Stanley S. Kresge, Dedication Speaker

Stanley S. Kresge, President of the Kresge Foundation and Vice-Chairman of the Board of the S. S. Kresge Company is the featured speaker at the Dedication banquet for the new Food Service Center and Men's Residence Hall.

Following graduation from Albion College, Mr. Kresge started to work for the S. S. Kresge Company in 1923 as trainee. In 1930 he joined the Detroit Office (headquarters) staff, and in 1950 was elected Director of the Kresge Company. The following year he was elected Vice President and President's Administrative Assistant, and in 1953 was named Vice-Chairman of the Board.

In addition, he was elected trustee of the Kresge Foundation in 1930. Four months later he was elected Vice-President, and in 1952 was elected President of the Foundation, which was founded by his father, the late Sebastian S. Kresge, in 1924.

He is married to the former Miss Dorothy E. McVittie. They have three sons, Walter H., Stanley S. Jr., and Bruce A.

An outstanding Christian laymen, his two principal interests are his family and church. He is a Trustee, Member of the Official Board, and Chairman of the Finance Committee of the Metropolitan Methodist Church, Detroit.

Mr. Kresge is a member of the Detroit Rotary Club and a Trustee of the Detroit Rotary Foundation and of Albion College.

Open House, Sunday, November 23

Open House in the new Storer Food Service Center and Samuel Morris Men's Residence Hall will be celebrated Sunday afternoon, November 23, from 2:00-5:00 P.M. (Central Standard Time).

The Storer Food Center houses the modern kitchen, the Kerwood Room, and the striking dome shaped Edward Camp Memorial Dining Room.

Included in the Open House will be the public lounge on the main floor of the new dormitory, which is furnished in a modern motif, with foam rubber lounge chairs and cushions.

Guests also will have opportunity to view dormitory rooms which are furnished with functional dressers, desks and study lamps all in one unit.
About the New Buildings

The new Storer Food Service Center and Samuel Morris Residence Hall for men is the first step in Taylor's five million dollar Development Program.

The buildings were constructed and furnished at a cost of $782,000. The unique dome-shaped dining room stands 25 feet high at the center and is enclosed by a circular glass wall.

Ten curved, laminated wood beams spreading out from the center of the dome form arches which reach out 25 feet beyond the glass wall and are anchored in the ground to cement blocks each weighing several tons. The main dining room, named in memory of the late Edward W. Camp, former Vice President of the Chronicle Publishing Co. of Marion, Ind., is 100 feet in diameter and accommodates 600 students.

The entire Food Center, named in memory of O. W. Storer, deceased banker of Muncie, Indiana, includes a modern kitchen which measures 100 x 65 feet, and a private dining room seating 80 guests. This room bears the name of the late Wayne H. Kerwood, of Knightstown, Indiana.

The Samuel Morris Men's Residence Hall was constructed by the lift-slab method. The four story structure provides facilities for 176 men in 88 double rooms. In addition, there is a student lounge on each floor and a public lounge on the main floor.

The walls of the dormitory are constructed of insulated panels with a styrofoam core covered with fibre-glass cloth.

General contractor for the entire project was the Bowman Construction Company of Marion, Indiana. The McCay Electrical Company of Fort Wayne installed the wiring, and Hillman's of Fort Wayne installed the kitchen equipment.

Plumbing, heating and ventilating work was done by Liniger's of Marion, Indiana. The buildings were designed by Orus Eash, Fort Wayne architect.

Other buildings called for in Taylor's Development "Blueprint" are a science building, chapel, administration building, and fine arts center and auditorium.

Taylor Enrollment Is Largest in History

Business Department Expands

The Taylor student body now numbers 696, largest in history. This figure represents a 17% increase over last year's enrollment of 594.

Enrollment has increased 58% since 1953, when the student body numbered 438. Since then the college has grown steadily each year, with 542 students in 1954, 559 enrolled in 1955, 565 in 1956, and 594 last year.

A substantial increase in the size of the business department is shown in the chart at the right.

At present 160 students are enrolled in business courses, compared with 22 in 1950. The number of business majors is currently 62, compared with 25 two years ago.

A popular innovation begun last year was a series of lectures by prominent businessmen including J. C. Penney and Herbert J. Taylor. A total of 12 visiting businessmen participated in this series.

Under the leadership of Professor Dalton VanValkenburg, a student Business Club has been formed. Known as the "Collegiate Christian Business Men," this group is affiliated with the Marion, Indiana committee of the Christian Businessmen's Committee International.
Science Program Advances

The Taylor Science Division has been strengthened markedly in the past two years. This fall a sharp increase over last year in enrollment in science courses has been realized with 335 students now enrolled in science courses and 135 studying mathematics.

The number of students in the Chemistry Department has increased 40% over last year; in Physics, 32%; Algebra, 204%; Calculus, 75%; Zoology, 38%; and Anatomy and Physiology, 20%.

The Atomic Energy Commission awarded Taylor two grants in the past eight months for the purpose of establishing a Radioisotope training program and to conduct experiments in radiation biology under the supervision of Dr. Elmer Nussbaum, scientist in radiation biology and head of the Physics Department.

Last year a 3-2 engineering affiliation program was instituted with Purdue. In this advantageous program the students take three years of liberal arts training at Taylor and transfer to Purdue where they receive the graduate degree in engineering after two years there. Students also receive the A.B. degree from Taylor upon completion of their first year at Purdue.
