Hope deferred makes the heart sick, but a desire fulfilled is a tree of life.

Proverbs 13:12

"Hope" is the thing with feathers—
That perches in the soul—
And sings the tunes without the words—
And never stops—at all—

Emily Dickinson

Hope is definitely not the same thing as optimism. It is not the conviction that something will turn out well, but the certainty that something makes sense, regardless of how it turns out.

Václav Havel

Hope is like a harebell trembling from its birth.

Christina Georgina Rossetti

Hope, the patent medicine
For disease, disaster, sin.

Wallace Rice
Features

14  Our loss
The Taylor community experienced two human tragedies – the first when five people died in a traffic accident and the second when two of the victims were misidentified.

20  Inauguration
Grief and hope served as backdrops for Eugene B. Habecker’s inauguration as Taylor University’s 30th president.

24  Vision 2016
What could Taylor University look like in 10 years? An ambitious initiative comprised of brick, mortar, funds and people depends upon God’s blessing.

28  21st century science
What will it take to ensure the strides taken by Taylor science programs? Administrators are working to raise funds for a new science facility.

In the days following the April 26th accident the Taylor University Web site was flooded with a tremendous outpouring of emotion and prayer support for families, students, and staff connected with Taylor. Over 800 messages of prayer and condolences came from individuals around the world. Although several posts were made anonymously each was written with quality and love.

"I just heard about this accident this morning on Armed Forces Radio overseas... This Wheaton alumnus is praying for the families and your campus as a whole. May God use this horrible tragedy somehow and bring healing to all those affected both physically and emotionally."

"I'm a Grant County community member who attends a local church. News of the accident came in to my Bible study just after 8pm last night, and we stopped and prayed immediately. Know that our thoughts and prayers will continue with all of you in the coming days and weeks."

"Many at Huntington University are praying for the Taylor community and the many friends and family impacted by this tragedy. We thank God that He is welcoming those you will be missing. We are thankful that He can also bring peace to those still here who are so personally impacted."

"I am a mother of three Taylor grads. My husband and I and our whole church family will be praying for the families of those who are now with their Savior and the ones in the hospital. We will be praying that God will strengthen and sustain everyone at Taylor as you trust in his never failing love."
"I am a student from India who will be joining Taylor during this upcoming fall semester. Just want to let everyone at Taylor know that my thoughts and prayers are with you during this time of grief."

"Prayer from California to all those on campus feeling the loss of these individuals. I feel it and I didn't know any of them. I know there are alumni all over the country who are sending up prayers for the campus."

"As Taylor University graduates, we know how close the students and families of TU are. We are thankful (for) this consistent closeness, but realize that parting with friends and family members is that much more difficult because of it. May you find the peace that only our God can provide. He is faithful. He keeps his promises."

"Our schools may be rivals in some facets; however, Taylor University students and staff are brothers and sisters in Christ to those of us from Indiana Wesleyan. Our hearts break for you, yet we pray for the peace and hope that is found in the Truth of our faith. We are praying for you, care about you, and grieving with you all."

"From your friends at Ball State: We love you and are praying that God may bring you the peace and comfort only He can bring!"

"Our children at St. Lawrence remembered Taylor University in their morning gathering this morning. My ten year old son, Tim, wanted to know if the student and staff member had seen Jesus? ‘Yes, Tim, I replied, they saw Jesus immediately!’ What a comfort to know in the midst of such a tragedy, that Jesus was in the midst of the accident, and ‘welcomed’ each one home by name! We love you at Taylor and pray that God will bring healing...Peace Be with You!"

"I came to your blog via a newspaper’s website in Sydney. The newspaper did not mention your faith. Yet coming to this site it is the most overwhelming feature. I wish I shared your faith. In reading through this blog it is obvious you have something so special there and I wish I did too. I came here saddened over your terrible circumstances and such a dreadful way to lose your daughter and troubled by the hard time you have been through... and yet here I am, wishing I had what you have. How can that be?

How rich you are. I hope I don’t sound callous; I’m just so moved by your blog...

I hope you have the comfort, love and support you need in this hard time."

Comment posted to the VanRyn's blog
Books

Although the Zondervan Library celebrates its 20th anniversary this year, it could be argued that it's not getting older—it's getting better.

Home to over 200,000 resources, Zondervan holds membership in an interlibrary loan program that allows its users to access literally millions of books, tapes and periodicals. A reciprocal borrowing program with 70 libraries throughout the State of Indiana also lets Taylor students visit and check out resources on college campuses from New Albany to South Bend.

And when students return in the fall, they will be greeted by five new technology-enabled multi-purpose rooms which will complement Zondervan's current 11 multi-purpose rooms. According to Librarian Dan Bowell, a gift from the estate of former Librarian Lois Weed paved the way for the addition of the new facilities, which will serve as classrooms and places for workgroup meetings.
Where was God last night?

It was a question asked by a reporter during the frenetic hours after what may have been the most devastating loss in Taylor's history. In a world filled with famine, hurricanes, terrorist threats and genocide, how could five people with such promise be taken so quickly in what appeared to have been such a random fashion?

Betsy planned to stay in Marion so she could work with the children she loved. Brad was a man of personal devotion who planned to attend law school. Laura was funny, athletic, and loved Jesus in a way that challenged her friends. Monica doted over the students in her lunch line and gave candy bars to athletes on game day. And Laurel was a gifted artist who saw beauty in all things and used to wake up early just to watch the sunrise.

Each left behind devastated family, friends and loved ones. Each is deeply missed. Even today.

In those initial moments of shock and dismay, students, faculty and staff converged upon the Rediger Chapel/Auditorium to weep together, pray together and somehow, get through the unthinkable together. That night, as they clung to each other and to the Lord in their broken-heartedness, they realized, as I did, that God was on His throne. But we also sensed Him there among us—shedding our tears and ministering to us in ways that mere words cannot express.

There is no neat and tidy answer to the question, "Why?" But we rest in the truth of God's faithfulness and goodness; and while we grieve, we also have the blessed hope that one day we will see each of these people again. To paraphrase the late Rich Mullins' poignant song Sometimes By Step, five of the stars that Abraham saw that brilliant night so many years ago were lit for Monica, Betsy, Laurel, Brad and Laura.

The right stuff

A group of Taylor University students spent their spring break at Microgravity University at the Kennedy Space Center, Houston, Texas. But their classroom was not in a building, it was the padded cabin of a NASA C-9B aircraft flying at varied altitudes.

The Taylor students were selected from a nationwide pool of applicants by NASA's Reduced Gravity Student Flight Opportunities Program for their proposal to test a motor-driven tether for a micro-communications satellite designed and built over the past six years. In Houston they joined other universities also chosen for participation in the program by NASA.

The C-9B is known as the Vomit Comet. Inside its 45-foot padded compartment, the Comet's passengers experience weightless conditions (along with a host of other physical sensations) through over 30 sets of climbing and diving maneuvers per flight.

And the name is not limited to just one plane, but several in NASA's microgravity program used for training future astronauts, and in one case the filming of weightless scenes for the motion picture *Apollo 13* in the mid-1990's. The Taylor students took two rides on the aircraft. Funding for the trip was assisted by a grant from the Indiana Space Grant Consortium.

"It shows the caliber of students we have," said Taylor physics faculty member Dr. Hank Voss, who is himself no stranger to NASA, having worked with the agency in the past on satellite and component projects.

Voss said the flights were critical because it allowed the students to test the satellite's tether, made from copper and nitenol (an alloy comprised of nickel, titanium, carbon, oxygen and hydrogen) in weightless conditions.

"(Our students were) competing with a selected number of large universities," he added. "They (got) to see the other students' experiments at a pretty high level."

"This is going to be awesome," said Taylor physics senior and Comet team member Mark Burtness prior to the trip. "We are one step closer to getting the satellite in space; we're excited about the experience."

Burtness said the team's time in Houston was to be spent in extensive training sessions for their flights. "Working with NASA is very exciting," he added. "The projects that we do really make our education a quality one."
Members of a Taylor World Outreach team spent their spring break stripping mold-infested drywall from wrecked houses, moving disabled cars from their resting places and hearing over and over again the heartbreaking stories of people who had lost everything.

And they would go back in a heartbeat.

“This team is full of joy,” said Amy Barnett ’94, admissions communications coordinator. “If you met them on campus you would see it.”

Barnett and fellow admissions staff member Dusty DiSanto ’05, led a group of 18 students to hurricane-ravaged New Orleans for a week of backbreaking work in filthy conditions. They were the second Taylor group to minister to Katrina’s victims in their home settings – in 2005, a group of nearly 200 spent their fall break in Pascagoula, Mississippi, a town that suffered a direct hit from Katrina last year.

“It was like 9/11,” DiSanto said of the damage seen in New Orleans. “There are 1,400 people still missing. Half the city is gone. They are anticipating this hurricane season to be worse.”

“Every house we went into looked like a bomb hit it. Even stuff that looked salvageable wasn’t,” added DiSanto. Wearing masks to protect their lungs from the millions of mold spores in the air around them, the team scrubbed personal belongings from contact lenses to porcelain bath fixtures. Some items could be saved; others could not. But in each case they were able to bring closure to their respective projects.

“Our team was determined to finish the project,” said Barnett. “We went in with the attitude that what was given to us was expected to be finished.”

Wake-up call came at 6:30 a.m. on a typical day, if there was such a thing given the setting, with group devotions and breakfast 30 minutes later. The teams arrived at their worksite by 9:00 a.m. After an hour’s lunch break the teams were back at it for three to four more hours of work.

In addition to their reclamation work, the group staged puppet shows and worked one-on-one with hurricane victims, most of whom had lost everything but yet displayed a joy that can only come from Jesus.

“(We learned) the importance and power of serving. Serving the people like we (did) – they served us. That is what we are called to do. I was completely and utterly humbled by the people we worked with,” Barnett said. “To see them live out their leadership capabilities is so humbling. I’m forever changed as a result of this trip.”
in the loop

Commencing and remembering

The 2006 Taylor University commencement featured a cloudless sky, breezy conditions and solemn reflection as 420 graduates were awarded diplomas and servant’s towels on Saturday, May 20th.

Although much of Indiana had experienced rainy conditions for a 10-day period which finally subsided the previous Wednesday, workers were able to prepare Wheeler Stadium for the large crowd.

The truck-van accident which claimed the lives of five Taylor University community members on April 26th was observed as each program participant wore a green ribbon celebrating the beginning of new life in Heaven for Whitney Cerak, Laurel Erb, Monica Felver, Brad Larson and Betsy Smith. It would be discovered 11 days later that Cerak and VanRyn were misidentified at the crash site and that VanRyn had died and Cerak had lived.

Degrees were awarded to Larson, Smith and VanRyn, all of whom were Taylor seniors; and an Associate of Arts degree was awarded to Erb.

Honorary doctorates were presented to the Reverend A. Miller Malloy, general secretary of the United Bible Society, and 1973 Taylor graduate Stephen L. Johnson, the administrator of the Environmental Protection Agency.

“It is indeed a privilege to be able to address you and extend my deep appreciation for this great honor that Taylor has bestowed upon me,” Malloy told the crowd. “It’s a particular honor and joy for me and my wife to be here in the first year of the presidency of Dr. Habecker at Taylor. I’ve known your president and his wife, Marylou, for many years and my appreciation for them has grown throughout that time.”

Johnson, who received one of the first honorary doctorates in science awarded by Taylor, delivered the commencement address. “When my parents and I drove to Upland, I didn’t know a single person. But through years of classes, intramural sports, and late night hang-outs, I formed such significant bonds with my classmates that (it) made it hard to move away from them on graduation day. Even more than that, I fell in love with this place,” he said.

“Sitting around you are some of the best friends you will ever have in your life,” Johnson added. It will be hard to be without them in your daily lives. I know you are already feeling this loss of several members of your classmates, including two from the Class of 2006. I hope that you carry on their memories and touch others’ lives as they touched yours.”
Faculty accolades

Zach Bent, visiting art instructor; Shaun Casbarro ‘01, visiting art instructor; and Kathy Herrmann, assistant professor of art, displayed artwork at the Minnetrista Art Show in Muncie, February 25 through April 9.

Jim Cee, associate dean of business, completed his doctorate in March. He was honored with the Gary Confidential Award for Scholarly Work in the area of adult learning theory and was inducted into the Beta Phi Society.

Gary Friesen ’75, director of instructional and academic technology, received an Indiana Partnership for Statewide Education (IPSE) Award for Innovation and Leadership in the support for online teaching and learning category. The award included a $1,000 prize.

Jonathan Geisler ’95, assistant professor of computing and systems sciences and Stefan Brandle, associate professor of computing and systems sciences, hosted the 6th annual Taylor programming contest April 9. Participation has grown from 13 teams from seven schools in 2001 to 35 teams from 14 schools. Taylor placed first in this year’s competition.

Dan King, assistant professor of chemistry and student Ryan Poe ’07 presented research on Fugal-Plant Protein Interactions at the Midwest Scholars Conference in February.

Bob Lay, professor of biblical studies, presented a paper and slides on the legacy of Taylor President Monroe Vayhinger at the Indiana Association of Historians in February.

Ken Kiers, associate professor of physics, co-authored an article in Physics Review about neutrinos with Taylor students Michael Assis ’06 and David Sims ’04, along with scholars from Wayne State and Brookhaven National Lab.

Bill Ringenberg’s ’61, professor of history, newest book, The Christian College: A History of Protestant Higher Education in America (2nd edition), has been published and was recently distributed to all 1,500 delegates who attended the 2006 Council for Christian Colleges and Universities (CCCU) International Forum in Dallas, Texas.

Don Takehara, director for the center for research and innovation, presented a paper and was a panel member at the 2006 Bioenergy Symposium in February at Purdue University.

Laurie Welcott ’80, technical services/collection development librarian, received the Master of Divinity degree from Christian Theological Seminary in December, 2005.

Top faculty 2005-2006

Dr. John Moore and Win Corduan have been named recipients of two of Taylor University’s top faculty awards for the 2005-2006 academic year.

Moore, professor of biology and biology department chair, was named Distinguished Professor for 2006 by Taylor University’s Alumni Council; Corduan, professor of philosophy and religion, received the Franklin W. and Joan M. Forman Distinguished Faculty Scholar Award for 2006.

According to Taylor Alumnus Director Marty Songer, Moore “has served with extraordinary dedication. From supervising student teachers to supervising labs and experiments, (he) has empowered students and poured into their lives the love of God’s creation and His handwork.”

“As I realized what this recognition means and the honor that it holds, I needed to make sure that any accolades for myself became praise for my Lord and Savior who gives me the strength to do what I do,” said Moore, who also received an Award of Recognition from the Hoosier Association of Science Teachers Inc. (HASTI) in April.

Corduan’s receipt of the Forman Award marks the third major honor accorded him by the University since he joined the Taylor faculty in 1977. He is also a two-time recipient of the Distinguished Professor award.

“(Dr. Corduan) loves Taylor University and is passionately committed to the task of equipping his students to achieve their dreams and sharing his knowledge of the Bible and his love of Jesus Christ honestly and clearly with people from all beliefs and cultures,” said Dr. Tom Jones.

Corduan, whose book Pocket Guide to World Religions was recently published by NavPress, said he was moved by the honor: “As everyone knows, my scholarship has been a very important part of my academic life,” he said. “I’ve paid a lot of attention to it and invested a lot of time in it. It was wonderful to have my colleagues’ recognition of these efforts.”
Trojans name new football coach

James Bell has been hired as Taylor University's head football coach. Bell, who has been coaching in the collegiate ranks for 25 years, comes to Taylor following a three-year stint as head coach at NCAA Div. I Jackson State.

“I am excited about getting on board with Taylor University,” said Bell. “President Habecker has a vibrant vision for Taylor, and we are ready to join in that vision of excellence. I want to do my part to be a positive contributor to the athletic department and to the University as a whole.”

Prior to Jackson State, Bell served as an assistant at the University of North Texas, Wake Forest, Indiana and Louisville.

Athletic Director David Bireline said Bell brings strong credentials to the Taylor program. “Taylor athletics is very excited about Coach Bell and the whole-person approach he exhibits,” he said. “Not only has his football background allowed him to work with some of the country's leading coaches, his educational background will allow him to contribute to the PHP department. We are looking forward to his leadership in the football program.”

“James Bell is an outstanding Christian coach, father and husband who will be a tremendous asset to the Taylor University community,” said Indianapolis Colts’ Assistant Coach Jim Caldwell. “James will provide great leadership while developing a winning philosophy without compromising his Christian values. He is an intelligent taskmaster with an unusual ability to organize, recruit and create an atmosphere for success on and off the field.”

Bell and his wife, Alfreida, have a daughter Curtisha, 21, and a seven-year-old son, Aeneas.

“President Habecker has a vibrant vision for Taylor, and we are ready to join in that vision of excellence. I want to do my part to be a positive contributor to the athletic department and to the University as a whole.”

Trojans Football Coach James Bell
Spring 2006 sports review

Baseball
33-22 record, setting a school record for wins in a season
Finished second in the MCC South Division
Won the MCC Tournament, advancing to the Region VIII Tournament
Four players named All-MCC First Team
(Tad Lawler, Trent Mast, Rocky Pedoe, Michael Bentley)
Three players named NAIA Honorable Mention All-American

Softball
Finished the season with a 7-24 record
One player named All-MCC First Team (Emily Pensinger)
Three players named NAIA Scholar-Athletes

Women's Track
Placed third at MCC Conference Meet
Broke three school records (Lolly York (2) and Carolyn Betteridge)
Lolly York placed 7th in the 5,000 meter run at the NAIA National Championship

Men's Track
Finished third at MCC Conference Meet
Broke one school record (Mitchell Jones)
Qualified six members for the NAIA National Championship

Coaching milestones
Paul Patterson and Tena Krause both enjoyed milestone wins during the 2005-2006 season when Patterson notched his 600th collegiate coaching victory and Krause got her 300th victory.

Since Patterson's arrival in 1979, the Trojans basketball team has averaged 20 wins a year. Krause has built a consistent winner since she joined the Taylor coaching ranks 17 years ago. Under the two, the Trojans have consistently vied for conference crowns and trips to the NAIA national tournament.

"I hope a prospective student would look at our program and think about the stability we have, but also to take a deeper look at the women involved in our team and the commitment they have to the Lord as well as basketball," said Krause.

"Whenever you reach a milestone like this it makes you think back," Patterson said. "It reminds me of all the great people that I have been fortunate enough to work with over the years."
Always providing

It was during a visit to the hospital in Fort Wayne when I visited the VanRyn family and was privileged to sit at their daughter Laura’s bedside. As I prayed for her, and for her family, I asked God to bless her with a complete recovery, and them with the peace that passes all understanding.

By now, I’m sure you have heard that it was not Laura who was recovering in that hospital bed that day, but Whitney Cerak, whom we all believed had died on that tragic night of April 26th. To say we were stunned at this news would be an understatement.

Only God knew the full scope of the events of April 26th as they unfolded that dark night and in the coming days. Only God knew that it was Whitney who had been so seriously injured and that it was Laura who along with Laurel Erb, Monica Felver, Brad Larson and Betsy Smith was part of a homecoming during which she heard those words for which each of us longs so deeply, “Well done, thou good and faithful servant.”

We have learned so much of God’s faithfulness and love in the lives of Laura’s and Whitney’s families. The VanRyns, after caring and being prayer warriors for the person they believed was their daughter, have responded to this human tragedy with a grace that has both challenged us and broken our hearts.

And the Ceraks, while filled with a sense of joy because their daughter is alive, stand in solidarity with the VanRyns. The Ceraks too have traveled that road of sorrow.

We should never be surprised by God’s faithfulness. Philippians 3:20 states that God is able to work “exceedingly abundantly above all that we ask or think, according to the power that works in us.” We serve a good and loving Heavenly Father who has called us to obedience and trust, even when the way is uncertain, the path is dark and the challenge is great. As C.S. Lewis puts it, “I know now Lord, why you utter no answer. You are yourself the answer. Before your face questions die away.”

Marylou and I are so pleased to serve with you in the place where the Lord brought us together, allowed us to study under the mentoring of excellent faculty, and equipped us to go out and minister the redemptive love of Jesus Christ to a world in need. As the old saying goes, “If you always do what you’ve always done, you’ll always get what you’ve always got.” God is calling us to ensure that His work at Taylor University will go on, not just through the remainder of the 21st century, but beyond. As we have learned over the past few weeks, sometimes that road is stained with tears, but it is paved with God’s faithfulness.

“We should never be surprised by God’s faithfulness.”

— Dr. Eugene B. Habecker ’68
Faith and the Problem of Suffering

Now well into summer, the Taylor community still mourns the loss of those who died in the van accident on April 26. This tragic event has touched us all in one way or another, and it has no doubt presented a challenge to the faith of many. After all, God is supposed to be all-powerful and all-good. If He is all-powerful, then He can stop such suffering. And if He is all-good, then wouldn't He want to stop this suffering? Yet the pain goes on, and the deaths of our beloved sisters and brother are but the latest horrific chapter in a daily reality all over the world. As Dostoevski once wrote, the earth is soaked from crust to core with the tears of humanity.

For centuries philosophers and theologians alike have wrestled with the problem of human suffering. And many solutions have been attempted. For example, some propose that all suffering is divine punishment for sin. Victims of disease, poverty and natural disasters are all experiencing the wrath of God. Such thinking was apparent in Jerry Falwell's notorious declaration that with the 9-11 attacks God was punishing the United States for its sins. The problem with this approach is that it forgets that the innocent suffer too. From Job and Joseph to Jesus himself, plenty of people who are not wickedly rebelling against God have suffered severely.

Another approach insists that suffering is the inevitable consequence of the laws of nature. God had to make the world operate according to certain predictable rules, such as gravity and the laws of thermodynamics. But, unfortunately, doing so inevitably resulted in the possibility of painful accidents and diseases. So human suffering simply results from God making an orderly world. Unfortunately, this approach forgets that God, being all-powerful and all-wise, could have made the world in such a way that diseases and accidents didn't happen. Indeed, He has promised to do just this in the New Earth that awaits us. Furthermore, to say that suffering is inevitable ignores the biblical fact that suffering only came into the world when humans began to sin (the Fall).

Yet another approach focuses on a crucial aspect of the concept of sin. Our rebellion against God — and all of its negative consequences — resulted from our abusing our free will. As with Adam and Eve in the Garden, God presents us with the choice of obedience and blessing on the one hand and disobedience and curse on the other. Sadly, we all choose wrongly from time to time, which results in suffering. So we have no one to blame but ourselves. However, the limitation of this approach is that it doesn't explain why God would allow us to sin as we do. Is our freedom really worth all the pain? Why so much suffering?

These are just a few of the more popular approaches to the problem of suffering. And while I think each of these offers some help in dealing with the problem, each is incomplete by itself. In fact, I believe we do not and can not know the reasons for all of the suffering in this world. But this is not to say that we can't know that there are good reasons in every case. Let me explain.

If we believe in a God who is all-wise, as well as all-powerful and all-good, then He must have good reasons for all that He does, whether this regards the blessings of good health and children or the pain of car accidents and natural disasters. But, one will reply, isn't this a rather cold and aloof way of looking at it? And, anyway, isn't the fact of suffering by itself a reason to stop believing in God's wisdom? Or even to deny His existence altogether?

Some people think so and even give up their Christian faith as a result. But I believe they make a sad and ironic mistake, for Christianity is the worldview that best addresses suffering. In fact, the Christian faith was born out of suffering — Jesus himself suffered severely, perhaps even beyond what was necessary for our salvation. The prophet Isaiah tags him as “a man of sorrows.” And as for the suffering of His followers, the Bible gives us clues as to its purpose, linking it with character development. The book of James says that the testing of our faith through trials “develops perseverance,” which in turn makes us “mature and complete, not lacking anything” (James 1:3-4). More significantly, suffering gives us solidarity with Christ. The apostle Paul writes, “I want to know Christ and the power of His resurrection and the fellowship of sharing in His sufferings, becoming like Him in His death” (Phil. 3:10).

These and similar biblical passages should inform the Christian's perspective on suffering. And when the reason for some suffering is incomprehensible to us, we can still trust that God has His good reasons. Even tragedies such as the April 26 accident somehow fit into the divine plan. We can be confident that this is the case, even if we don't fully understand how it is so.

— Dr. James Spiegel
Human tragedies unfolded the night of April 26th; the first when a semitrailer crossed the median on I-69 and struck a Taylor University van, killing four students and a dining services worker; and the second in the frantic minutes after the crash when the identities of Whitney Cerak and Laura VanRyn were inadvertently confused, leading to a five-week odyssey of shock, worship, soaring anticipation and crushed hopes.
The crash was a deep blow to the Taylor community, which was already in the midst of another crisis. On Monday, April 24th, senior Melissa Munn had been hospitalized and nearly died from a pulmonary embolism. Following an all-night prayer vigil and three open-heart surgeries, Munn eventually recovered and was able to attend commencement ceremonies.

As the crisis with Munn continued, the university was moving forward with inauguration plans for President Eugene B. Habecker, which included a student scholarship appreciation banquet on the Taylor Fort Wayne campus, scheduled for April 27th. On the evening of the 26th, a team of dining services workers and students went to Fort Wayne to assist in the setup for the banquet in a Taylor University van. Onboard were Creative Dining Services staff members Monica Felver, Connie Magers, Michelle Miller and Vickie Rhodes, as well as Taylor students Whitney Cerak, Laurel Erb, Brad Larson, Betsy Smith and Laura VanRyn.

Following their work on the Taylor Fort Wayne campus, the group stopped for pizza before turning south for Upland. According to Magers, during an interview with an Indianapolis television station, spirits were high and there was some good-natured ribbing of Larson, the only male in the group.

But shortly after 8:00 p.m., as they neared I-69's interchange with State Road 18, a semitrailer rig drifted from the northbound lanes of I-69, across the grassy median and into the roadway's southbound lanes, smashing into the van and killing five of its occupants. The rest were left with serious injuries.

According to published reports, the scene rescue workers discovered as they arrived was one of absolute mayhem with wrecked vehicles, people and personal effects strewn about. How VanRyn and Cerak, who were both blonde, petite, and shared similar features, were confused for each other is a question that may never be answered. But Cerak, who was believed to have been VanRyn, needed immediate treatment for life-threatening injuries and was flown from the site to a hospital in Fort Wayne where she lay in a comatose state for nearly three weeks.

VanRyn had actually died in the crash along with Erb, Larson, Smith and Felver, but the identity switch would lie dormant for over a month before being discovered.
As word began to spread that night, students, faculty and staff members flocked to the Rediger Chapel/Auditorium, where an emergency prayer meeting began at 11:00 p.m. and lasted over four hours. A second prayer service was convened at 9:00 a.m. Thursday. Students, faculty and staff hugged each other, cried and prayed inside and outside the building – some lying prostrate upon the ground.

The accident plunged the Taylor community into a deep state of mourning. Thursday and Friday classes, along with many previously scheduled events, were cancelled. Habecker’s inauguration went forward, but was repurposed into a tribute to the accident victims, their families, loved ones and friends, as well as a reaffirmation of Taylor’s commitment to Christ. On Taylor’s Fort Wayne campus, the luncheon for which the workers had prepared, as well as all Thursday classes, was cancelled as the entire university community grieved.

Many from beyond the university family reached out to the Taylor community during its time of need. Indiana Wesleyan University furnished busses and fuel so students could attend out-of-state funerals; Anderson University hosted a May 7th memorial service reception, sending catering staff and food; the Indiana University School of Music, which lost five students in a plane crash just five days before, sent flowers. Thousands of well wishers also posted notes on the Taylor website, sent cards, banners and e-mail messages expressing their sorrow and prayer support.

During the May 7th memorial, friends and family eulogized the five to a packed Rediger Chapel-Auditorium. “How do I even begin to describe to you just how wonderful she was?” said Elizabeth Franz of her friend, Laurel Erb. “She was committed to her faith and expressed that commitment in so many ways. She loved her family, loved her friends, treasured the present and dreamed about the future. She lit up a room with her beautiful smile and enthusiasm for life.”

Franz related Erb’s innate ability to see beauty in everything from a sunrise to an ice cube. “Laurel lived a life that exemplified the true meaning of being a Christian,” she said.

At first, Monica Felver was drawn to her work at Taylor because of the flexibility of schedule that allowed her to spend time on her yard work and with her beloved animals.
"When it came to doing events, the kids (who) worked on her line knew that Nostalgia Night was the best. If you worked on her line you had to like 50s and 60s music, because that is all she ever played ... she loved Elvis,” said Connie Magers, her co-worker and friend.

“Monica fell in love with the students here at Taylor,” she added, relating how deeply moved Felver was when students presented her with several hundred dollars they had collected in response to an illness that hospitalized her husband. “I know she loved all of you.”

Jordan Hawkins was a lifelong friend of Brad Larson and recounted his memories of a young man with a humble and genuine heart. “You could describe Brad as being a man above reproach. He never put himself in compromising situations; and if there was ever any question as to the way in which he behaved Brad was always the first person to own up to his mistakes.”

“Brad was uncompromising in his priorities, convictions, and most importantly, his relationship with Christ,” Hawkins relayed. “I cannot tell you how many times I walked in on Brad doing his devotionals. He was never showy about his quiet time in the word; it was simply something he just did.”

For Heidi Smith, a personal mission statement discovered in the bible of her sister Betsy painted a portrait of a young woman whose sole purpose in life was to love God through people. “People are my passion,” said Smith as she read from her sister’s statement. “God must be my first passion. When I am a failure and weak, it allows God to get bigger ... my life must be a sacrifice and a drink offering poured out to God.”

“As I look at her life, it causes me to evaluate my own,” Smith said. “It is absolutely important for all of us to find our mission from God and begin to live it ... All of you here at Taylor held a special place in her heart and I praise God for the four years she was able to spend here, because I know God taught her so much through all of you.”

Whitney Cerak’s sister Carly praised her ability to light up a room and make new friends, but it was the growth that she had seen in Whitney’s personal life that had touched her most deeply. “I watched my sister fall in love with God this year - He was her own. I couldn’t have asked for a greater blessing,” she said. “God is still a good God and his promises are true. I will see Whit again; and these are not just things I say to get by, or to help me cope with my pain. I know the living God; and I will worship Him next to my sister again some day.”
While a tremendous amount of media interest was focused upon the Taylor community following the accident and its aftermath, it paled in comparison to the worldwide sensation the story became when the mistaken identities were discovered. Television crews from national media as well as Indianapolis and Fort Wayne affiliates arrived to broadcast from the Rediger Chapel/Auditorium and the story eventually was carried by international media.

That phase of the story actually started shortly before year-ending commencement activities when, after visiting Cerak (the person she believed was Laura) in the hospital, VanRyn’s roommate approached Taylor administrators with questions about the identification process that determined VanRyn had lived and Cerak had died. That day the university began a quiet fact-finding effort involving state and local authorities, which was ongoing when the misidentification was revealed.

The next day VanRyn’s family moved Cerak to a rehab center in Grand Rapids and a web log (blog) set up by the family continued to post progress updates. By May 29th, Cerak’s progress was gathering momentum; but as she began to speak and interact more and more with the VanRyns, they started having their own questions about her identity and initiated the investigation that determined her true identity.

“We have some hard news to share with you today,” wrote Lisa VanRyn on May 31st. “Our hearts are aching as we have learned that the young woman we have been taking care of over the past five weeks has not been our dear Laura, but instead a fellow Taylor student of hers, Whitney Cerak ... it is uncanny the resemblance that these two women share. Their body types are similar, their hair color and texture, their facial features, etc.”

“It is a sorrow and a joy for us to learn of this turn of events. For us, we will mourn Laura’s going home and will greatly miss her compassionate heart and sweetness while knowing that she is safe and with her King forever. We rejoice with the Ceraks, that they will have more time on this earth with their daughter, sister, and loved one ... We also want to thank you for your prayers for our family as well as the other families during these past few weeks. Your love and support have been amazing,” VanRyn added before saluting her sister with a beloved family nickname. “We love you Sweets.”

UP AND BEYOND

THE INAUGURATION OF
EUGENE B. HABECKER, PhD, JD
AS THE 30TH PRESIDENT OF
TAYLOR UNIVERSITY
FRIDAY, THE TWENTY-EIGHTH OF APRIL
TWO THOUSAND SIX
Eugene B. Habecker was inaugurated as Taylor University's 30th president amidst music, delegates, faculty, staff and students in a packed Odle Arena and before a cluster of five candles.
The candles represented the four students and a dining services worker killed in an accident on I-69 just 38 hours earlier. Carnations were handed to each of the representatives who entered the gymnasium and the reworked program included special prayers for the families and friends of the accident’s victims. The purple Taylor banners, which have been displayed at commencement, homecoming and other festive occasions, were draped with black ribbon and the room was ringed with television cameras and media who had come to cover yet another facet of the Taylor community’s response to the tragedy.

Calling the accident a “horrible human tragedy that cut deep into the foundation and fabric of Taylor University,” Habecker spoke, sometimes haltingly, about the reality of God’s love and providence in a fallen world. “If this were a normal day this would be a very long chapel. But this is anything but a normal day; and for us to pretend it to be normal would be foolhardy,” he said. “Look around at the eyes of our students. You want to be able to say I talked with them and I hugged them. I looked into their eyes. Marylou and I have enormous respect for our students.”

“As we go to various events and you see one of our students, give them a hug,” Habecker exhorted the assembly. “As you see a faculty member who faces the prospect of an empty chair; or see a coach who has a vacant jersey, give them a hug. I thank God that even in this difficult moment he has sent all of you to our midst these days.”

The theme of inauguration was Up and Beyond; Habecker’s address was to have been the grand unveiling of Vision 2016, an ambitious movement of brick, mortar, programs, people and funds that seeks to ensure Taylor University’s spot among the world’s elite universities of evangelical faith. And while the speech provided a glimpse of things hopefully to come, it was also a moving examination of hope in the midst of pain.
“Taylor did not apologize for its biblical anchor points on being fully Christ-centered in the past, and we will fully embrace these going forward into the future . . . These will not change.”

“Our commitments to do higher education at Taylor are fully contextualized in the Christian faith; based upon the bible,” Habecker declared during his address. “So it is no long stretch to suggest that just as we honor those who preceded us here at Taylor, and just today as we honor the past in reflecting upon the lives of our students and staff who are no longer with us in this room, it is also right that we honor the faith of our fathers and mothers.

“Taylor did not apologize for its biblical anchor points on being fully Christ-centered in the past, and we will fully embrace these going forward into the future,” he said. “These will not change.”

The hand of the Almighty was evident as well when a musical piece selected months in advance and performed by the Taylor Chorale offered the lyrics:

Farewell my brothers in the Lord, we all ere long shall meet above.

For we believe His Precious Word: To you I’m bound with chords of love

... We’ll march to the Promised Land. We’ll land on Canaan’s shore,

where pleasures never end, and troubles come no more.

The day’s events also included the dedication of a display celebrating Venture for Victory, considered by many to be the first sports evangelism outreach, and the official renaming of the former Odle Gymnasium as Odle Arena. On hand for the event were the members of the first Venture for Victory team. Grandparents Day, President’s Weekend and Council of 100 activities also rounded out the day.
Students studying in venues from Cairo and the Czech Republic to Malaysia; graduate-level offerings in 10 new fields; sparkling new facilities and a student body numbering 2,400. What could Taylor University look like in the year 2016?
“God must be in every phase of this. We desperately desire to go where the Lord leads us. At this time, by His rich grace, we believe these are the plans He has for us.”

Since his arrival on campus last August, President Eugene B. Habecker has called upon the Taylor community to imagine where Taylor University could be on its 170th birthday in 2016 and then dream big. Vision 2016 is an ambitious initiative that seeks to ensure Taylor University’s spot among the world’s elite universities of evangelical faith through the addition of dollars, buildings and programs while relying upon the hand of God for guidance, keeping and success.

“As it says in Psalm 127, ‘Unless the Lord builds the house, its builders labor in vain,’” Habecker said. “We have got to go with God on this one. We cannot make our own plans and ask God to bless them. We have to find out where God’s heart is and go there.”

While the brick and mortar portion of Vision 2016 is a culmination of a master planning process for the Upland campus which began two years ago, the programmatic aspects of the plan draw in part from Taylor University’s heritage of evangelical education, missions involvement and graduate-level course offerings. Portions of Vision 2016 are already in place with the upcoming launch of the Cindy L. Spencer Centre for Global Engagement, and Taylor’s return to graduate level offerings three years ago.

But it is the brick and mortar along with student body growth that has created a buzz among Taylor faculty, staff and students. Planned Vision 2016-related expansions include:

- **a total student enrollment of 2,400 on the Upland campus**
- **a new $40 million science facility adjoining a renovated Nussbaum Science Center**
- **a new 2,800 seat chapel that will allow all faculty and students to attend chapel services**
- **a new student center**
- **new football, baseball and track facilities on the west side of 8th Street**
- **a new-and-extended campus drive that will create a completely pedestrian campus**
- **a new campus entrance with a reflecting pool**
- **new classroom and residence facilities**

“A speaker at a recent business seminar said, ‘If your plans don’t frighten you, God must not be in them,’” Habecker remarked. “God must be in every phase of this. We desperately desire to go where the Lord leads us. At this time, by His rich grace, we believe these are the plans He has for us.”

As Habecker has continued to relate the Vision to different audiences, the ideas put forth have generated excitement. But it was at a recent event in Indianapolis when a minister asked him, “What is Taylor’s bottom line?”

“I was somewhat taken aback by the question, but I was reminded of the words of Jesus from Luke Chapter 10 when He said, ‘The harvest is indeed plentiful, but the laborers are few. Pray therefore to the Lord of the harvest, that He may send out laborers into His harvest.’ That is Taylor’s bottom line. We are working to help ensure the harvest,” Habecker said.

“As it says in 2nd Chronicles 16:9, "For the eyes of the Lord run to and fro throughout the whole earth, to show himself strong in the behalf of them whose heart is perfect toward him," he added, “It was theologian A.W. Tozer who said, ‘God is looking for those through whom he can do the impossible. What a pity that we settle only for those things we can do ourselves.”

“I think it’s fabulous,” said recent Taylor graduate Matt Mancinelli ‘06, a veteran of missions outreach. In addition to his work on an AIDS orphanage in Thailand, Mancinelli left Taylor for a year to travel with missionary George Verwer before returning to campus where he later served as student body president.

“Dr. Habecker has such a great balance of understanding the mission of Taylor that we’re about whole person education but also living and giving the gospel of Christ.” Mancinelli said. “It’s like he lives and breathes that mission statement. It’s about not keeping Taylor confined to Upland, but advancing our evangelical mission (and) our educational mission. I’m super excited about all of it. I can’t wait to see where this place is in 10 years.”

The Taylor University Upland master plan is subject to Board of Trustees approval and possible modification.
The first brick-and-mortar evidence of Vision 2016 could become a reality next year if Taylor officials can successfully raise the needed funds for a proposed $40 million expansion and renovation of the Nussbaum Science Center.

Highlighted in Dr. Eugene B. Hahecker's inaugural address, the Nussbaum expansion would mark the most ambitious individual building effort in Taylor history.
Is Taylor’s science program at a crossroads? While significant achievements have included an expanding physics program, two students’ acceptance into the prestigious medical college at the Mayo Clinic for this year’s fall class, Taylor students’ participation in numerous NASA programs, and teams of Taylor math and computing students competing successfully against significantly larger state schools, a widening gulf in the area of facilities has become a growing concern.

The venerable Nussbaum Science Center is nearly 40 years old. For many buildings, that’s middle-aged; but for a facility that depends upon cutting-edge technology and innovation, it could be measured in light years.

For Dr. Stan Burden, there was not a precise date when he first noticed the science department had outgrown the Nussbaum Center; it was more a growing realization. Burden, a 1961 Taylor alumus, has been a key member of Taylor’s scientific community for nearly 50 years. And during much of that career he has had to make do. Whether it was studying in a converted lab in the late Wright Hall (which burned to the ground during his college years), working in makeshift cement block buildings, or adapting to his current surroundings at the Nussbaum Center, a growing portion of Burden’s scientific efforts has been dedicated to making something fit or rescheduling around other classes and professors’ needs.

Actually, there was about a 10-year window that wasn’t the case. “My first year of teaching was in what became the Freimuth Building,” said Burden, who joined Taylor’s faculty in 1966. “When we came over (to the newly-finished Nussbaum Center in 1967) it was really a treat. At that time there were only a dozen to fifteen faculty members – the building was sized for that group of people and it’s one reason (Nussbaum) is so over utilized now.”
Science Center

Over utilized. The Nussbaum facility was built for a student population numbering 1,100 to 1,200 with a 15-member science faculty. Forty years later, the student population has grown to nearly 1,875. In fact, Taylor officials project the student population will swell to 2,400 students in Upland over the next 10 years. Today the science faculty’s 35 members split offices in converted classroom space that, in many cases, does not meet the minimum requirements for their work.

“There were a growing number of classes that had to meet outside this building – quite a formidable list of classes,” said Burden, who related stories of discussion groups and computer stations in hallways and an ever-increasing demand for space as Taylor’s science program has blossomed into one of the premier programs in the Council for Christian Colleges and Universities.

The proposed Nussbaum addition will add 60,000 square feet of critical classroom, lab and office space, and take a huge step to ensure the success of scientific studies at Taylor for another 40 to 50 years. Plans also call for the renovation of an additional 58,000 square feet of the existing science center that will bring it up to 21st century standards.

“We want to expand our science program through the construction of new facilities as well as the creation of new programs that will produce distinguished scientists who love the Lord their God with all their heart, soul and mind, and who will use their scientific training to meet society’s needs on humanitarian and spiritual levels,” said Dr. Stephen Bedi ’65, Taylor’s provost. “With the host of ethical, moral and environmental issues that our world today faces, we believe there will be an even greater need for gifted scientists with that moral compass whose worldview is shaped by an eternal perspective.”

Even though growth has occurred, Jerry Cramer, Taylor’s senior development officer, and point man for the project, says that the addition is a critical component in the future of sciences at Taylor.

“We believe that the moneys will come from perhaps a few major donors who align themselves with Taylor’s passion for excellence and teaching in the sciences,” Cramer said. “We truly are looking for major foundation support.”

“We must be aggressive because this is a real need. As well as the Nussbaum Center has served our needs, it has also fallen behind in critical areas of technology and physical space. Yes, we do experience tremendous success today, but at what point will the law of diminishing returns take effect?” Cramer wondered aloud. “At the same time, I have to wonder, ‘What could those same students and faculty accomplish if their true potential is unleashed with an up-to-date, state-of-the-art facility?’”

For more information contact Jerry P. Cramer, senior development officer, at 800-882-3456, ext. 5112, or jr cram er@taylor.edu.
If you could wish for anything, what would it be? For 100-year-old Althea Jane Catlin, a 1929 Taylor alumna, that wish was to see her old friend and former Taylor roommate Dorothy Miller. Since the days when they were freshmen roommates in the newly-constructed Magee-Campbell-Wisconsin dormitory 81 years ago, the two struck a fast friendship that carried them through careers, marriage, children and retirement. But time and geography have conspired together to separate the two. Today, Catlin lives in Columbus, Ind, and Miller, 99, lives in Angola. Enter Never Too Late, an Indianapolis-based organization that grants seniors’ wishes. On April 29th, Catlin and her family boarded a stretch limousine, chartered by Never Too Late, for Upland and her first face-to-face visit with Miller since 1979.

“Do you remember Miss Edwards (the missionary) from China?” asked Miller. “No,” said Catlin with some hesitation. “Did we have an alarm clock?” Miller queried. “I think we did,” came Catlin’s answer. “Your memory is better than mine.”

The tragic accident that claimed the lives of five Taylor community members the previous Wednesday also entered the conversation. “I was as sad as if it was my own family, I was really touched,” Miller said, struggling to hold back tears.

“We had a really good conversation,” said freshman Sarah Froggatt, who helped cater the event. Froggatt said Miller’s insights about life’s ups and downs had touched her.

“She said to me, ‘I was really frustrated with God and I thought he’d made a mistake.’ That really stuck with me,” Froggatt said. “Then she said, ‘God doesn’t make mistakes and there is a reason for everything.’ That was really encouraging after all that has happened.”
Just as men and women in the 1800s gave sacrificially so a penniless Liberian named Samuel Morris might attend Taylor University, the spirit of the Samuel Morris Faith Fund continues today through the Taylor Fund. Alumni and friends intentionally, humbly, and sacrificially support the Taylor Fund and provide crucial resources for the University. These generous individuals allow Taylor to uphold her commitment to provide excellence at the highest level in faculty and program resources while also helping to meet the financial aid needs of students. The Taylor Fund is truly the “Faith Fund” of the 21st century.

“The Taylor Fund is the cornerstone for all giving to the University and, in fact, is the best way to show your support for the Taylor Experience. It is vital for meeting the financial aid needs of students and maintaining dynamic academic programs that make Taylor University one of the premier Christian universities of evangelical faith. Marylou and I have chosen to make our first gift each year to the Taylor Fund. Will you join us in giving?”

– Eugene B. Habecker, President

Taylor Family. Taylor Fund. Your gifts touch lives. The 05-06 goal was $1,566,000 to strengthen academics, student programs and financial aid . . . and we topped the goal on May 31 by just $769. So every gift mattered - thank you! Our goal by May 31, 2007, is $1,723,000. Thanks for your prayers and support.

Esta (Herrmann) Howard, 91, died on Jan. 23 in her home. Survivors include husband Arthur '34 and two sons.

1938
Emma (Alspaugh) Copeland, 91, passed away on Feb. 6. She was a HS teacher and received several outstanding educator awards. Survivors include nephew Michael Alspaugh '78 and great nephews Shawn Alspaugh '02 and Matthew Alspaugh '04. She was preceded in death by brother James Alspaugh '39.

1948
William Hunt has written the book Sandy's Story, a nonfiction Christian guidance book published by Xulon Press. William was a pastor for 21 years and then became a marriage and family therapist for 34 years and serves still. E-mail is whunt@komputerguy.com.

1950
A gathering of the Paul & Ruth Erdel family was held in the summer of 2005. All their children either serve at

Paul & Ruth Erdel family

been training and participating in Olympic style weightlifting including competitions on the world level.

1960
Charles Ford, PhD, professor of health sciences at the Univ of New England, returned to Tel Aviv with wife Barbara (Hanawalt x'61) to teach law and ethics in Tel Aviv and Haifa to Israeli nursing students. This is the fifth year the Fords have participated in the American/Israeli joint program. The Fords have 20 grandchildren and make their permanent home in Lake Wylie, SC. E-mail is une1@hotmail.com • Miriam (Beers) Van Valkenberg passed away on Feb. 6. She spent her freshman year on campus with the class of '49, but graduated with the class of '60. Miriam was an outstanding 5th grade teacher for 28 years and enjoyed about 10 years of retirement before falling victim to Alzheimer's disease. Surviving are husband Dalton x'50, children Diane (Van Valkenberg x'73) Harris and Dale x'75, seven grandchildren and three great grandchildren.

1962
Margie Livingston and Hugh Dickinson were married on July 30, 2005. They live in Rockford, Mich. Margie continues to serve with BCM Int. • Wayne & Jeanie (Wills x'64) Weeks recently retired to their lake home in Onsted, Mich. They served as missionaries for the last four years at a school for MKs in San Cristobal, Guatemala. Wayne had been a professor at Western Michigan Univ, Eastern Michigan Univ and Spring Arbor Univ during his teaching career. After finishing her teaching degree and master's degree, Jeanie taught 28 years in Christian schools. They have been married 43 years and have two children and three grandchildren. Wayne & Jeanie have fond memories of Taylor where they met and fell in love. E-mail is jeaniewayneweeks@hotmail.com.

1964
Dr. Evan Bergwall, Jr. died on Feb. 16 in his home. Evan was a Methodist minister and vice president of Flag Bank. He was director of Roswell United Methodist Church Counseling Center 1979-1992. He also was a member of the American Psychological Assoc and the Northern Ind. Methodist Conference. Survivors include wife Jacqueline and sons Drew and Evan Bergwall III. His mother Jean Bergwall HA '81, also survives. Evan was preceded in death by his father Dr. Evan Bergwall '39, former president of Taylor University.
1969
Mike Miley took early retirement from North Central HS in Indianapolis to coach the offensive line at Taylor. The highlight was being with son Nathan '06 on the same team. What a blessing for both! • Chris Stauffer died of a massive heart attack in Nairobi, Kenya, on March 1. Chris taught in the Fort Wayne (Ind.) Community School system for 15 years. Feeling that God was calling them into missions, in 1981 Chris and wife Hettie (Hardin) went to Faith Academy in Manila, Philippines, for a two-year assignment with Wycliffe Bible Translators as support personnel, assisting the translators and other missionaries by teaching their children. Little did he imagine in 1981 that he would teach elementary PE at Faith for 12 years, and raise four children there. After a five year break in the US taking care of elderly parents, the Staufers accepted another overseas assignment, this time at West Nairobi School in Kenya. Survivors include wife Hettie, four children, one son-in-law and two grandchildren.

1970
Walter & Joyce Roberson are teaching pastors in Africa. Walter is also senior pastor at Vinelife Community Church in Longmont, Colo. E-mail is wroberson@vinelife.com.

1971
Dr. Bob Canida followed his father as a dentist in Madison, Ind., and now is joined by his son Ben '01. Ben graduated from IU School of Dentistry in 2005. • Gayle Ott recently retired after teaching elementary education in Caledonia, Mich.

1973
Mike & Bethany (Hartman x) Felix spent their 4th winter in Anchorage, Alaska. Mike runs AT&T's stand-alone business unit called Alascom. They left the sunny beach in Florida to seek great adventure, and they found it! Children Josh '99, Sarah Beth '01, Hannah '04, and Bethany's mother Dottie (Hartman x'52) Stanton have moved to Alaska as well. • Thomas Lawson is financial aid administrator at Pillsbury Baptist Bible College. He & wife Kathleen (Wozniacki) live in Owatonna, Minn. E-mail is tomlawson@pillsbury.edu.

1976
Steve Berwager retired after teaching 16 years, serving as administrator for 10 years and special education consultant for three years. He lives in Asheville, NC. E-mail is sberwager@aol.com.

1979
Drew Whitfield is secondary principal and athletic director at Cornerstone Christian Academy, Sycamore, Ill. Drew & wife Christine have five children: Lucas (25), Emily (23), Zachary (21), Seth (19) and Noah (6). E-mail is whitfd@tbnet.com.

1980
Bob & Candace Walker have accepted a call to Zambia, Africa, as missionaries for Heart of the Bride, a ministry to the world's orphans. They will be leaving with their eight children — Shad, Hannah, Wil, Hailey, Hope, Halayna, Graham and Nathan — in September. Their job will be to rescue orphaned street boys and develop a boys' ranch for teaching and training 8- to 15-year-olds for the Lord. To keep in touch, e-mail WalkersXL@yahoo.com.

1981
Alma Shepard is now vice president for development for The National D-Day Museum. She is responsible for working with the board and volunteers to complete the $282 million campaign. E-mail is almajane1026@yahoo.com. • Dirk & Cindy Case are proud to have both their children attending Taylor. Joshua '07 lives on 2nd West Wengatz and is a political science major. Amanda '09 lives on 3rd West Olson and is a freshman psychology major.

1982
Michael Lee died on March 13. He was formerly a Paulding County (Ohio) Sheriff from 1989-1992. Wife Cathy Harper '82 survives. • Tim & Barb Stevenson, along with sons Dane, Ryan and Soren, are serving with Frontiers by elementary ed for the Virginia Department of Education. He is also a doctoral student at Virginia Tech. Cindy works as a computer systems operator for Hanover County Public Schools. E-mail is mrcal@comcast.net. • Dean & Mindy (Date) Anderson live in Healdsburg, Calif. Children are Bret (16), Paige (14) and Jill (11). Dean & Mindy are planning a book, “52 Sundays,” which will chronicle their attempt to worship in a different church, one per state (plus their home church and the National Cathedral in Washington, DC) over the course of a year. They would love suggestions of churches to visit during 2007! • Andrew & Debra (Messamore) Kral have three children: Michael (12), Michelle (6) and Marcus (1). E-mail is dkralkrlr.com. • Scott & Andrea (Price) Preissler now live in Flower Mound, Texas. Scott is the executive director of the Intl Center for Steward Leadership. E-mail is apreissler@sbcglobal.net.

1984
Lisa & Rick Florian recently adopted a daughter Lily (2) from South Korea. Siblings are Taylor (15), Will (13) and Hunter...
One cold marathon

When Alan Briggs spent the past winter in Antarctica, he found polar desert, life-threatening cold and the same faithful God.

Briggs, a 2005 Taylor University graduate, worked for Colorado-based Raytheon at the McMurdo Station in Antarctica. Spending up to 60 hours a week in 60-70 degrees below zero temperatures loading and unloading U.S. Air Force C-130s and C-17s on a packed-ice runway, he was also able to carve out some additional time for outdoor exploration.

"The cold ... zaps the energy. That's the hardest thing about the job," he said.

One of the benefits, beyond an adventure he'll remember for the rest of his life, was the summer solstice conditions he experienced there: when he arrived at McMurdo in October, the continent had just begun a period of 24-hour daylight conditions. But despite the all-day-all-night sunlight of the Antarctic summer, Briggs said the only people who live there are those paid to do so.

"Some people do stay for a year," he said. "But most ... only experience the summer down here. People have to go back to civilization for sanity."

Some trappings of civilization were there. Briggs, along with 35 other kindred spirits, ran a marathon on the Ross Ice Shelf on one of the warmer days when the temperature climbed to a balmy 26 degrees. Some, like Briggs, ran the entire distance while others skied it and others settled for a half marathon.

The cold was ever present. Briggs's lungs felt raw when he was outside; and during one hike, he avoided a potentially life-threatening mishap when he lost his mitten in 60-below-zero wind chill conditions. "My hand went numb quickly. I have never experienced cold like this. Ever. It gives you a headache some days," he said. "Imagine the coldest, windiest day in Upland each year. It feels 10 times worse!"

(12). E-mail is RickFlorian@comcast.net • Steve & Susan (Pringle) Holmes, along with Catherine (14) and Sarah (11), have moved to Georgia after nine years in "up north Minnesota" and would love to hear from any fellow Taylor alumni. continued from page 36

Even amidst the icy conditions, Briggs put his Christian education degree to use, leading bible studies and preaching a memorial service before returning to Colorado in March.

“Sometimes I think we have to really risk things and push our limits in order to understand God’s much ‘unreachable’ characteristics,” Briggs said.“I have also been reassured that the Church is everywhere. It is one unit, an organism that exists apart from region or denomination, even in the literal ends of earth.”

“I have also learned that apart from Christ the biggest adventure will not satisfy,” he added.”I am reassured that putting yourself on the line will help you grow in huge ways.”

“Imagine the coldest, windiest day in Upland each year. It feels 10 times worse.”

E-mail is marcgoodwin@gmail.com. • Martina Graber married Clark Cully on Dec. 30, 2005 in Ann Arbor, Mich. In the wedding from TU were Desiree (Graber ’01) Matthews and Kristen Brown ’05. Two weeks before the wedding Martina earned
an MSW degree from the Univ of Mich. She is employed as an academic counselor at the Univ of Phoenix at the Warrenville Learning Center. The couple lives in Naperville, Ill. E-mail is martinaully@gmail.com.

• Megan Herrmann and Brett Kraftson '05 were married on Aug. 7, 2004, in Upland, Ind. TU participants in the wedding were

Abby (Johnson) Fennig, Becky George, Kristel Bailin, Loralee Songer, Marisa Gratson, Ben Harrison '05, Preston Cosgrove, Andrew Briggs, Ann Essenburg '05, Brendan Maloney '05, Matt Herrmann '07, Lovell '75 & Sherry (Korfmacher '76) Haines and Jay Kesler '58. The couple lives in Arlington, Va., but will be moving to Muncie, Ind., where Brett will begin graduate studies.

• Kristina Kline is a customer service rep for MEGlobal in Midland, Mich. E-mail is knwhiting@gmail.com. • In Aug. 2005, some Taylor women from 2004 held a reunion in Chicago. Attending were Laurie Way, Kate (Neyland) Rickard, Kristina

Kline, Katy Hobbs, Leslie Ames, Lindsey (Bailey) Heath, Dana (Disanto '06) Pietrini and Sarah Townsend.

Naperville, Ill. Sharon is an assistant research executive for Millward Brown and Chaz is a 4th grade teacher in Wheaton. E-mail is sharonleekron@gmail.com. • Kelly Peters married Brad Yordy on June 25, 2005, in Gas City, Ind. In the wedding from TU were Darla Stults, Micah Hatch, Jennifer Castellano, Brad Klaver '06, Kelly Yordy '01 and

2005
Teresa Gerig wed Daniel Peterson on Jan. 29, 2005. TU participants were Ashley Peck '04, Joanna LaForge '06, Liz Lynch '06, Brent Gerig '02, Matt Wissman, Eric Moore '06, Annette Driver, Sara (Chambers '06) Gerig, Theresa Henderson '07, Bethany Folkins and Linda (Trolley '74) Gerig. • Correction: David Mercier ("Frenchy") is living in the Indianapolis area and is working with The Boaz Project as trip-coordinator. His e-mail is david@boazproject.org.

2006
Sara Chambers and Brent Gerig were married on Aug. 6, 2005, with many TU alumni present. Brent is a computer engineer at New Horizons in Marion, Ind. E-mail is brent@gerig.org.

2007
Dani Jorg x married Paul “Chip” Brown '04 on June 18, 2005. TU participants were Jamie (Jorg '00) Spence, Maggie Jetter '07, Dave Jorg '98, Andrew Wichterman '04, Matt Braham '04, Adam Griffis '04, Timothy

Have info for the Alumni Notes?

Send your update information to the alumni office at 236 W. Reade Avenue, Upland, Ind. 46989. Please include clearly labeled pictures (which will only be published if alumni are in the photo). We will return prints if requested.

You may also submit information to Marty Songer at (800) 882-3456, ext. 5212, or mrsonger@taylor.edu.

Thanks for keeping in touch with your alma mater! We love hearing from our alumni!
Join host George Glass '58 for this special event!

Seventh Annual Odle Classic Golf Tournament

Bishop William Taylor Society

The Bishop William Taylor Society has been established to honor and thank Taylor University alumni and friends who have provided for the University in their estate plans. The Society is named after Bishop William Taylor, Taylor University's namesake. By making a deferred gift you will join a distinguished group of donors who have made an investment in the future of Taylor University, one of the premier Christian universities in the nation. To become a member of the Society, you will have made one or more of the following arrangements and have notified the University in writing.

- A bequest to the University in your will or trust
- A life income plan (annuity or unitrust) for the benefit of the University
- A charitable lead trust for the benefit of the University
- Designating the University as a beneficiary to your retirement plan or life insurance policy

There are no dues or fees associated with membership. For more information, please call Ken Smith, Nelson Rediger, Tom Essenburg or Ian Blair at (765) 998-5144.

And I will bring the third part through the fire, and will refine them as silver is refined, and will try them as gold is tried: they shall call on my name, and I will hear them: I will say, It is my people: and they shall say, The Lord is my God.

Zechariah 13:9
Loving neighbors

It may not have been the first sign. It was not the only sign. But it was the one I saw that morning as the dawn revealed not only a campus’ broken heart, but a community’s.

Someone at the Friends church just a few blocks north of campus had been awake during the nighttime hours of April 26th and 27th as well. It was such a simple message, but it touched the deepest part of my soul. It had been a dark night for our neighbors too. Our grief and loss was also their grief and loss. And by God’s rich grace and mercy, we would come through all of this together.

We are proud of our Upland and Grant County heritage. We love our neighbors. Their joys have been our joys. On that most difficult day, we were reassured of those things we’ve always known - that our neighbors love and care about us too.
Melissa Munn didn’t expect to have to learn the meaning of terms like pulmonary embolism, RVAD or Coumadin. But after a close brush with death, she and her family have gained a firsthand knowledge of a malady that can kill with little or no warning, and a God who is faithful beyond human understanding.

Melissa, who graduated from Taylor in May, was married on July 8th to fellow Taylor grad Brad Moser - this following a bout with a pulmonary embolism, a large blood clot that worked its way into her heart's arterial system and nearly killed her on April 24th.

She had been on antibiotics for a presumed case of pneumonia, but that morning began passing out and having breathing difficulty. If not for a roommate who had overslept and was there to call 911, she would have died. "The paramedics and doctors said if it had been 10 more minutes," Melissa paused, "they don't know how I made it in the first place. Any more time would have been bad, I think."

It was bad as it was. Her heart stopped and she had to be resuscitated before being flown to Lutheran Hospital in Fort Wayne. But her mother Pam says today that even when she and her husband Don learned Melissa faced only a 1-in-10 chance for survival, they trusted the Lord.

"The peace that passes all understanding ... you hear that," Pam said. "In the midst of all that, we truly experienced what that felt like. A nurse in the hospital commented on how calm we were; I said, 'This isn't me, this is God's hand.'"

Melissa endured three open-heart surgeries as doctors worked to save her life, and try to get the damaged right side of her heart beating again. During the first operation, surgeons found a saddle pulmonary embolism had partially blocked two of her heart's major arteries; doctors later determined that she suffers from Type II Prothrombin, a condition that can lead to above-average blood clotting. She is currently taking the blood thinner Coumadin to counter it.

Still, Melissa’s heart was “insulted” and “stunned,” in the same manner as an arm or leg muscle after too much exercise. An RVAD (Right Ventricular Assist Device) kept her heart beating properly, but doctors told the family they would need to install a longer-working device, and even that had its limits. Melissa faced possible heart transplant surgery before her heart began to beat normally again. “Lutheran is an amazing heart hospital (but) there aren’t many cases like mine,” Melissa said. 

"(Before) the third surgery, the surgeons told my parents they didn't expect the heart to work; but when they weaned me off (the RVAD) the heart started working, which was amazing."

"Doctors and surgeons came from all over the hospital (to observe). A nurse said she had never seen an operating room where everyone had tears in their eyes."

Melissa’s appearance at Taylor’s commencement on May 20th buoyed a community that had held an all-night prayer vigil for her on April 24th, and was still badly shaken by the April 26th van accident that killed four students and a dining services staff member.

"I've been given such an amazing blessing, I got to experience something that most people never do - the way that family and friends come together when a loved one is dying,” she said, “I have so much confidence and peace that I'm supported and loved, not just by people, but by God."

"What I can use this for in the future to further His kingdom, I definitely don't know,” she added. “I'm waiting to find out.”
