group of alumni to keep in touch with the round robin writing. Examples include a group of ’85 and ’86 grads (see class notes) and more recently, a group of 1999 grads [Mindy (Benteman) Lerch, Kristen Taylor, Karen (Halter) Dextrom, Jennifer Andrews], who began the letters after their sophomore year; six years ago, even in a day and age focused on technology and e-mail.

The ’99 group also decided to include Ken and Beth Smith, who were the girls’ wing-hook ups for Second West Olson. “It’s a privilege to be included,” said Beth. “This way, I know how to specifically pray and be a prayer warrior for my girls.”

While Grostic’s group letters usually takes six months to revolve full circle, the younger group’s letters have taken as little as two months, “depending on who loses it, who is on vacation, who moves, who forgets,” said Andrews, the instigator of the round robin writing. But it sometimes takes up to six months and Dextrom admitted, “Usually I am the culprit that keeps it longer!”

Despite the generation gaps between the groups, the correspondence is equally meaningful to all involved. “My husband knows that when these letters come, nothing else matters until I have read all of them,” said Dextrom.

The dedication of all of these women has proven the test of time, which shows the importance each one places on their relationships. Andrews commented, “These are women that I deeply love, and the letter allows me to be a part of their lives, even though we’re thousands of miles apart.” —Serena (Thrush) Duke ’04
been named chair of the dept of physical education and sport studies at Loras College. He and wife Sherry (Pomeroy '88), along with children Jeremy (9), Joel (6) and Jadie (3) reside in Dubuque, Iowa. • Donald & Lisa Smith reside in Franklin, Tenn., with children Shae (12) and Joshua (2). The couple lives at 7336 Valley Meadows Dr, Fort Wayne, IN 46815. Sarah teaches fourth grade at Forest Park Elementary and Eric is a data and statistical analyst at North
A planet is born
How a world of information is filling up a new corner of cyber space

There is a brand new Web site: www.taylor.edu. Taylor's latest online iteration is more than a freshening of the old site; it's a bottom-up rebuild that includes everything from streaming video, audio and student blogs to fresh new colors, design and hundreds of pages of Taylor information.

After an 18-month process of researching, designing and collecting content, the new site was launched Feb. 13, 2004. The project was headed by Evan Kittleman, director of online communications, and Rod Eib, director of applications and integration services.

The site was designed with prospective students in mind. “One of our goals is to encourage prospective students to visit campus to get a better look at what is happening,” Kittleman said.

While the new web address drops the “u” from the old www.tayloru.edu, the most obvious difference is the new color scheme and layout. The new colors, from the branding proposal recommended by Crane MetaMarketing, Atlanta, Ga., are “fresh, more vibrant, and add a lot of life to the site,” Kittleman said. However, the traditional Taylor sports colors purple and gold are alive and well on the athletics page.

While the new site is garnering lots of attention, Taylor University has been online since the mid-1990s when Taylor magazine proclaimed, “As technology keeps flourishing, Taylor University will continue in its efforts to connect and bring the Taylor community closer. So check in soon: it may not be too long before you hear the bell tower (over your computer).”

A lot has changed since then, when the story's writer gently educated readers about the definition of “the World Wide Web.” But if the early anecdotal responses to the new site are any indication, Taylor's commitment to excellence is apparent, even from cyber space. - Rachel Elwood '04

Online magazine exclusives for Spring 2004

Go to www.taylor.edu/magazine to read the Spring 2004 issue of the online magazine. In addition to containing articles from the print edition, there are many online exclusives including:

E-mail is bipenner13@yahoo.com. • Shelley Peters is an English instructor at the Hearts English School in Japan. E-mail is shellbakis@mac.com. • Abbie Reese continues her volunteer
Keeping the numbers straight
How to interpret the 2004 U.S. News and World Report annual ranking

Taylor University is regularly recognized for providing an outstanding education. Yet with all the accolades, it is important to understand what the rankings mean – and what they do not.

Taylor consistently ranks near the top in the category “Midwestern Comprehensive Colleges-Bachelors” in the annual U.S. News and World Report survey, America’s Best Colleges. In fact, in 2004 Taylor University’s Upland campus received a second-place ranking – the fourth consecutive year Taylor finished in second place and the sixteenth time Taylor received a high ranking in the survey.

Criteria judged in the survey included academic reputation, freshman retention, graduation rate, percentage of class sections with 20 students or less, student/faculty ratio and alumni giving rate.

Taylor University received top marks from U.S. News and World Report in the Midwest in several areas when compared against other “comprehensive colleges-bachelors.” Taylor’s average freshman retention rate is 89 percent. The University’s average graduation rate is 78 percent. When scored against similar schools in this region, Taylor ranks near the top.

Yet exactly how does the University rank on a national scale? Numerically, how does Taylor compare to similar colleges in the north, south and west? U.S. News and World Report declines to offer a definitive answer. Until U.S. News or another reputable organization compiles verifiable research, it is best not to make national comparisons.

Correction:
The caption on page 11 in the Summer 2003 Taylor magazine should have read “Taylor University is among the top 10 ‘Comprehensive Colleges – Bachelors’ in the Midwest according to the 2003 U.S. News and World Report survey, America’s Best Colleges.” We regret the error.

Correction:
AFOSR stands for Air Force Office of Scientific Research. The acronym was defined incorrectly in previous references to the TU nanosatellite program in Taylor magazine. We regret the error.

work for Mercy Ships as a writer on board Anastasis, the largest of the non-profit group’s three ships. Her one-year term began in August 2003. E-mail is abbie_reese@hotmail.com.

(Editor’s note: We regret the inaccuracies in her update in the Summer 2003 issue. Abbie is in the class of 1999, and her ship will be working in the region of West Africa.)

2003 Katy Benhardus is a Spanish teacher in Shakopee Public Schools. She lives in Eagan,
A legacy honored

Several months ago, Dorothy and I stood at the gravesite of Bishop William Taylor, located in one of the most prominent garden cemeteries in America. The vast 226-acre cemetery has been described as a harmony of nature that creates a setting of unsurpassed beauty in the rolling hills of Oakland, California, just across the bay from San Francisco.

We found the Bishop Taylor family plot after delivering a beautifully crafted bronze marker to the Amador Memorial Company just adjacent to the Mountain Grove Cemetery. There the plaque, donated by the class of 1950 and containing the highlights of his many ministries, was to be mounted on a headstone. It would then be placed and dedicated before a gathering of friends and alumni July 12, 2003.

On the day the plaque was delivered the cemetery was all but deserted. "We took time to appreciate the beauty of the surroundings and to meditate and reflect on the greatness of this man for whom Taylor University is named. It was an awesome experience. While few of the thousands of alumni who have walked the halls of Taylor University over the last century have been able to visit this hallowed setting, it is our hope that this plaque will help pay tribute to his memory. "--Vern Miller '43

Memorials (Deceased in bold)

Ann Ballinger
Mr. H. Norman Ballinger

Raymond Barrick
Mr. and Mrs. Bruce Sebestyen
Dr. and Mrs. Dwight Jessup

Harold Beattie
Mr. and Mrs. Emerald Gerig
Mr. and Mrs. Donald Herberger
Mr. and Mrs. Gordon Johnson
Mr. and Mrs. Oliver Godfrey
Ms. Martha Ann Godfrey

Alyce Cleveland
Ms. Mary Dunham

Russell Coe
Mrs. Gladys Coe
Dr. Alan and Dr. Jessica Winquist

John Coffey
Mr. and Mrs. Michael Harmon

Jay Conrad
Ms. Arleen Conrad

Greg Gerig
Mr. and Mrs. Emerald Gerig

Harry Haakensen
Mr. and Mrs. Dale Williams

Lily Haakensen
Rev. and Mrs. Meredith Britton

Elaine M. Heath
Dr. and Mrs. Lynn Miller

Jason Hennie
Mr. and Mrs. Kenneth Peirce

Howard Holmes
Mr. Charlie Angell
Dr. and Mrs. R. D. Bowling
Mr. and Mrs. David Carlson
Mr. and Mrs. Brian Dawes
Mr. and Mrs. Charles Dohner
Mr. and Mrs. Duane Fruechting
Ms. Marvene Hilkey
Mr. and Mrs. Thomas Kenner
Mr. and Mrs. Reid Kennedy
Mr. and Mrs. Mark Lantz
Mr. and Mrs. Tim Lugbill
Nutricultured Products Company
Ms. Mildred Orniston
Ms. Lois Packard
Mr. and Mrs. Daniel Palmer
Mr. and Mrs. Wayne Powell
Mr. and Mrs. Todd Shinabarger
J. C. Sinclair
Mr. and Mrs. Victor Stanton
Mr. and Mrs. James Stimmel
Ms. Carol Wagner
Mr. and Mrs. Kenneth Webster

Cleveland Hopkins
Dr. and Mrs. Stephen Bedi

Helen Lofton
Mr. and Mrs. Charles Lofton

Fred Luthy
Ms. Martha Ann Godfrey

Naomi Moore
Mr. and Mrs. Alva Bennett
Mr. and Mrs. Larry Garrett
Mr. and Mrs. Michael Harmon
Mr. and Mrs. C. Larry Holloway
Dr. Donald Hunsberger
Mr. and Mrs. Durwood Moore
Rev. and Mrs. Robert Neel
Mr. and Mrs. Albert Schwarzkopf
Mr. and Mrs. Paul Taylor
Mr. and Mrs. Albert Schwarzkopf

Elmer Nussbaurn
Dr. Joseph and Rev. Judith Brain

J.J. Pesek
Mr. and Mrs. Dale Murphy

Mike Pomeroy
Dr. and Mrs. H. Fred Pomeroy

Helen Rogers
Mr. and Mrs. David Hess

Jennifer Ruehman
Mr. and Mrs. John O'Brien

Ron Smith
Mr. and Mrs. G. Ray Smith

Benjamin K. Sorg
Mrs. Dorothy R. Dalton
Ms. Joan Kearns
Mr. and Mrs. Marshall Glenn

Elizabeth Van Horn
Mrs. Ruth E. Rogers

Lillian Weber
Dr. and Mrs. Stephen Bedi

Lois Weed
Ms. Audrey Berndt
Ms. Martha Ann Godfrey

Willis Woods
Ms. Nancy Tomaszewski
Mr. and Mrs. James Burns
Mr. Douglas Dewey
Dr. & Mrs. J. Paul Gentile
Ms. Julia Petri

Honorariaums (Honorees in bold)

Hazel Butz Carruth Anderson
Dr. Joseph and Rev. Judith Brain

Phyllis Conrad
Ms. Arleen Conrad

Janell Baker
Mr. and Mrs. Fred Laprad

Paul and Barbara Gentile
Mr. and Mrs. George Glass

Walt Campbell
Mr. and Mrs. Shawn Sichak

Jay Kesler
Mr. and Mrs. Shawn Sichak
From satellites to the polar mesosphere
How history encourages engagement with ever expanding research possibilities

Many Christian universities fear research with its associated risk and possibilities for introducing change. Thankfully, here faculty are encouraged to reach outside of Taylor to pursue national research and to engage the world in scholarship.

Over the past 75 years, some evangelicals have retreated from the world of “loving their God with all of their minds” and have thereby moved into a somewhat stagnant darkness. Some parents and churches today push students away from cutting edge science and other academic pursuits because they fear a conflict between faith and knowledge.

Yet the Christian worldview was instrumental in taking us out of the dark ages into the Renaissance, the Reformation, the founding of our country, the great awakenings and revivals in the world because the Christian mind was not feared. Evangelicals started many of the great universities like Harvard and Princeton. The scientific revolution was spearheaded by devout Christians such as Newton, Kelvin, Faraday, and Maxwell, while half of the founders of the Royal Society were also Bible-believing Christians. In my view, evangelicals are now falling out of the mainstream and we risk becoming ineffective because we are now viewed as irrelevant to modern society. Today, for example, no identified American evangelicals have won a Nobel prize.

As an undergraduate and graduate student in the ’70s I took every class I could on astronomy, evolution, anthropology, philosophy, religions and other subjects. The more I studied, the more I became convinced that faith and scholarship are convergent on one true matrix of reality. For example, when talking with top researchers across the nation about origins, it is like the “Emperors New Clothes” when you ask for facts. The secular world can only teach naturalist origins by definition, yet the Bible and true scholarship strongly support that the heavens declare the glory of God and our biological systems are fearfully and wonderfully made.

Inaccurate, dogmatic and closed evangelical mindsets may have to be altered to match biblical realities like the expanding universe, multi-dimensions and the variable rate of time. Exciting new research from astronomy, particle physics, genome mapping and engineering are now available to the evangelical community. Why don’t we have research centers at Christian universities? Many of our science students at Taylor are now competing with the best graduate schools in the nation on research development projects and the international scientific community is taking note. These dedicated students are using their free time to lead and impact part of the academic world.

Students need to do independent research on their own if they are going to make a difference. Students need to ask tough questions.

Let us reflect on moving from mediocrity toward having a burning passion to bring more light and Christian scholarship into the world.

This is an edited version of a speech given by Dr. Henry Voss, acting director of the Science Research Training Program, at the Forman Award Chapel, September 22, 2003. The full text is available in the current issue of the online magazine.

I took every class I could on astronomy, evolution, anthropology, philosophy, religions and other subjects. The more I studied, the more I became convinced that faith and scholarship converge.
Food and the body politic

I love the pork tenderloin too much. Ground pork pounded thin and flat, dipped in buttermilk and placed in a mixture of cornmeal and spices. And then deep fried. Then clipped and covered with mayonnaise, lettuce, and tomato. The more meat that sticks out around the bun the better.

Because they are pretty hard on the arteries, I limit myself to about two or three a year. In Upland, Indiana the best place to get one is at Ivanhoe's or at the Upland Chamber of Commerce Tenderloin Fry at the Upland Elementary School on a Friday night each September.

Now Ivanhoe's has an excellent tenderloin sandwich, but I like the elementary school's version even better because it's a fund raiser for the Chamber - and it's all you can eat. Looking around the cafeteria you can usually see the town businessmen, Taylor students, the high school football team, professors and their families, the local state senator and lots of friendly older people. If I pace myself I can usually get my annual tenderloin consumption quota covered all in one sitting. Between the good conversation, ubiquitous orange drink and the warm sandwiches, it borders on bliss.

Of course you can't eat a tenderloin and act "sophisticated." It's not like tofu or fruit salad. Or even prime rib. And in Upland we're okay with that. Around here we still believe in quiet evenings on the porch, shoveling your neighbor's driveway when he's out of town, and waving at strangers. And breaded tenderloin sandwiches.
Position Openings
Center for Research and Innovation

Seeking Applications and Nominations of Distinguished Research Candidates to be Director

PhD required, preferably in the life sciences, but possibly in fields of physical science, engineering, or business. Preference given to applicants with experience as principal investigators on national-level research projects with proven records of research and publications. Duties include exercising visionary leadership to foster research programs and securing research contracts.

Seeking Applications and Nominations for an Entrepreneurship Expert to be Director of the Interdisciplinary Enterprises Program

PhD required (or MA with extensive experience). Preference given to applicants with experience in technology transfer, new product creation, and start-up formation. Duties include mentoring students as they start new ventures, inspiring innovation, guiding tech transfer, and teaching entrepreneurship.

Seeking Applications and Nominations of Distinguished Research Candidates to be Humanities Research Training Program Coordinator

PhD required in a humanities field, including social sciences, education, communication, etc. Preference given to applicants with experience as principal investigator on national-level research projects with proven records of research and publications. Faculty position duties include teaching, fostering humanities research programs, and securing research contracts.

Must be strongly committed to the educational mission and evangelical Christian orientation of the University. Members of minority groups are encouraged to apply.

Inquiries, credentials, and supporting materials should be addressed to:

Dr. William R. Klinger, Interim Vice President for Academic Affairs, 236 W. Reade Ave., Upland, IN 46989-1001; fax 765-998-4910; e-mail wlklinger@taylor.edu.

Taylor University complies with federal and state guidelines for nondiscrimination in employment. See www.taylor.edu/provost/cri.htm.
The art of Korean-born artist Mee Kyung Shim is a meditative merging of Eastern and Western cultures. She displayed several of her recent paintings in the Metcalf Gallery Nov. 10 - Dec. 12, 2003, and spent time on campus Nov. 20 for a painting demonstration and reception.
